Exam AB-730 Success & Study AB-730 Materials

There are more and more people to try their best to pass the AB-730 exam, including many college students, a lot of workers, and even many housewives and so on. These people who want to pass the AB-730 exam have regard the exam as the only one chance to improve themselves and make enormous progress. So they hope that they can be devoting all of their time to preparing for the AB-730 Exam, but it is very obvious that a lot of people have not enough time to prepare for the important exam. Just like the old saying goes, the spirit is willing, but the flesh is weak.

Microsoft AB-730 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Understand generative AI fundamentals: This domain covers Microsoft 365 Copilot's operation, data privacy, context influence on responses, chat versus agent experiences, and feature differences across apps. It addresses responsible AI practices including risk identification, verification methods, and data protection restrictions.

Topic 2	<ul style="list-style-type: none"> • Manage prompts and conversations by using AI: This domain focuses on creating effective prompts, managing and sharing them, handling chat conversations, and creating and configuring custom Copilot agents with appropriate settings and knowledge bases.
Topic 3	<ul style="list-style-type: none"> • Draft and analyze business content by using AI: This domain covers creating documents from prompts or existing files, generating summaries, transferring data between apps, using Copilot for meetings and collaboration, and leveraging memory for personalized assistance.

Microsoft AI Business Professional Sample Questions (Q82-Q87):

NEW QUESTION # 82

You are a project coordinator for a small consulting firm.

You are responsible for tracking client communications, managing project timelines, and preparing weekly status updates for internal stakeholders.

You have a Microsoft 365 Copilot license.

You create an agent to help you monitor project milestones, follow up on client emails, and generate weekly summary reports.

With whom can you share the agent?

- A. the people in your organization and people that have personal Microsoft accounts
- B. only Microsoft Teams channel members
- C. any person who has a valid email address
- D. only the people in your organization

Answer: D

Explanation:

Microsoft 365 Copilot agents operate within the security, compliance, and identity boundaries of a Microsoft 365 tenant. Custom agents created in the Microsoft 365 Copilot app are governed by organizational policies, role-based access control, and Microsoft Entra ID authentication.

According to Microsoft AI Business Professional guidance, Copilot agents are designed for enterprise use and are shared within the organization unless administrators configure broader sharing capabilities. External sharing with personal Microsoft accounts or arbitrary email addresses is not supported by default due to security, data protection, and compliance requirements.

Because the agent in this scenario interacts with organizational data such as client emails, project milestones, and internal reports, access must remain restricted to authenticated users within the same tenant. This ensures that sensitive business information remains protected and that data access respects existing permissions.

Therefore, the agent can be shared only with people in your organization, making option D the correct answer.

NEW QUESTION # 83

Select the answer that correctly completes the sentence.

Answer Area

If you start a temporary chat in  Microsoft 365 Copilot, and then start a new chat, all the prompts and responses from the temporary chat will be

- deleted immediately
- deleted after one hour.
- moved to a private notebook.
- moved to your Microsoft OneDrive.

Answer:

Explanation:

Answer Area

If you start a temporary chat in  Microsoft 365 Copilot, and then start a new chat, all the prompts and responses from the temporary chat will be

- deleted immediately
- deleted after one hour.
- moved to a private notebook.
- moved to your Microsoft OneDrive.

Explanation:

Temporary chat in Microsoft 365 Copilot is designed for privacy-focused, non-persistent interactions. When a user initiates a temporary chat session, the conversation is not saved to Copilot chat history and is not retained for future reference within the standard conversation history interface.

Once the session ends or a new chat begins, the prompts and responses from that temporary session are deleted immediately. They are not moved to OneDrive, stored in a notebook, or retained for a delayed deletion period.

This feature supports secure and confidential usage scenarios where users may want to explore ideas, draft sensitive content, or test prompts without creating a stored record in their activity history.

From a generative AI governance perspective, this reflects Microsoft's design principle of providing configurable persistence levels, balancing productivity with enterprise security, compliance, and user privacy controls.

NEW QUESTION # 84

You create a prompt in Microsoft 365 Copilot to help you create a draft project report.

You need the prompt to be available in the Copilot Prompt Gallery.

What should you do first?

- A. Create a notebook.
- B. Create a page.
- C. Run the prompt.
- D. Add an agent.

Answer: C

Explanation:

In Microsoft 365 Copilot, the Copilot Prompt Gallery is used to store and reuse prompts that have been created and tested. To save a prompt into the gallery, Copilot must first have the prompt as an executed interaction so it can be captured as a reusable prompt (often alongside the context and intended outcome).

Microsoft guidance for prompt management emphasizes validating prompts by running them and reviewing the output, then saving the prompt for reuse once it produces the desired results.

Option D is therefore the correct first step: run the prompt . After execution, you can save it to the Prompt Gallery so it becomes easily discoverable and reusable for future project reports or for sharing within your organization (subject to policy).

Creating a notebook is useful for organizing reference materials across related conversations, but it is not required to publish a prompt to the gallery. Adding an agent is for creating specialized assistants with knowledge and capabilities, not for saving a single prompt. Creating a page is used to refine and collaborate on generated content, not to make a prompt available in the gallery.

Therefore, the first action is to run the prompt .

NEW QUESTION # 85

Select the answer that correctly completes the sentence.

a specific date range of activity

From the Microsoft 365 My Account portal , if you select Delete history for the Copilot activity history, you can delete

Answer:

Explanation:

NEW QUESTION # 86

You are using Microsoft 365 Copilot to plan a trip and have asked Copilot to remember several details about the trip. You cancel the trip plans. You need to ensure that Copilot forgets the details. What should you do?

- A. From Copilot delete memories.
- B. From the My Account portal, delete the Copilot activity history.
- C. From Copilot delete custom instructions.
- D. From Copilot delete all the conversation about the trip.

Answer: A

Explanation:

Microsoft 365 Copilot includes a memory capability that allows it to retain user-provided preferences or details across interactions when explicitly instructed to remember them. These stored details are referred to as memories and are separate from standard conversation history.

If you previously asked Copilot to remember specific trip-related details, those details are stored as structured memory items. Simply deleting the conversation does not necessarily remove stored memory entries. Likewise, deleting activity history through the My Account portal removes conversation records but does not directly manage structured Copilot memories. Custom instructions define persistent behavioral preferences and are unrelated to trip-specific stored data.

To ensure Copilot no longer retains those trip details, you must delete the stored memories directly within Copilot. Microsoft documentation explains that users can view and manage saved memories and remove them individually to control what Copilot retains.

Therefore, the correct action to ensure Copilot forgets the trip details is to delete the memories.

NEW QUESTION # 87

.....

Please don't worry about the purchase process because it's really simple for you. The first step is to select the AB-730 test guide, choose your favorite version, the contents of different version are the same, but different in their ways of using. The second step: fill in with your email and make sure it is correct, because we send our AI Business Professional learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest AI Business Professional version. At the same time, choose the appropriate payment method, such as SWREG, DHpay, etc. Next, enter the payment page, it is noteworthy that we only support credit card payment, do not support debit card. Generally, the system will send the AB-730 Certification material to your mailbox within 10 minutes. If you don't receive it please contact our after-sale service timely.
