

# 無與倫比的Palo Alto Networks NGFW-Engineer: Palo Alto Networks Next-Generation Firewall Engineer題庫分享 -權威的VCESoft最新NGFW-Engineer考題

Your Guide to the Palo Alto Networks Next-Generation Firewall Engineer Certification: Skills, Scope, and Success

P.S. VCESoft在Google Drive上分享了免費的2026 Palo Alto Networks NGFW-Engineer考試題庫：<https://drive.google.com/open?id=1VBnHJ-uHAVlfAls4mGApOAskiT3BJWc3>

有了VCESoft的NGFW-Engineer考古題，即使你只用很短的時間來準備考試，你也可以順利通過考試。因為VCESoft的考古題包含了在實際考試中可能出現的所有問題，所以你只需要記住NGFW-Engineer考古題裏面出現的問題和答案，你就可以輕鬆通過考試。這是通過考試最快的捷徑了。如果你工作很忙實在沒有時間準備考試，但是又想取得NGFW-Engineer的認證資格，那麼，你絕對不能錯過VCESoft的NGFW-Engineer考古題。因為這是你通過考試的最好的，也是唯一的方法。

用最放鬆的心態面對一切艱難。Palo Alto Networks的NGFW-Engineer考試雖然很艱難，但我們考生要用最放鬆的心態來面對一切艱難，因為VCESoft Palo Alto Networks的NGFW-Engineer考試培訓資料會幫助我們順利通過考試，有了它我們就不會害怕，不會迷茫。VCESoft Palo Alto Networks的NGFW-Engineer考試培訓資料是我們考生的最佳良藥。

>> NGFW-Engineer題庫分享 <<

## 有用的NGFW-Engineer題庫分享和資格考試中的領先提供者和一流的最新NGFW-Engineer考題

對於VCESoft最近更新的Palo Alto Networks NGFW-Engineer考古題，我們知道，只有有效和最新的NGFW-Engineer題庫可以幫助大家通過考試，這是由眾多考生證明過的事實。請嘗試Palo Alto Networks NGFW-Engineer考古題最新的PDF和APP版本的題庫，由專家認證並覆蓋考試各個方面，能充分有效的幫助您補充相關的NGFW-Engineer考試知識點。不放棄下一秒就是希望，趕緊抓住您的希望吧，選擇NGFW-Engineer考古題，助您順利通過考試！

## 最新的 Network Security Administrator NGFW-Engineer 免費考試真題 (Q62-Q67):

### 問題 #62

When integrating Kubernetes with Palo Alto Networks NGFWs, what is used to secure traffic between microservices?

- A. Ansible automation modules
- B. CN-Series firewalls
- C. Panorama role-based access control
- D. Service graph

答案: B

解題說明:

When integrating Kubernetes with Palo Alto Networks NGFWs, the CN-Series firewalls are specifically designed to secure traffic between microservices in containerized environments. These firewalls provide advanced security features like Application Identification (App-ID), URL filtering, and Threat Prevention to secure communication between containers and microservices within a Kubernetes environment.

### 問題 #63

An network engineer is configuring SSL Forward Proxy decryption on a Palo Alto Networks firewall. The company's internal clients trust a corporate root certificate authority (CA). To ensure the firewall can properly validate the certificates of external web servers, the engineer must configure a specific component. Which component defines the mechanism for Online Certificate Status Protocol (OCSP) / certificate revocation list (CRL) status?

- A. Certificate revocation checking
- B. Forward trust certificate
- C. **Decryption profile**
- D. SSL/TLS service profile

答案: C

#### 解題說明:

In a Palo Alto Networks SSL Forward Proxy deployment, the Decryption Profile is the primary policy component used to control how the firewall handles various technical aspects of the decryption process. While the SSL Forward Proxy itself uses a Forward Trust Certificate to resign certificates for the client, the firewall must first perform its own due diligence on the server-side certificate received from the external web server.

The Decryption Profile allows the administrator to define granular security checks for the session.

Specifically, within the SSL Decryption Settings tab of the profile, there are options for "Certificate Revocation Checking." Here, the engineer can enable and define how the firewall performs Online Certificate Status Protocol (OCSP) and Certificate Revocation List (CRL) checks. These mechanisms are used to verify that the external server's certificate has not been revoked by its issuing CA before the firewall proceeds with the decryption and re-signing process.

Failure to configure these settings within the Decryption Profile would mean the firewall might trust and proxy a connection to an external site that has a technically valid but revoked certificate, creating a significant security hole. Unlike an SSL/TLS Service Profile (which is used for traffic terminating at the firewall) or the Forward Trust Certificate (used for the client-side trust), the Decryption Profile specifically dictates the validation behavior for outgoing proxied sessions.

### 問題 #64

Which PAN-OS method of mapping users to IP addresses is the most reliable?

- A. Server monitoring
- B. Port mapping
- C. **GlobalProtect**
- D. Syslog

答案: C

#### 解題說明:

GlobalProtect provides accurate, timely mappings by requiring user authentication on network changes, device posture shifts, or logon events, using both internal and external gateways for comprehensive coverage across remote and on-premises users without relying on external agents or syslog delays.

### 問題 #65

A firewall administrator uses Panorama to manage a fleet of firewalls. After successfully onboarding the firewalls to Strata Logging Service and enabling cloud logging via a template, the security operations team reports that they can no longer see new logs on the on-premises Panorama log collectors. Logs are appearing correctly in Strata Logging Service. Which setting was likely missed in the Panorama template configuration?

- A. The Log Forwarding profile was modified to send logs only to the Strata Logging Service and no longer includes the on-premises Panorama log collectors.
- B. The Panorama log collectors were not defined as primary destinations within the collector group configuration for the

managed firewalls.

- C. Duplicate logging (cloud and on-premises) is disabled under Device # Setup # Management.
- D. The device certificates for the Panorama log collectors were not renewed after enabling the cloud logging connection.

答案：C

解題說明：

When integrating Strata Logging Service (formerly Cortex Data Lake) into a managed environment, Panorama-managed firewalls change their default logging behavior. By default, once a firewall is configured to send logs to the Strata Logging Service, it assumes the cloud is the primary destination. If an administrator wishes to maintain visibility on local, on-premises Panorama log collectors simultaneously, they must explicitly enable a specific setting.

The setting is located under Device # Setup # Management # Logging and Storage Settings. Specifically, there is an option to "Send logs to both Panorama and Strata Logging Service" (or similar wording depending on the PAN-OS version, often referred to as duplicate logging). If this checkbox is not enabled within the Template or Template Stack pushed to the managed firewalls, the firewall will favor the cloud destination and cease sending logs to the on-premises Log Collector.

While a Log Forwarding Profile (Option C) determines which logs are sent (e.g., security, threat, traffic), the underlying transport mechanism to Panorama is governed by the Device Setup. If the firewalls were previously logging to Panorama correctly and the only change was the addition of Strata Logging Service, the

"Log to both" toggle is the most probable missing component. This ensures that the firewall's log forwarding process forks the data to both the cloud infrastructure and the local collector group infrastructure.

問題 #66

To maintain security efficacy of its public cloud resources by using native tools, a company purchases Cloud NGFW credits to replicate the Panorama, PA-Series, and VM-Series devices used in physical data centers. Resources exist on AWS and Azure. The AWS deployment is architected with AWS Transit Gateway, to which all resources connect. The Azure deployment is architected with each application independently routing traffic. The engineer deploying Cloud NGFW in these two cloud environments must account for the following:

Minimize changes to the two cloud environments

Scale to the demands of the applications while using the least amount of compute resources. Allow the company to unify the security policies across all protected areas. Which two implementations will meet these requirements? (Choose two.)

- A. Deploy a VM-Series firewall in AWS in each VPC, create an IPSec tunnel between AWS and Azure, and manage the policy with Panorama.
- B. Deploy Cloud NGFW for Azure in vWAN, create a vWAN to route all appropriate traffic to the Cloud NGFW attached to the vWAN, and manage the policy with local rules.
- C. Deploy Cloud NGFW for Azure in vNET/s, update the vNET/s routing to path traffic through the deployed NGFWs, and manage the policy with Panorama.
- D. Deploy Cloud NGFW for AWS in a centralized Security VPC, update the Transit Gateway to route all appropriate traffic through the Security VPC, and manage the policy with Panorama.

答案：C,D

解題說明：

To meet the company's requirements - minimizing changes to the cloud environments, optimizing compute resources, and unifying security policies - the best approach is to deploy Cloud NGFW solutions natively for AWS and Azure while managing policies centrally with Panorama.

In Azure, using Cloud NGFW for Azure deployed within vNETs allows traffic to be routed through security appliances efficiently without requiring a complete re-architecture. This approach aligns with Azure's existing routing mechanism while maintaining security. In AWS, deploying Cloud NGFW for AWS in a centralized Security VPC and integrating it with AWS Transit Gateway enables traffic inspection for all connected VPCs without modifying individual workloads. This method ensures efficient scaling and minimal infrastructure changes while maintaining security consistency.

問題 #67

.....

想獲得Palo Alto Networks NGFW-Engineer認證，就來VCESoft網站！為您提供最好的學習資料，讓您不僅可以通過NGFW-Engineer考試，還可以在短時間內獲得良好的成績。我們已經幫助很多的考生順利順利通過NGFW-Engineer考試，獲取證書，這是一個難得的機會。現在，購買Palo Alto Networks NGFW-Engineer題庫之後，您的郵箱會收到我們的郵件，您可以及時下載您購買的NGFW-Engineer題庫並訪問，這樣可以全面地了解詳細的考試試題以及答

案。

最新NGFW-Engineer考題：<https://www.vcesoft.com/NGFW-Engineer-pdf.html>

VCESoft有專業的IT人員針對 Palo Alto Networks NGFW-Engineer 認證考試的考試練習題和答案做研究，他們能為你考試提供很有效的培訓工具和線上服務，因為他們提供的關於Palo Alto Networks NGFW-Engineer 認證考試資料都比較寬泛，不具有針對性，所以吸引不了考生的注意力，如果您覺得NGFW-Engineer考試題庫和題庫demo真的很棒，想嘗試通過您Palo Alto Networks Next-Generation Firewall Engineer考試，下一出步驟是購買并支付它在Kaogut網站，如果你購買了我們的 Palo Alto Networks NGFW-Engineer 考古題資料，我們將會給你提供最好的服務和最優質的產品，我們的 NGFW-Engineer 認證考試軟件已經取得了廠商和第三方的授權，是由IT專業的技術專家根據客戶的需求研發出的一系列認證考試產品，以保證客戶的最大需求，NGFW-Engineer - Palo Alto Networks Next-Generation Firewall Engineer 考試認證資料具有最高的專業技術含量，可以作為相關知識的專家和學者學習和研究之用，我們提供所有的產品都有部分免費試用，在你購買之前以保證你考試的品質及適用性，當下，大多數人學習NGFW-Engineer都會選擇從教科書入手。

用自己的力道和內功壓制吧，沈凝兒、公孫流雲和許夫人見寧小堂沒動，三人自然也沒有躲避，VCESoft有專業的IT人員針對 Palo Alto Networks NGFW-Engineer 認證考試的考試練習題和答案做研究，他們能為你考試提供很有效的培訓工具和線上服務。

## 最新NGFW-Engineer題庫分享 - 全部位於VCESoft

因為他們提供的關於Palo Alto Networks NGFW-Engineer 認證考試資料都比較寬泛，不具有針對性，所以吸引不了考生的注意力，如果您覺得NGFW-Engineer考試題庫和題庫demo真的很棒，想嘗試通過您Palo Alto Networks Next-Generation Firewall Engineer考試，下一出步驟是購買并支付它在Kaogut網站。

如果你購買了我們的 Palo Alto Networks NGFW-Engineer 考古題資料，我們將會給你提供最好的服務和最優質的產品，我們的 NGFW-Engineer 認證考試軟件已經取得了廠商和第三方的授權，是由IT專業的技術專家根據客戶的需求研發出的一系列認證考試產品，以保證客戶的最大需求，NGFW-Engineer - Palo Alto Networks Next-Generation Firewall Engineer 考試認證資料具有最高的專業技術含量，可以作為相關知識的專家和學者學習和研究之用，我們提供所有的產品都有部分免費試用，在你購買之前以保證你考試的品質及適用性。

當下，大多數人學習NGFW-Engineer都會選擇從教科書入手。
