

D-PVM-OE-01 Reliable Exam Bootcamp & D-PVM-OE-01 Valid Study Notes

BTW, DOWNLOAD part of BraindumpsVCE D-PVM-OE-01 dumps from Cloud Storage: <https://drive.google.com/open?id=12nJAg2y0xlMvty0zylfa8m-r6Xgb0oKy>

What you can get from the D-PVM-OE-01 certification? Of course, you can get a lot of opportunities to enter to the bigger companies. After you get more opportunities, you can make full use of your talents. You will also get more salary, and then you can provide a better life for yourself and your family. D-PVM-OE-01 Exam Preparation is really good helper on your life path. Quickly purchase D-PVM-OE-01 study guide and go to the top of your life!

EMC D-PVM-OE-01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">PowerMax Family Business Continuity Administration: This section of the exam measures the skills of Disaster Recovery Engineers and focuses on replication technologies used for business continuity. Candidates must perform SnapVX and Clone operations using Unisphere for PowerMax and understand Symmetrix Remote Data Facility (SRDF) replication. They must also execute SRDF operations using Unisphere and SYMCLI.
Topic 2	<ul style="list-style-type: none">Unisphere for PowerMax 10 Implementation and Administration: This section of the exam measures the skills of System Administrators and covers the implementation and management of Unisphere for PowerMax. Candidates must understand the installation process, post-installation tasks, and interface navigation to efficiently operate the platform. One key skill evaluated is setting up Unisphere for PowerMax.
Topic 3	<ul style="list-style-type: none">Solutions Enabler 10 Implementation: This section of the exam measures the skills of Infrastructure Engineers and focuses on the fundamentals of Solutions Enabler. Candidates must understand its installation, upgrade processes, gatekeeper management, and daemon functions across different platforms. One crucial skill tested is managing Solutions Enabler daemons.
Topic 4	<ul style="list-style-type: none">PowerMax Family Local and Remote Replication Concepts: This section of the exam measures the skills of Backup and Recovery Specialists and covers the features and functionalities of TimeFinder SnapVX. Candidates must differentiate between SnapVX snapshots and clones while understanding their role in data protection. One key skill assessed is comparing the use cases of snapshots and clones.

D-PVM-OE-01 Valid Study Notes - Customizable D-PVM-OE-01 Exam Mode

BraindumpsVCE never hits its customers with any kind of scam instead they are offered with 100% authentic products for EMC D-PVM-OE-01 exam preparation. It is our honor to serve you with ever best offering and delivering the core values for your spent pennies. Failure is unusual with D-PVM-OE-01 training but if any misfortune leads you towards failure, no issues for financial loss. BraindumpsVCE will repay you all the charges that you have paid for our D-PVM-OE-01 exam products.

EMC Dell Technologies PowerMax Operate Sample Questions (Q20-Q25):

NEW QUESTION # 20

A systems administrator no longer needs the remote replica of a local device. Which step can be performed first in order to perform the deletepair function?

- A. Split the SRDF link
- B. Change the pair state to "NR"
- C. Suspend the SRDF link
- D. Change the type of the group to "regular"

Answer: C

NEW QUESTION # 21

Place the steps to set Host Flags using the Create Host wizard in the correct order

Answer:

Explanation:

Explanation:

Here's the correct sequence of actions, along with explanations:

Correct Order:

* Select the Hosts > Hosts menu option.

* Why: This is the initial navigation step within Unisphere. You need to go to the "Hosts" section where you can manage and configure host connections to the PowerMax array.

* Navigate to the storage array to be configured.

* Why: In an environment with multiple PowerMax arrays, you need to select the specific array for which you want to configure host settings.

* Click the Create button.

* Why: This initiates the "Create Host" wizard, which will guide you through the process of adding a new host and configuring its settings, including the host flags.

* Click the Set Host Flags button to override or enable any port flag settings.

* Why: Within the Create Host wizard, you'll reach a point where you can configure host flags.

Clicking the "Set Host Flags" button allows you to modify these flags.

* Host Flags: These flags are settings that define how the PowerMax array interacts with the host.

They control things like:

* SCSI support: Different variations of SCSI protocols.

* High availability: Features like auto-negotiation of failover.

* Other host-specific behaviors.

* Select the Hosts > Hosts menu option.

* Navigate to the storage array to be configured.

* Click the Create button.

* Click the Set Host Flags button to override or enable any port flag settings.

NEW QUESTION # 22

Which VMAX All Flash software package includes Non-Disruptive Migration?

- A. AppSync Starter
- B. Pro
- C. Essentials
- D. FX

Answer: D

Explanation:

https://visiondatacenter.com/products/DELLEMC_VMAX450F/vmax-software-datasheet.pdf

NEW QUESTION # 23

From an application perspective, what should be done before performing an SRDF/S Restore operation?

- A. Continue accessing the R1 devices Stop accessing the R2 devices.
- B. Continue accessing the R1 and R2 devices
- C. Stop accessing the R1 devices Continue accessing the R2 devices
- **D. Stop accessing the R1 and R2 devices.**

Answer: D

Explanation:

Step by Step Comprehensive Detailed Explanation:

Before performing an SRDF/S (synchronous) Restore operation, it is crucial to stop all host I/O activity to both the R1 (source) and R2 (target) devices. This ensures data consistency and prevents potential data loss or corruption during the restore process.

Here's why:

* **Data Integrity:** An SRDF/S Restore operation involves copying data from the R1 device to the R2 device, overwriting any existing data on R2. If hosts are actively accessing and modifying data on either device during this process, it can lead to inconsistencies and data integrity issues.

* **Synchronization:** SRDF/S maintains real-time synchronization between the R1 and R2 devices.

Performing a Restore operation while hosts are writing data can disrupt this synchronization and lead to unpredictable results.

Why other options are incorrect:

* **A. Continue accessing the R1 devices. Stop accessing the R2 devices:** This would leave R1 vulnerable to data inconsistencies.

* **B. Stop accessing the R1 devices. Continue accessing the R2 devices:** This would make R2 susceptible to data loss or corruption.

* **D. Continue accessing the R1 and R2 devices:** This is the most dangerous option, as it would likely lead to data integrity issues.

References and documents of Dell's public documentation for PowerMax Operate v.2:

* **Dell Solutions Enabler 10.0.0 SRDF Family CLI User Guide:** This guide provides detailed information about SRDF operations, including Restore. It emphasizes the importance of halting host I

/O before performing such operations to ensure data consistency. You can find this document on the Dell Support website by searching for "Solutions Enabler SRDF Family CLI User Guide."

* **Dell PowerMax Family: Essentials and Best Practices Guide:** This guide may offer general information about SRDF management and best practices, which would include recommendations for performing operations like Restore safely.

NEW QUESTION # 24

Which operation is used to perform Open Replicator migrations with minimal application down time?

- **A. Hot pull**
- B. Cold push
- C. Hot push
- D. Cold pull

Answer: A

NEW QUESTION # 25

.....

In today's society, the number of college students has grown rapidly. Everyone has their own characteristics. How do you stand out? Obtaining D-PVM-OE-01 certification is a very good choice. Our D-PVM-OE-01 study materials can help you pass test faster. You can take advantage of the certification. Many people improve their ability to perform more efficiently in their daily work with the help of our D-PVM-OE-01 Exam Questions and you can be as good as they are.
