

Free Juniper JN0-460 Dumps - Pass Juniper JN0-460 Exam

BONUS!!! Download part of TrainingDump JN0-460 dumps for free: https://drive.google.com/open?id=1c__CYYTYi9PB4wihH_-bl_RMq4VGS52g

The key trait of our product is that we keep pace with the changes the latest circumstance to revise and update our JN0-460 study materials, and we are available for one-year free updating to our customers. Our company has established a long-term partnership with those who have purchased our JN0-460 exam guides. We have made all efforts to update our product in order to help you deal with any change, making you confidently take part in the exam. We will inform you that the JN0-460 Study Materials should be updated and send you the latest version of our JN0-460 exam questions in a year after your payment.

Perhaps you plan to seek a high salary job. But you are not confident enough because of lack of ability. Now, our JN0-460 practice guide is able to give you help. You will quickly master all practical knowledge in the shortest time. Also, obtaining the JN0-460 certificate fully has no problem. With the high pass rate of our JN0-460 exam braindumps as 98% to 100%, we can claim that as long as you study with our JN0-460 study materials, you will pass the exam for sure.

Reasons To Buy Juniper JN0-460 Exam Dumps

No doubt Juniper JN0-460 exam practice test questions are the recommended Mist AI Wired, Specialist (JNCIS-MistAI-Wired) JN0-460 exam preparation resources that make the Juniper JN0-460 exam preparation simple and easiest. To do this you need to download updated and real JN0-460 exam questions which you can get from the TrainingDump platform easily. At the TrainingDump you can easily download valid, updated, and real JN0-460 Exam Practice questions. All these Juniper JN0-460 PDF Dumps are verified and recommended by qualified Juniper JN0-460 exam trainers. So you rest assured that with the Juniper JN0-460 exam real questions you will get everything that you need to prepare, learn and pass the difficult Juniper JN0-460 exam with confidence.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> • Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 2	<ul style="list-style-type: none"> • Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
Topic 3	<ul style="list-style-type: none"> • Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 4	<ul style="list-style-type: none"> • Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
Topic 5	<ul style="list-style-type: none"> • Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q12-Q17):

NEW QUESTION # 12

The primary benefit of Campus Fabric Core-Distribution model is:

- A. Increased network latency
- B. Reduction in network bandwidth
- C. Simplified cable management
- **D. Scalability and high availability**

Answer: D

NEW QUESTION # 13

You're designing a network for university with more than 20,000 students and various departments spread across multiple buildings. They prioritize high scalability and efficient east-west communication between departments.

In this scenarios, which IP-Clos architecture should be used?

- A. 3-stage IP-Clos
- B. Collapsed Core
- C. Campus Fabric Core-Distribution
- **D. 5-stage IP-Clos**

Answer: D

NEW QUESTION # 14

What are three wired Service Level Expectations (SLEs) that comprise Juniper Mist Wired Assurance? (Choose three.)

- A. Capacity
- **B. Switch Health**
- C. Coverage
- **D. Successful Connects**
- **E. Throughput**

Answer: B,D,E

Explanation:

Wired Assurance defines SLEs (Service Level Expectations) to provide measurable performance indicators for wired networks. These metrics identify root causes of network degradation by monitoring switch health, connection success, and throughput performance.

"Juniper Mist Wired Assurance delivers AI-driven insights across key wired SLEs including Successful Connects, Throughput, and Switch Health, giving visibility into user experience and switch performance." Option A (Capacity): Incorrect - capacity is used in wireless SLEs, not wired.

Option B (Successful Connects): Correct - tracks connection success rate and anomalies.

Option C (Switch Health): Correct - monitors hardware, software, and PoE status.

Option D (Coverage): Incorrect - pertains to wireless SLEs.

Option E (Throughput): Correct - measures data transfer rate, latency, jitter, and loss.

NEW QUESTION # 15

What is a benefit of implementing a service block border in a campus fabric?

- A. Reducing hardware costs by eliminating physical appliances.
- B. Increasing the network's overall bandwidth capacity.
- **C. Simplifying network core device management.**
- D. Improving user experience by prioritizing specific traffic flows.

Answer: C

NEW QUESTION # 16

A customer has purchased five new switches and assigned them to a site.

In the configuration hierarchy, how should a user configure the name or role of each switch?

- A. Configure additional CLI commands on each switch.
- **B. Configure each switch individually on the Switch Configuration menu under the Switches menu.**
- C. Add names and roles of each switch to the organization-level templates.
- D. Configure names and roles on the site-specific configuration.

Answer: B

Explanation:

In Juniper Mist Cloud, configuration hierarchy includes organization-level templates, site-level configurations, and individual switch configuration. Site and organization levels provide shared settings, while per-device details such as hostname or role are set individually.

"Device-specific attributes such as hostname, role, or management IP are configured under the individual switch configuration menu. Templates and site configurations apply globally, while individual configurations override device-level parameters." Option

A: Incorrect - site configuration applies to all switches at a site, not unique details.

Option B: Incorrect - CLI configuration is not used when switches are managed by Mist Cloud.

Option C: Correct - each switch's name and role are configured individually under Switches # Switch Configuration.

Option D: Incorrect - organization templates define global settings, not per-switch names.
