

Authorized NSE8_812 Certification Questions & Guaranteed Fortinet NSE8_812 Exam Success with The Best NSE8_812 New Braindumps Questions

BONUS!!! Download part of PracticeTorrent NSE8_812 dumps for free: <https://drive.google.com/open?id=1xbKYMnFoiri1HsKzTAY8U2dcPvzhp3Hx>

If you want to buy Fortinet NSE8_812 Exam Study Guide online services, then we PracticeTorrent is one of the leading service provider's site. These training products to help you pass the exam, we guarantee to refund the full purchase cost. Our website provide all the study materials and other training materials on the site and each one enjoy one year free update facilities. If these training products do not help you pass the exam, we guarantee to refund the full purchase cost.

Fortinet NSE8_812, also known as the Fortinet NSE 8 - Written Exam, is a certification exam that validates the skills and knowledge of candidates in designing, implementing, and managing complex security solutions using Fortinet products. Fortinet NSE 8 - Written Exam (NSE8_812) certification is intended for professionals who are responsible for securing large and complex networks using Fortinet solutions. NSE8_812 exam covers a wide range of topics, including network security design, advanced threat protection, secure access, and cloud security.

Fortinet NSE8_812 exam is targeted towards experienced network security professionals who are looking to validate their skills and knowledge in the field. NSE8_812 exam is designed to test the candidate's ability to design and implement complex network security solutions using Fortinet products and technologies. Candidates who pass the NSE8_812 exam will be able to demonstrate their expertise in designing, implementing, and managing advanced network security solutions using Fortinet products and technologies. Fortinet NSE 8 - Written Exam (NSE8_812) certification is highly valued by employers and can help network security professionals to advance their careers and increase their earning potential.

Fortinet NSE8_812, also known as the Fortinet NSE 8 - Written Exam, is a certification exam designed to test the knowledge and skills of experienced network security professionals. NSE8_812 Exam is intended for individuals who have a deep understanding of Fortinet's security solutions and are looking to become certified experts in the field. The Fortinet NSE8_812 exam is a rigorous, comprehensive test that covers a wide range of topics related to network security, including advanced threat protection, network design, and security policies.

NSE8_812 New Braindumps Questions - Certification NSE8_812 Torrent

Fortinet NSE8_812 exam materials of PracticeTorrent is developed in accordance with the latest syllabus. At the same time, we also constantly upgrade our training materials. So our exam training materials is simulated with the practical exam. So that the pass rate of PracticeTorrent is very high. It is an undeniable fact. Through this we can know that PracticeTorrent Fortinet NSE8_812 Exam Training materials can brought help to the candidates. And our price is absolutely reasonable and suitable for each of the candidates who participating in the IT certification exams.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q62-Q67):

NEW QUESTION # 62

Refer to the exhibit.

You have deployed a security fabric with three FortiGate devices as shown in the exhibit. FGT_2 has the following configuration:

```
config system csf
set fabric-object-unification local
end
```

FGT_1 and FGT_3 are configured with the default setting. Which statement is true for the synchronization of fabric-objects?

- A. Objects from the root FortiGate will only be synchronized to FGT_2.
- **B. Objects from the root FortiGate will only be synchronized to FGT_3.**
- C. Objects from the root FortiGate will not be synchronized to any downstream FortiGate.
- D. Objects from the FortiGate FGT_2 will be synchronized to the upstream FortiGate.

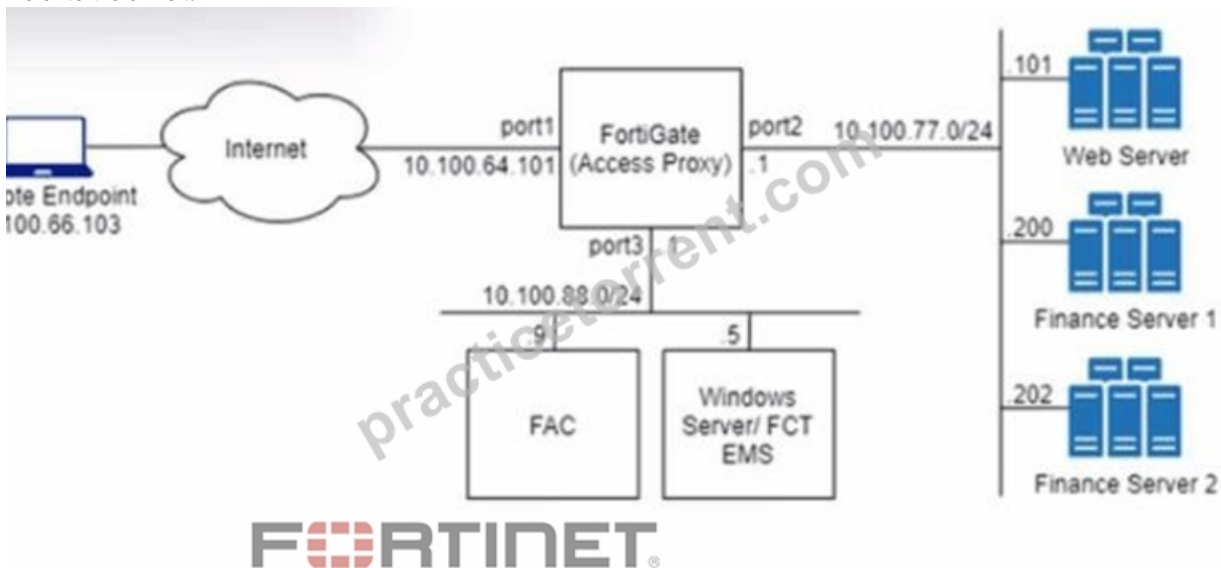

Answer: B

Explanation:

<https://docs.fortinet.com/document/fortigate/6.4.0/new-features/520820/improvements-to-synchronizing-objects-across-the-security-fabric-6-4-4>

NEW QUESTION # 63

Refer to the exhibit.

An HTTPS access proxy is configured to demonstrate its function as a reverse proxy on behalf of the web server it is protecting. It verifies user identity, device identity, and trust context, before granting access to the protected source. It is assumed that the FortiGate EMS fabric connector has already been successfully connected.

You need to ensure that ZTNA access through the FortiGate will redirect users to the FortiAuthenticator to perform username/password and multifactor authentication to validate access prior to accessing resources behind the FortiGate. In this scenario, which two further steps need to be taken on the FortiGate? (Choose two.)

- A. Create a SAML user/server object referring to the FortiAuthenticator.
- B. Create an authentication rule that sets the sso-auth-method to the FortiAuthenticator.
- C. Create an authentication scheme with the "method" as SAML.
- D. Create a firewall rule that allows access from the remote endpoint to the resources behind the FortiGate.

Answer: A,C

NEW QUESTION # 64

A customer wants to use the FortiAuthenticator REST API to retrieve an SSO group called SalesGroup. The following API call is being made with the 'curl' utility:

```
curl -k -v -u "admin:zeyDZXmP6GbKcerqdWWEYNTnH2Ta0C:5Htp2dAVS" -X PUT -d '{"name":"SalesGroup"}' -H 'Content-Type: application/json' https://10.10.10.22/api/v1/ssogroup/100/
```

Which two statements correctly describe the expected behavior of the FortiAuthenticator REST API? (Choose two.)

- A. If the REST API web service access key is lost, it cannot be retrieved and must be changed.
- B. Only users with the "Full permission" role can access the REST API
- C. The syntax is incorrect because the API call needs the get method.
- D. This API call will fail because it requires that API version 2

Answer: C,D

Explanation:

To retrieve an SSO group called SalesGroup using the FortiAuthenticator REST API, the following issues need to be fixed in the API call:

* The API version should be v2, not v1, as SSO groups are only supported in version 2 of the REST API.

* The HTTP method should be GET, not POST, as GET is used to retrieve information from the server, while POST is used to create or update information on the server. Therefore, a correct API call would look like this: curl -X GET -H "Authorization: Bearer <token>" https://fac.example.com/api/v2/sso

/groups/SalesGroup References: <https://docs.fortinet.com/document/fortiauthenticator/6.4.1/rest-api-solution-guide/927310/introduction>

<https://docs.fortinet.com/document/fortiauthenticator/6.4.1/rest-api-solution-guide/927311/sso-groups>

NEW QUESTION # 65

Refer to the exhibit.

```
config vpn ipsec phase1-interface
  edit "vpn-hub02-1"
    set interface "wan1"
    set ike-version 2
    set authmethod signature
    set net-device enable
    set proposal aes256-sha256
    set auto-discovery-receiver enable
    set remote-gw 192.168.168.100
    set certificate "BR01FGTLOCAL"
    set peer "vpn-hub02-1_peer"
  next
end
```

To facilitate a large-scale deployment of SD-WAN/ADVPN with FortiGate devices, you are tasked with configuring the FortiGate devices to support injecting of IKE routes on the ADVPN shortcut tunnels.

Which three commands must be added or changed to the FortiGate spoke config vpn ipsec phase1-interface options referenced in the exhibit for the VPN interface to enable this capability? (Choose three.)

- A. set ike-version 1
- B. set add-route enable
- C. set mode-cfg enable
- D. set mode-cfg-allow-client-selector enable
- E. set net-device disable

Answer: B,D,E

Explanation:

A is correct because net-device disable prevents the VPN interface from being added to the routing table as a connected route. This allows IKE routes to be injected instead. D is correct because add-route enable enables IKE route injection on the VPN interface. E is correct because mode-cfg-allow-client-selector enable allows the VPN interface to accept IKE routes from any peer that matches the phase 1 configuration. Reference: <https://docs.fortinet.com/document/fortigate/7.0.1/administration-guide/490352/advpn-configuration>

NEW QUESTION # 66

A retail customer with a FortiADC HA cluster load balancing five webservers in L7 Full NAT mode is receiving reports of users not able to access their website during a sale event. But for clients that were able to connect, the website works fine.

CPU usage on the FortiADC and the web servers is low, application and database servers are still able to handle more traffic, and the bandwidth utilization is under 30%.

Which two options can resolve this situation? (Choose two.)

- A. Add a connection-pool to the FortiADC virtual server
- B. Add more web servers to the real server pool
- C. Change the persistence rule to LB_PERSIS_SSL_SESSJD.
- D. Disable SSL between the FortiADC and the web servers

Answer: A,B

Explanation:

Option B: Adding more web servers to the real server pool will increase the overall capacity of the load balancer, which should help to resolve the issue of users not being able to access the website.

Option D: Adding a connection-pool to the FortiADC virtual server will allow the load balancer to cache connections to the web servers, which can help to improve performance and reduce the number of dropped connections.

Option A: Changing the persistence rule to LB_PERSIS_SSL_SESSJD would only be necessary if the current persistence rule is not working properly. In this case, the CPU usage on the FortiADC and the web servers is low, so the persistence rule is likely not the issue.

Option C: Disabling SSL between the FortiADC and the web servers would reduce the load on the FortiADC, but it would also make the website less secure. Since the bandwidth utilization is under 30%, it is unlikely that disabling SSL would resolve the issue.

NEW QUESTION # 67

.....

Our NSE8_812 study quiz boosts high quality and we provide the wonderful service to the client. We boost the top-ranking expert team which compiles our NSE8_812 guide prep elaborately and check whether there is the update every day and if there is the update the system will send the update automatically to the client. The content of our NSE8_812 Preparation questions is easy to be mastered and seizes the focus to use the least amount of answers and questions to convey the most important information.
