Customizable SPLK-3002 Practice Test Software

FreeCram SPLK-3002 exam dumps are audited by our certified subject matter experts and published authors for development. SPLK-3002 exam dumps are one of the highest quality SPLK-3002 Q&AS in the world. It covers nearly 96% real questions and answers, including the entire testing scope. FreeCram guarantees you Pass SPLK-3002 Exam at first attempt.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q78-Q83):

NEW QUESTION # 78

Which of the following are deployment recommendations for ITSI? (Choose all that apply.)

- A. Deployments often require an increase of hardware resources above base Splunk requirements.

- B. Deployments may increase the number of required indexers based on the number of KPI searches.
- C. Deployments should use fastest possible disk arrays for indexers.
- D. Deployments require a dedicated ITSI search head.

Answer: A,B,D

Explanation:

Explanation

You might need to increase the hardware specifications of your own Enterprise Security deployment above the minimum hardware requirements depending on your environment.

Install Splunk Enterprise Security on a dedicated search head or search head cluster.

The Splunk platform uses indexers to scale horizontally. The number of indexers required in an Enterprise Security deployment varies based on the data volume, data type, retention requirements, search type, and search concurrency.

NEW QUESTION # 79

Which views would help an analyst identify that a memory usage KPI is going critical? (select all that apply)

- A. Memory swim lane in a Deep Dive.
- B. Memory KPI in a glass table.
- C. Memory panel of the OS Host Details view in the Operating System module.
- D. Service & KPI tiles in the Service Analyzer.

Answer: A,B,C,D

Explanation:

To identify that a memory usage KPI is going critical, an analyst can leverage multiple views within Splunk IT Service Intelligence (ITSI), each offering a different perspective or level of detail:

A) Memory KPI in a glass table: A glass table can display the current status of the memory usage KPI, along with other related KPIs and services, providing a high-level overview of system health.

B) Memory panel of the OS Host Details view in the Operating System module: This specific panel within the OS Host Details view offers detailed metrics and trends related to memory usage, allowing for in-depth analysis.

C) Memory swim lane in a Deep Dive: Deep Dives allow analysts to visually track the performance and status of KPIs over time. A swim lane dedicated to memory usage can highlight periods where the KPI goes critical, along with the context of other related KPIs.

D) Service & KPI tiles in the Service Analyzer: The Service Analyzer provides a comprehensive overview of all services and their KPIs. The tiles related to memory usage can quickly alert analysts to critical conditions through color-coded indicators.

Each of these views contributes to a comprehensive monitoring strategy, enabling analysts to detect and respond to critical memory usage conditions from various analytical perspectives.

NEW QUESTION # 80

Which deep dive swim lane type does not require writing SPL?

- A. Automatic lane.
- B. Metric lane.
- C. KPI lane.
- D. Event lane.

Answer: C

Explanation:

A KPI lane is a type of deep dive swim lane that does not require writing SPL. You can simply select a service and a KPI from a drop-down list and ITSI will automatically populate the lane with the corresponding data. You can also adjust the threshold settings and time range for the KPI lane. References: [KPI Lanes]

NEW QUESTION # 81

Which scenario would benefit most by implementing ITSI?

- A. Monitoring of system hardware.

- B. Monitoring of system process statuses
- C. Monitoring of retail sales metrics.
- D. Monitoring of business services functionality.

Answer: D

NEW QUESTION # 82

How can Service Now incidents be created automatically when a Multi-KPI alert triggers? (select all that apply)

- A. By creating a notable event aggregation policy with a SNOW incident action.
- B. By linking Entities to Service-Now configuration items.
- C. By editing the associated correlation search and specifying an alert action.
- D. By creating a custom etc/apps/SA-ITOA/workflow_rules.conf

Answer: A,C

Explanation:

To automatically create ServiceNow incidents when a Multi-KPI alert triggers in Splunk IT Service Intelligence (ITSI), the following approaches can be used:

C) By creating a notable event aggregation policy with a ServiceNow (SNOW) incident action: ITSI allows the creation of notable event aggregation policies that can specify actions to be taken when certain conditions are met. One of these actions can be the creation of an incident in ServiceNow, directly linking the alerting mechanism in ITSI with incident management in ServiceNow.

D) By editing the associated correlation search and specifying an alert action: Correlation searches in ITSI are used to identify patterns or conditions that signify notable events. These searches can be configured to include alert actions, such as creating a ServiceNow incident, whenever the search conditions are met. This direct integration ensures that incidents are automatically generated in ServiceNow, based on the specific criteria defined in the correlation search.

Options A and B are not standard practices for integrating ITSI with ServiceNow for automatic incident creation. The configuration typically involves setting up actionable alert mechanisms within ITSI that are specifically designed to integrate with external systems like ServiceNow.

NEW QUESTION # 83

.....

Each Splunk certification exam candidate know this certification related to the major shift in their lives. Splunk Certification SPLK-3002 Exam training materials FreeCram provided with ultra-low price and high quality immersive questions and answersdedication to the majority of candidates. Our products have a cost-effective, and provide one year free update. Our certification training materials are all readily available. Our website is a leading supplier of the answers to dump. We have the latest and most accurate certification exam training materials what you need.
