Cisco DevNet Associate Exam Sample Questions (Q338-Q343):

NEW QUESTION # 338

An engineer must review and clean up a code repository. During the review, the engineer finds a file named config.json that contains API URLs, shared keys, and other application configurations.

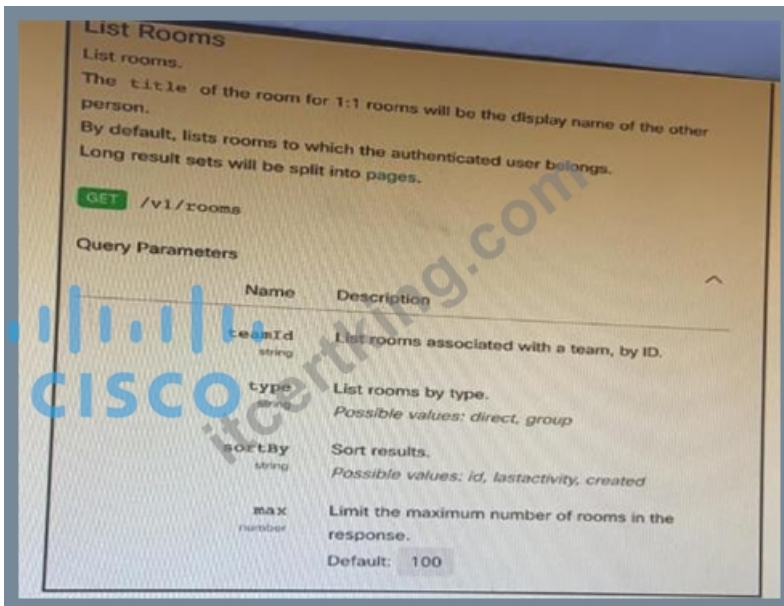

Which two methods, according to best practice, must be used to protect secrets? (Choose two.)

- A. Never appear in plaintext at rest or in transit.
- B. Make them long, secure strings that include numbers with special characters.
- C. Store in plaintext if they are not stored in a code repository.
- D. Always store in a secure vault.
- E. Store as plaintext when the server is secured physically.

Answer: A,D

NEW QUESTION # 339

Refer to the exhibit.

Fill in the blank to complete the query parameter and value so that the result set is returned in reverse chronological order (most recent first) based on when message were entered.

Answer:

Explanation:

?sortBy=lastactivity

NEW QUESTION # 340

What is a function of the default gateway in a network?

- A. to forward traffic to the same subnet
- B. to drop traffic that is destined to the default gateway
- C. to forward traffic to different subnets
- D. to drop traffic that is not destined to the default gateway

Answer: C

NEW QUESTION # 341

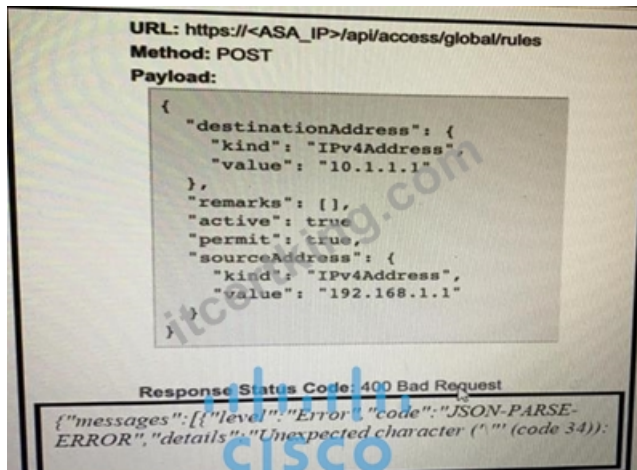

Which statement describes the benefit of using functions in programming?

- A. Functions store mutable values within a script or application.
- B. Functions ensure that a developer understands the inner logic contained before using them as part of a script or application.
- **C. Functions allow problems to be split into simpler, smaller groups, and reduce code repetition, which makes the code easier to read.**
- D. Functions create the implementation of secret and encrypted algorithms.

Answer: C

NEW QUESTION # 342

Refer to the exhibit.

What caused the error in this API request?

- A. The API resource does not support the POST operation.
- B. The submitted JSON payload includes a field that is not supported by the API resources.
- C. The API resource does not support JSON format payloads.
- **D. The submitted JSON payload has a formatting issue.**

Answer: D

Explanation:

The error message JSON-PARSE-ERROR and Unexpected character (\" \" (code 34)) indicates a JSON formatting issue.

Specifically, there is likely an incorrect character or misplaced quote within the JSON structure. Properly formatting the JSON payload and ensuring all fields are correctly quoted and syntax rules are followed will resolve this error.
