Plus, we have various question types and difficulty levels so that you can tailor your Salesforce AP-222 exam dumps preparation to your requirements.

## Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q54-Q59):

### NEW QUESTION # 54

Bobahaven has previously implemented Salesforce Service Cloud to handle constituent queries and complaints, including a constituent self-service digital experience. This was implemented previously using the Help Center template. Bobahaven is now ready to implement the Public Sector Solutions Licenses, Permits, and Inspections modules, and wants to provide constituents with access to digital application forms. What is the right solution for this requirement that minimizes customization and site maintenance?

- A. Create new pages and deploy components such as OmniScripts and FlexCards within the existing Help Center experience site.
- B. Create OmniOut components and deploy them to the existing Help Center experience site.
- C. Create a new Applications digital experience using the Licenses and Permits Experience Site template, and deploy components such as OmniScripts and FlexCards to the new experience site.

**Answer: C**

Explanation:

Create a new Applications digital experience using the Licenses and Permits Experience Site template, and deploy components such.. This is the packaged route that keeps the process supportable, auditable, and aligned to the data model.

The Core Concept Explained: OmniStudio separates guided interaction, data mapping, orchestration, and UI presentation. That

separation is critical for high-volume public-sector intake because each asset can be tested and reused independently. Step-by-Step Technical Analysis: Design the user journey first, then decide which OmniStudio asset owns each responsibility. OmniScript captures guided input, DataRaptors map Salesforce data, Integration Procedures orchestrate server-side work, and FlexCards expose summarized context. After assembly, validate data payloads, error handling, security, and performance with realistic application records. Create a new Applications digital experience using the Licenses and Permits Experience Site template, then deploy OmniScripts and FlexCards to that site.

Why the Incorrect Options Are Wrong: A may look related, but it does not place the logic in the correct declarative Public Sector or OmniStudio configuration layer. B may look related, but it does not place the logic in the correct declarative Public Sector or OmniStudio configuration layer.

#### NEW QUESTION # 55

Bobahaven wants to implement the Grants Management module of Public Sector Solutions. They would like to allow constituents to apply online for grants and check the progress of grant applications. The Chief Marketing Officer and Head of Constituent Services have expressed their concerns about the security of the solution. They want to ensure they comply with privacy regulations around the storage and use of constituent's data, and they are wondering how to protect against bots potentially spamming the application forms. What should the Technical Consultant suggest to Bobahaven to protect the application forms?

- A. Enable the Salesforce Spam Check for Experience Sites.
- B. Deploy grant application OmniScripts on Bobahaven's Experience Site pages set to 'Requires Login.'
- C. Provide constituents with a search page on Bobahaven's website to look up application reference numbers and check the applications progress.
- **D. Implement spam checking for Bobahaven's Experience Site forms using CAPTCHA.**
- E. Set the external organization-wide default sharing settings for grant applications objects to Private.

**Answer: D**

Explanation:

Implement spam checking for Bobahaven's Experience Site forms using CAPTCHA. This selection keeps the implementation declarative and within the intended Public Sector operating model.

The Core Concept Explained: OmniStudio separates guided interaction, data mapping, orchestration, and UI presentation. That separation is critical for high-volume public-sector intake because each asset can be tested and reused independently.

Step-by-Step Technical Analysis: Design the user journey first, then decide which OmniStudio asset owns each responsibility. OmniScript captures guided input, DataRaptors map Salesforce data, Integration Procedures orchestrate server-side work, and FlexCards expose summarized context. After assembly, validate data payloads, error handling, security, and performance with realistic application records. Implement CAPTCHA or reCAPTCHA on the Experience Site forms.

Why the Incorrect Options Are Wrong: A does not meet the implementation-quality bar for security, scale, auditability, or maintainability in this scenario. B does not meet the implementation-quality bar for security, scale, auditability, or maintainability in this scenario. C does not meet the implementation-quality bar for security, scale, auditability, or maintainability in this scenario. E does not meet the implementation-quality bar for security, scale, auditability, or maintainability in this scenario.

#### NEW QUESTION # 56

A customer has specific steps/tasks that need to be performed every time a new Business License Application comes in. The following actions must be completed: The applicant must upload an image of their driver's license. The license reviewer must perform a background check within five business/working days. The license reviewer must enter the background check results into an external system manually within two business days of completing the background check. The license reviewer must provide a recommendation to the approver to approve/reject the application & submit it for review. The license reviewer may add additional steps/tasks for a particular application as needed. Which statement is true regarding Action Plan Templates relative to the business requirements above?

- A. The reviewer users cannot create their own tasks within a predefined action plan template.
- B. A document checklist item for an action plan template cannot be created.
- C. Action plans cannot have tasks with due dates dependent upon prior tasks within the action plan.
- **D. An action plan template can be created for the business license application object, and a document checklist item for the image upload can be created.**

**Answer: D**

### NEW QUESTION # 57

What are two possible use-cases for a FlexCard?

- A. A widget to ask multiple pages of questions in the application form
- B. A widget to perform inline edits and calculations within a table quickly
- C. A homepage widget to quickly launch common processes.
- D. A widget to aggregate complex data models for quick-glance information

**Answer: C,D**

Explanation:

FlexCards in Salesforce Public Sector Solutions are used to create highly customizable and dynamic user interfaces. They serve as building blocks to display and interact with data efficiently. Two key use cases for FlexCards include:

\* **Aggregating Complex Data Models for Quick-Glance Information:**

\* FlexCards can be designed to pull data from multiple sources and present it in a consolidated, easy-to-understand format. This allows users to quickly get an overview of relevant information without navigating through different sections or records.

\* For example, a FlexCard can display a summary of constituent details, open cases, recent interactions, and any pending tasks, all in one place.

\* **Homepage Widget to Quickly Launch Common Processes:**

\* FlexCards can be added to the homepage or any other relevant page as actionable widgets. These widgets can include buttons or links to initiate frequently used processes such as creating a new case, scheduling an inspection, or submitting a service request.

\* This enhances user productivity by providing quick access to essential functions directly from the homepage.

### NEW QUESTION # 58

A public sector agency recently implemented public Sector Solutions for the inspection and license renewal of food outlets in the city. They want to set up dynamic assessments where assessment questions are categorized for use in different scenarios depending on whether the outlet is take-away, dining, or a combination of both.

The categorization only applies to specific questions in the assessment.

Two which objects should they add new categories?

- A. Assessment indicator Definition
- B. Assessment Question
- C. Action Plan
- D. Assessment Task Definition

**Answer: A,B**

Explanation:

For a public sector agency implementing dynamic assessments within Salesforce Public Sector Solutions, the appropriate categorization should be applied to the following objects:

\* **Assessment Question:**

\* The Assessment Question object is used to define individual questions that will be asked during an assessment. By adding categories to these questions, the agency can dynamically include or exclude questions based on the specific scenario (e.g., take-away, dining, or both).

\* This allows for flexibility and ensures that only relevant questions are presented based on the type of food outlet being inspected.

\* **Assessment Indicator Definition:**

\* The Assessment Indicator Definition object is used to define criteria and indicators that aggregate assessment questions. Adding categories to these definitions helps in organizing and applying specific sets of questions and indicators based on the context of the assessment.

\* This ensures that the assessments are dynamic and can adapt to different scenarios without requiring separate templates for each type of outlet.

By categorizing both Assessment Questions and Assessment Indicator Definitions, the agency can create a robust and flexible assessment process that adapts to various inspection contexts efficiently.
