最新的 ISO/IEC 27001 ISO-IEC-27001-Foundation 免費考試真題 (Q11-Q16):

問題 #11

Which item is required to be defined when planning the organization's risk assessment process?

- A. The criteria for acceptable levels of risk
- B. There are NO specific information requirements
- C. The parts of the ISMS scope which are excluded from the risk assessment
- D. How the effectiveness of the method will be measured

答案: A

解題說明:

Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making

when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.

Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.

Thus, the correct answer is C: The criteria for acceptable levels of risk.

問題 #12

Which factor is required to be determined when understanding the organization and its context?

- A. Internal issues affecting the purpose of the ISMS
- B. The ISO/IEC 27001 clauses which apply to the management system
- C. The processes that will be required to operate the ISMS
- D. The information security objectives relevant to the ISMS

答案: A

解題說明:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

問題 #13

Which trend in information security performance is required to be considered during a management review of the ISMS?

- A. Relevant external and internal requirements changes
- B. Decisions related to continual improvement opportunities
- C. Achievement of information security objectives
- D. Validity of information continuity controls

答案: C

解題說明:

Clause 9.3.2 (Management Review Inputs) states that management reviews shall include:

"c) information on the information security performance, including trends in: (1) nonconformities and corrective actions; (2) monitoring and measurement results; (3) audit results; and (4) fulfilment of information security objectives." This makes achievement of information security objectives (option A) a required trend to be considered.

While external/internal requirements (C) and continual improvement opportunities (D) are also part of management review inputs, they are not specifically listed under "trends in performance." Option B is outside the direct requirement.

Thus, the verified answer is A.

問題 #14

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. According to a schedule defined by the Certification Body
- B. Every six months
- C. At planned intervals and if significant changes occur
- D. Annually

答案: C

解題說明:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to

and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This clearly identifies the review frequency requirement: planned intervals and whenever there are significant changes. Options A and B (six-monthly or annually) are not prescribed by ISO - timing is left to the organization. Option C is also wrong, since Certification Bodies do not dictate policy review schedules. Therefore, the verified correct answer is D.

問題 #15

What is the name of the control clause used to control information security breaches within Annex A of ISO/IEC 27001?

- A. Information security event management
- B. Response to information security events
- C. Reporting information security incidents
- **D. Information security event reporting**

答案：D

解題說明：

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A in ISO/IEC 27001 refers directly to ISO/IEC 27002 for control guidance. In ISO/IEC 27002:2022, Clause 6.8 is titled: "Information security event reporting - Information security events should be reported through appropriate management channels as quickly as possible." This control ensures breaches, incidents, or suspected issues are reported for action. The other options (B, C, D) are not the exact titles in Annex A. The official title is Information security event reporting, confirming
