

JN0-460 Latest Demo - Demo JN0-460 Test

AUTHORIZE DUMPS

P.S. Free & New JN0-460 dumps are available on Google Drive shared by Dupleader: <https://drive.google.com/open?id=1HS1X5qqURtxNDErk64SwRjtWeVGhGRav>

The real and updated Dupleader JN0-460 exam dumps file, desktop practice test software, and web-based practice test software are ready for download. Take the best decision of your professional career and enroll in the Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) certification exam and download Dupleader Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam questions and starts preparing today.

Will you feel nervous in the exam? If you do, just choose us, our JN0-460 Soft test engine can stimulate the real exam environment, which will help you know the procedure of the exam, and will strengthen your confidence. Moreover JN0-460 exam dumps are high-quality, and we have professional experts to compile them, and they can help you pass the exam just one time. We offer you free demo to have a try for JN0-460 Exam Dumps, and free update for one year. If you indeed have questions, just contact with us.

Demo JN0-460 Test | JN0-460 Exam Questions Fee

To make your job easy, Dupleader proudly announces that our users can gain a free-of-cost Juniper JN0-460 demo of all three available formats for JN0-460 Exam Questions. It will allow you to check out the standard of JN0-460 Practice Exam material. You will not be disappointed to see the quality of the product.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 2	Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 3	Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
Topic 4	Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 5	Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q33-Q38):

NEW QUESTION # 33

In the context of wired assurance, what role do templates play?

- A. Expanding the wireless coverage
- **B. Standardizing device configurations**
- C. Encrypting network traffic
- D. Increasing the network's bandwidth

Answer: B

NEW QUESTION # 34

Which statement is correct about the VXLAN data plane?

- A. The data plane advertises the MAC addresses of end-user devices.
- **B. The data plane encapsulates the traffic.**
- C. The data plane learns the IP addresses of end-user devices.
- D. The data plane learns the MAC addresses of end-user devices.

Answer: B

Explanation:

VXLAN (Virtual Extensible LAN) uses an overlay encapsulation method to carry Layer-2 frames over an IP underlay. This functionality is part of the data plane, which is responsible for packet forwarding and encapsulation/decapsulation.

"In an EVPN-VXLAN fabric, the control plane (via BGP EVPN) learns and advertises MAC and IP information, while the data plane encapsulates and forwards traffic using VXLAN tunnels between VTEPs." Option A is incorrect: IP learning happens in the control plane, not the data plane.

Option B is incorrect: MAC advertisement is done in the control plane through EVPN route types.

Option D is incorrect: MAC learning is handled by EVPN control plane, not the VXLAN data plane.

Option C is correct: the VXLAN data plane encapsulates the traffic in UDP tunnels between VTEPs.

NEW QUESTION # 35

Which of the following are key components in the provisioning process for wired assurance?

- A. Configuration options
- B. End-user training
- C. Site variables
- D. Templates
- E. Physical hardware installation

Answer: A,C,D

NEW QUESTION # 36

You are asked to configure switch ports to VLANs depending on which type of device is connected to it. Which Mist feature will accomplish this task?

- A. dynamic port configuration
- B. select switch configuration
- C. bulk upload of switch configuration
- D. site variables

Answer: A

NEW QUESTION # 37

Which two statements are correct about switch adoption?(Choose two.)

- A. Brownfield switch adoption requires manual adoption and is used for switches that do not have a claim or activation code.
- B. Switch adoption requires Mist AP.
- C. Switch adoption uses SSH over TCP port 443.
- D. Greenfield switch adoption requires cloud-enabled switches with a claim or activation code.

Answer: A,D

Explanation:

In Juniper Mist, Greenfield adoption applies to new, cloud-ready switches (such as EX4100, EX4400, and QFX series) using a claim or activation code to securely connect to the Mist cloud.

Brownfield adoption, however, supports switches already deployed or not factory-fresh. These are manually onboarded by configuring outbound management connectivity and adopting them through the Mist portal.

This distinction enables both new and legacy EX/QFX environments to be cloud-managed under Wired Assurance.

NEW QUESTION # 38

.....

The Juniper JN0-460 certification exam is one of the hottest and career-oriented Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exams. With the Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam you can validate your skills and upgrade your knowledge level. By doing this you can learn new in-demand skills and gain multiple career opportunities. To do this you just need to enroll in the Juniper JN0-460 Certification Exam and put all your efforts to pass this important Juniper JN0-460 Exam Questions.
