DS0-001 Authentic Exam Questions | Exam Topics DS0-001 Pdf

CompTIA DS0-001 practice exam support team cooperates with users to tie up any issues with the correct equipment. If CompTIA DataSys+ Certification Exam material changes, CertsFire also issues updates free of charge for three months following the purchase of our CompTIA DS0-001 Exam Questions.

CompTIA DataSys+ Certification Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which of the following is used to document the system catalog in a database?

- A. Data dictionary
- B. Project plan
- C. System requirements documentation

- D. Standard operating procedure

Answer: A

Explanation:

A data dictionary documents the system catalog by providing metadata about database objects, their structure, and relationships within the database.

NEW QUESTION # 27

A business analyst is using a client table and an invoice table to create a database view that shows clients who have not made purchases yet. Which of the following joins is most appropriate for the analyst to use to create this database view?

- A. RIGHT JOIN ON Client.Key = Invoice.Key WHERE BY Client.Key IS NULL
- B. LEFT JOIN ON Client.Key = Invoice.Key WHERE BY Invoice.Key IS NULL
- C. LEFT JOIN ON Client.Key = Invoice.Key
- D. INNER JOIN ON Client.Key = Invoice.Key

Answer: B

Explanation:

The join that is most appropriate for the analyst to use to create this database view is option D.

This join uses the LEFT JOIN clause to combine the client table and the invoice table based on the matching values in the Key column. The WHERE clause filters out the rows where the Invoice.Key column is not null, meaning that the client has made a purchase. The result is a view that shows only the clients who have not made any purchases yet. The other options either do not produce the desired result or have syntax errors. For example, option A would show only the clients who have made purchases, option B would show only the invoices that do not have a matching client, and option C would show all the clients regardless of their purchase status.

NEW QUESTION # 28

A database administrator wants to remove inactive customers from a database. Which of the following statements should the administrator use?

- A.

```
Begin Transaction Customer;
Delete from customer where customer_ID = 20;
Commit;
```

- B.

```
Update Transaction Customer;
Delete from customer where customer_ID = 20;
End;
```

- C.

```
Open Transaction Customer;
Delete from customer where customer_ID = 20;
Close Transaction;
```

- D.

```
While Transaction Customer;
Delete from customer where customer_ID = 20;
Catch;
```

Answer: B

Explanation:

The statement that the administrator should use to remove inactive customers from a database is option A. This statement uses the DELETE command to delete all the rows from the customer table where the status column is equal to 'inactive'. The other options either have syntax errors, use incorrect commands, or do not specify the condition correctly. Reference: CompTIA DataSys+ Course Outline, Domain 1.0 Database Fundamentals, Objective 1.2 Given a scenario, execute database tasks using scripting and

programming languages.

NEW QUESTION # 29

A DBA is reviewing the following logs to determine the current data backup plan for a primary data server:

Timestamp	Activity	Size	Duration
2023-Jan-23 23:59:00	Back up to disk	7.35GB	03:14:55
2023-Jan-24 23:59:00	Back up to disk	0.12GB	00:14:22
2023-Jan-25 23:59:00	Back up to disk	1.11GB	01:11:55
2023-Jan-26 23:59:00	Back up to disk	1.23GB	01:22:12
2023-Jan-27 23:59:00	Back up to disk	1.22GB	01:19:56
2023-Jan-28 23:59:00	Back up to disk	1.21GB	01:17:19
2023-Jan-29 23:59:00	Back up to disk	0.94GB	01:01:29
2023-Jan-30 23:59:00	Back up to disk	8.1GB	03:45:66

Which of the following best describes this backup plan?

- A. Monthly full, daily differential
- B. Daily full
- C. Weekly full, daily incremental
- D. Daily differential

Answer: C

Explanation:

The backup plan that best describes the logs is weekly full, daily incremental. This means that a full backup of the entire database is performed once a week, and then only the changes made since the last backup are backed up every day. This can be inferred from the logs by looking at the size and duration of the backups. The full backups are larger and take longer than the incremental backups, and they occur every seven days. The other backup plans do not match the pattern of the logs.

NEW QUESTION # 30

Which of the following are the best resources for monitoring potential server issues? (Choose two.)

- A. Query execution
- B. CPU usage
- C. User connections
- D. Memory usage
- E. Index usage
- F. Firewall usage

Answer: B,D

Explanation:

The two resources that are best for monitoring potential server issues are CPU usage and memory usage. CPU usage is the percentage of time that the processor (CPU) of the server is busy executing instructions or processes. CPU usage indicates how much workload the server can handle and how fast it can process requests. High CPU usage may affect the performance or availability of the server and cause delays or errors. Memory usage is the amount of physical memory (RAM) or virtual memory (swap space) that the server uses to store data or run applications. Memory usage indicates how much space the server has to store temporary or intermediate data or results. High memory usage may affect the performance or availability of the server and cause swapping or paging. The other options are either not relevant or not direct indicators of server health. For example, user connections are the number of users who are connected to a database server at any given time; firewall usage is the amount of data that passes through a firewall device or software; index usage is the frequency or efficiency of using indexes on tables to speed up queries; query execution is the process of running SQL statements on a database server. Reference: CompTIA DataSys+ Course Outline, Domain 3.0 Database Management and Maintenance, Objective 3.2 Given a scenario, monitor database performance.

NEW QUESTION # 31

.....

The free demo DS0-001 practice question is available for instant download. Download the CompTIA DS0-001 exam dumps demo free of cost and explores the top features of CompTIA DS0-001 Exam Questions and if you feel that the CompTIA DataSys+ Certification Exam exam questions can be helpful in DS0-001 exam preparation then take your buying decision.
