

Oracle 1Z0-1127-25 Convenient PDF Format

BTW, DOWNLOAD part of ExamCost 1Z0-1127-25 dumps from Cloud Storage: https://drive.google.com/open?id=1Vvz2l-J0KoVQG2x_AGE-mFllutayVrd

The price of Our 1Z0-1127-25 exam questions is affordable and we provide the wonderful service before and after the sale to let you have a good understanding of our 1Z0-1127-25 study materials before your purchase and convenient download procedures in case you want to have a check on the 1Z0-1127-25 test. We have free demo on the web for you to know the content of our 1Z0-1127-25 learning guide. Once you have a try on our 1Z0-1127-25 training prep, you will know that our 1Z0-1127-25 practice engine contains the most detailed information for your 1Z0-1127-25 exam.

Are you ready to take your career to the next level with the Oracle Cloud Infrastructure 2025 Generative AI Professional (1Z0-1127-25)? Look no further than ExamCost for all of your 1Z0-1127-25 exam needs. Our comprehensive and cost-effective solution includes regularly updated Oracle 1Z0-1127-25 Exam Questions, available in a convenient PDF format that can be downloaded on any device, including PC, laptop, mac, tablet, and smartphone.

>> 1Z0-1127-25 Reliable Exam Papers <<

100% Pass Quiz 1Z0-1127-25 - Latest Oracle Cloud Infrastructure 2025 Generative AI Professional Reliable Exam Papers

Oracle 1Z0-1127-25 dumps PDF version is printable and embedded with valid Oracle 1Z0-1127-25 questions to help you get ready for the 1Z0-1127-25 exam quickly. Oracle Cloud Infrastructure 2025 Generative AI Professional (1Z0-1127-25) exam dumps pdf are also usable on several smart devices. You can use it anywhere at any time on your smartphones and tablets. We update our Oracle 1Z0-1127-25 Exam Questions bank regularly to match the changes and improve the quality of 1Z0-1127-25

questions so you can get a better experience.

Oracle Cloud Infrastructure 2025 Generative AI Professional Sample Questions (Q83-Q88):

NEW QUESTION # 83

Which component of Retrieval-Augmented Generation (RAG) evaluates and prioritizes the information retrieved by the retrieval system?

- A. Encoder-Decoder
- B. Generator
- C. Retriever
- **D. Ranker**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation=

In RAG, the Ranker evaluates and prioritizes retrieved information (e.g., documents) based on relevance to the query, refining what the Retriever fetches-Option D is correct. The Retriever (A) fetches data, not ranks it. Encoder-Decoder (B) isn't a distinct RAG component-it's part of the LLM. The Generator (C) produces text, not prioritizes. Ranking ensures high-quality inputs for generation.

OCI 2025 Generative AI documentation likely details the Ranker under RAG pipeline components.

NEW QUESTION # 84

What is LangChain?

- A. A Java library for text summarization
- B. A Ruby library for text generation
- C. A JavaScript library for natural language processing
- **D. A Python library for building applications with Large Language Models**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation=

LangChain is a Python library designed to simplify building applications with LLMs by providing tools for chaining operations, managing memory, and integrating external data (e.g., via RAG). This makes Option B correct. Options A, C, and D are incorrect, as LangChain is neither JavaScript, Java, nor Ruby-based, nor limited to summarization or generation alone-it's broader in scope. It's widely used for LLM-powered apps.

OCI 2025 Generative AI documentation likely introduces LangChain under supported frameworks.

NEW QUESTION # 85

In which scenario is soft prompting especially appropriate compared to other training styles?

- **A. When there is a need to add learnable parameters to a Large Language Model (LLM) without task-specific training.**
- B. When the model needs to be adapted to perform well in a different domain it was not originally trained on.
- C. When the model requires continued pre-training on unlabeled data.
- D. When there is a significant amount of labeled, task-specific data available.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation=

Soft prompting (e.g., prompt tuning) involves adding trainable parameters (soft prompts) to an LLM's input while keeping the model's weights frozen, adapting it to tasks without task-specific retraining. This is efficient when fine-tuning or large datasets aren't feasible, making Option C correct. Option A suits full fine-tuning, not soft prompting, which avoids extensive labeled data needs. Option B could apply, but domain adaptation often requires more than soft prompting (e.g., fine-tuning). Option D describes continued pretraining, not soft prompting. Soft prompting excels in low-resource customization.

OCI 2025 Generative AI documentation likely discusses soft prompting under parameter-efficient methods.

NEW QUESTION # 86

In which scenario is soft prompting appropriate compared to other training styles?

- A. When the model needs to be adapted to perform well in a domain on which it was not originally trained
- B. When there is a significant amount of labeled, task-specific data available
- **C. When there is a need to add learnable parameters to a Large Language Model (LLM) without task-specific training**
- D. When the model requires continued pretraining on unlabeled data

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation=

Soft prompting adds trainable parameters (soft prompts) to adapt an LLM without retraining its core weights, ideal for low-resource customization without task-specific data. This makes Option C correct. Option A suits fine-tuning. Option B may require more than soft prompting (e.g., domain fine-tuning). Option D describes pretraining, not soft prompting. Soft prompting is efficient for specific adaptations.

OCI 2025 Generative AI documentation likely discusses soft prompting under PEFT methods.

NEW QUESTION # 87

Which LangChain component is responsible for generating the linguistic output in a chatbot system?

- A. Vector Stores
- B. Document Loaders
- C. LangChain Application
- **D. LLMs**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation=

In LangChain, LLMs (Large Language Models) generate the linguistic output (text responses) in a chatbot system, leveraging their pre-trained capabilities. This makes Option D correct. Option A (Document Loaders) ingests data, not generates text. Option B (Vector Stores) manages embeddings for retrieval, not generation. Option C (LangChain Application) is too vague-it's the system, not a specific component. LLMs are the core text-producing engine.

OCI 2025 Generative AI documentation likely identifies LLMs as the generation component in LangChain.

NEW QUESTION # 88

.....

In order to ensure that the examinees in the 1Z0-1127-25 exam certification make good achievements, our ExamCost has always been trying our best. With efforts for years, the passing rate of ExamCost's 1Z0-1127-25 certification exam has reached as high as 100%. After you purchase our 1Z0-1127-25 Exam Training materials, if there is any quality problem or you fail 1Z0-1127-25 exam certification, we promise to give a full refund unconditionally.
