Salesforce Certified Platform App Builder Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which opportunity standard field is available to be configured directly? Choose 3

- A. Stage
- B. Forecast category
- C. Type
- D. Lead source

Answer: A,C,D

Explanation:

Explanation

The opportunity standard fields that are available to be configured directly are Stage, Lead Source, and Type.

These fields can be modified by editing their picklist values, adding or removing values, or changing their default values. Option A is incorrect because Forecast Category is not a standard field on the opportunity object, but rather a system field that is automatically derived from the Stage field.

NEW QUESTION # 67

What should an app builder do to upgrade an unmanaged package that has been installed into production?

- A. Uninstall the current version and install the new version.
- B. Install the new version to a Developer org then deploy to production.
- C. Install the new version in a sandbox then deploy to production
- D. Click the update link on the Installed Packages page.

Answer: C

NEW QUESTION # 68

Cloud Kicks (CK) tracks the support level of its customers on the account record page. CK wants to show a text notification on a case record page when the related account is a platinum-level customer.

How could an app builder meet this requirement?

- A. Add a rich text area to the Case Lightning page > Set the component visibility of the rich text area to show when the account support level is platinum.
- B. Create a text-only Visualforce page > Drag the Visualforce component into the Case page layout > Set its visibility to show when the account support level is platinum.
- C. Create a text-only Visualforce page > Clone the case page layout > Drag the Visualforce component into the page, and assign the layout to platinum cases.
- D. Clone the Case Lightning page > Add a rich text area to the new page, and assign this page to platinum accounts.

Answer: A

NEW QUESTION # 69

A lightning Page is _____.
