## Study Materials NCA-6.10 Review, NCA-6.10 Free Study Material

If you would like to use all kinds of electronic devices to prepare for the NCA-6.10 NCA-6.10 exam, then I am glad to tell you that our online app version is definitely your perfect choice. In addition, another strong point of the online app version is that it is

convenient for you to use even though you are in offline environment. In other words, you can prepare for your NCA-6.10 Exam with under the guidance of our training materials anywhere at any time. Just take action to purchase we would be pleased to make you the next beneficiary of our NCA-6.10 exam practice.

## Nutanix Certified Associate v6.10 Sample Questions (Q47-Q52):

### NEW QUESTION # 47

When configuring a physical network switch in Prism Element, what information is required?

- A. NTP Configuration
- B. DNS Configuration
- C. SMTP Configuration
- **D. SNMP Configuration**

**Answer: D**

### NEW QUESTION # 48

What minimum number of clusters must be registered to Prism Central to open a support case from the UI?

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

The correct answer is B. 1

Nutanix Prism Central provides the ability to create and manage support cases directly from the UI, but this functionality requires at least one cluster to be registered to Prism Central. The Support option becomes active once one or more clusters are managed.

Important distinctions:

\* Zero clusters (Option A): With no clusters registered, Prism Central is effectively disconnected from any environment and thus cannot associate logs or telemetry with a support case.

\* One cluster (Option B): Enables access to support features, including log bundle generation and direct case submission.

\* Options C and D (2 or 3 clusters) are incorrect; they are not a requirement for enabling support case functionality.

Prism Central UI Navigation Path:

Settings (gear icon) > Support > Create Support Case

Official Reference:

\* Nutanix Prism Central Guide - Support Integration Section

\* Excerpt: "To open a support case through Prism Central, ensure at least one cluster is registered.

Support features become available once a cluster is connected."

Conclusion: Only one cluster is required to activate the support case workflow in Prism Central.

### NEW QUESTION # 49

An administrator is creating a Linux VM and must decide which is the correct timezone to choose.

Which timezone should the administrator select for this VM?

- A. Local
- **B. UTC**
- C. Eastern
- D. Central

**Answer: B**

Explanation:

The correct answer is B. UTC.

When creating Linux VMs in a Nutanix environment (or in any enterprise-grade production environment), it is best practice to use UTC (Coordinated Universal Time) as the system timezone. This ensures:

\* Consistency across distributed systems

- \* Accurate log correlation
- \* Avoidance of issues with daylight saving time (DST)
- \* Simplified centralized monitoring and troubleshooting

Clarifications:

- \* A (Eastern) and D (Central) are region-specific and may introduce time skew across systems.
- \* C (Local) is ambiguous and depends on the underlying hardware or hypervisor setting, which can lead to inconsistent behavior.

Official Reference:

- \* Linux Admin Best Practices
- \* Nutanix Best Practices Guide - VM Provisioning Section
- \* Excerpt: "For consistency across environments, it is recommended to configure all Linux virtual machines to use UTC timezone, particularly in clustered and distributed applications."

### NEW QUESTION # 50

An administrator wants to apply tags to licenses to simplify future renewals.

What interface would be used to complete this operation?

- A. Clusters in the Support Portal
- **B. Prism Central Licensing**
- C. License Inventory in the Support Portal
- D. Prism Element Licensing

**Answer: B**

### NEW QUESTION # 51

When configuring dual encryption, which key management method is supported?

- A. Lockdown Mode Enabled
- B. Native Key Manager
- C. Trusted Platform Module
- **D. External Key Manager**

**Answer: D**

Explanation:

When configuring dual encryption in Nutanix, an External Key Manager (EKM) is required. This allows the cluster to use an external hardware-based or software-based key management system to securely store and manage encryption keys. The combination of external and native encryption ensures compliance with high security standards.

- \* A. Trusted Platform Module: Incorrect, as TPM is not used for managing dual encryption keys.
- \* B. External Key Manager: Correct, as dual encryption relies on an external system to manage keys.
- \* C. Native Key Manager: Incorrect, as native key management alone does not support dual encryption.
- \* D. Lockdown Mode Enabled: Incorrect, as Lockdown Mode relates to cluster security, not encryption key management.
