Die SAP C_S4CPB_2508 Prüfungsunterlagen von DeutschPrüfung werden von erfahrenen IT-Profis herstellt und immer wieder aktualisiert. Jetzt können Sie mit günstigem Preis die verlässliche SAP C_S4CPB_2508 Prüfungsunterlagen genießen. Nachdem Sie die Zertifizierung erworbt haben, können Sie leicht eine höhere Arbeitsposition oder Gehalten bekommen.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition C_S4CPB_2508 Prüfungsfragen mit Lösungen (Q37-Q42):

37. Frage

Which of the following is SAP's recommended Human Capital Management system (HCM)?

- A. SAP Fieldglass
- B. SAP Concur
- C. SAP Ariba
- **D. SAP SuccessFactors**

Antwort: D

Begründung:

SAP SuccessFactors is SAP's recommended Human Capital Management system (HCM) because it provides innovative and cloud-based solutions to address the critical workforce transformation needs of organizations.

SAP SuccessFactors supports the next evolution of HCM, which is human experience management (HXM), by putting people at the center of everything and creating AI-powered experiences that drive real competitive advantage. SAP SuccessFactors also integrates with SAP S/4HANA Cloud and other SAP solutions to enable a seamless and connected business process across the enterprise. 38. Frage

Which of the following requirements need to be documented in SAP Cloud ALM during the Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. A configuration value
- **B. A business logic enhancement**
- C. A process flow diagram
- **D. An SAP Fiori app customization**

Antwort: B,D

39. Frage

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- **A. Use the search function to find the app.**
- B. Create a page and assign it to the launchpad space.
- C. Assign a different business role that provides access.
- D. Assign a launchpad space to the business role.

Antwort: A

Begründung:

When an end user has been assigned a business role that grants access to only one specific application, and the app does not appear on the user's SAP Fiori Launchpad, the recommended action for the user is:

* Use the search function to find the app: The search function on the SAP Fiori Launchpad allows users to locate applications by their name or related keywords. Even if the app is not immediately visible on the launchpad due to configuration issues or other reasons, using the search function can help the user access the app directly. This is a quick and effective way for users to access

necessary applications when they encounter visibility issues on their launchpad.

40. Frage

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Green Token
- B. SAP Responsible Design and Production
- C. SAP Sustainability Control Tower
- D. SAP Sustainability Footprint Management

Antwort: C

Begründung:

SAP Sustainability Control Tower is a cloud-based solution that enables customers to record, report, and act on their ESG data. It provides a comprehensive and consistent view of the ESG performance across the enterprise and the value chain. It also supports automated, auditable, and compliant reporting based on global standards and frameworks. SAP Sustainability Control Tower helps customers to embed sustainability into their core business processes and make balanced decisions that support their sustainability goals. 41. Frage

Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. Permission to migrate the data has been assigned
- B. You select the same migration method previously used for other objects
- C. All previous migration projects are in the "Finished" status
- D. Predecessor objects have been migrated

Antwort: A,D

Begründung:

Before you can migrate data for a specific object, you need to ensure that the following tasks are completed:

* Predecessor objects have been migrated: Some migration objects depend on other migration objects that need to be migrated first. For example, before you can migrate sales orders, you need to migrate customers, products, and pricing conditions. You can check the dependencies of migration objects in the Migration Cockpit or in the Migration Object Modeler¹².

* Permission to migrate the data has been assigned: In addition to having permission to access the Migrate Your Data app, you need permission to migrate each type of data. This is because the Migration Cockpit tool uses the same APIs and technical checks that would be done if you were to create a new data value through the respective application. For example, if you need to create a new bank record in your system, you would use the application, Manage Banks - Master Data. The app would present you with several fields capturing information about the new bank to create the record in your system. Now if you need to create 1,000 banks, it wouldn't be feasible to create each through the Manage Banks - Master Data app one-by-one. Therefore, you need to have the permission to use the Manage Banks - Master Data app in order to migrate bank data using the Migration Cockpit³.

The other tasks are not mandatory before you can migrate data for a specific object. You can select different migration methods for different objects, depending on your source system and data format. You can also have multiple migration projects in progress at the same time, as long as they do not contain the same migration objects⁴.
