

Free Download Network Appliance PDF NS0-528 Cram Exam With Interactive Test Engine & High-quality Test Certification NS0-528 Cost

DOWNLOAD the newest TrainingDump NS0-528 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1ZouS1faQUqz9H0n8jIEpqP12FU1ukrF7>

We have free demo for NS0-528 learning materials, we recommend you to have a try before buying, so that you can have a deeper understanding of what you are going to buy. In addition, NS0-528 exam dumps contain both questions and answers, they will be enough for you to pass your exam and get the certificate successfully. In order to build up your confidence for NS0-528 Learning Materials, we are pass guarantee and money back guarantee if you fail to pass the exam, and the money will be returned to your payment account.

Candidates all around the globe use their full potential only to get Network Appliance NS0-528 certification. Once the candidate is a Network Appliance certified, he gets multiple good career opportunities in the Network Appliance sector. To pass the NS0-528 Certification Exam a candidate needs to be updated and reliable Implementation Engineer - Data Protection Exam (NS0-528) prep material. There is a ton of NS0-528 prep material available on the internet.

Pass Guaranteed Quiz 2026 Network Appliance NS0-528: Implementation Engineer - Data Protection Exam Fantastic PDF Cram Exam

TrainingDump also offers a demo version of the Network Appliance NS0-528 exam dumps for free. This way you can easily evaluate the validity of the NS0-528 prep material before buying it. Downloading a free demo will remove your doubts about purchasing the Network Appliance NS0-528 Questions.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.
Topic 2	Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.

Topic 3	• Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 4	• NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.
Topic 5	• NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q132-Q137):

NEW QUESTION # 132

You have deployed a 4-node fabric MetroCluster configuration for cross-site disaster-recovery protection. In this scenario, which two statements are correct for an automatic unplanned switchover (AUSO) operation? (Choose two.)

- A. AUSO is triggered in the event of a site-wide controller failure to provide nondisruptive operations.
- B. AUSO is enabled by default on a MetroCluster cluster.
- C. AUSO is triggered in the event of a site-wide switch failure to provide nondisruptive operations.
- D. AUSO is triggered in the event of a complete site-wide failure to provide nondisruptive operations.

Answer: A,B

NEW QUESTION # 133

You are asked to implement a NetApp solution that has high availability with transparent failover between two data centers. Which two solutions satisfy this requirement? (Choose two.)

- A. MetroCluster
- B. ONTAP Select
- C. SnapVault
- D. SnapMirror Sync

Answer: A,C

NEW QUESTION # 134

You need to protect an entire SVM and all of its data volumes and have decided to use SnapMirror SVM. The DR cluster uses a different subnet from the production cluster, and the destination SVM has the added requirement of also being online and serving data as read-only.

What option would you set to achieve both goals?

- A. Use the -identity-preserve option set to false in the snapmirror create command.
- B. Set the -type option to automated-failover in the applied snapmirror policy.
- C. Use the -identity-preserve option set to true in the snapmirror create command.
- D. Set the -discard-configs option to network in the applied snapmirror policy.

Answer: A

Explanation:

Setting -identity-preserve false allows the destination SVM to have a different network configuration, which is required since the DR

site uses a different subnet. It also enables the destination SVM to be online and serve data in read-only mode, which meets the requirement for data availability during normal operation without promoting the SVM.

NEW QUESTION # 135

A FAS2750 cluster administrator experiences network issues during replication updates that pass over a low- bandwidth WAN link to their DR site. They also replicate locally to another cluster for testing and development. The administrator wants to enable network compression only on the existing WAN Link SnapMirror jobs.

In this scenario, which statement is correct?

- A. Network compression must be enabled when initializing the replica, the current jobs need to be deleted and new ones created.
- B. Network compression is a global option and it cannot be used.
- C. The current DR transfers must be aborted and the option enabled on each job, then resume the transfer.
- D. Network compression is possible but not on a FAS2750.

Answer: C

NEW QUESTION # 136

You are planning to deploy MetroCluster IP. As part of the implementation strategy, you are asked to verify that you have the relevant hardware for the deployment.

Which two elements are required to deploy your solution? (Choose two.)

- A. cluster peering network
- B. FC network switches
- C. storage controllers
- D. iSCSI Ethernet switches

Answer: A,D

NEW QUESTION # 137

.....

Going through our Network Appliance NS0-528 certification exam prep material there remains no chance of failure in the Network Appliance exam. So do not waste your time anymore, avail the best Network Appliance NS0-528 Exam Practice material and start your journey towards a bright career.
