## 최신 Public-Sector-Solutions인증덤프공부자료 인증시험공부

Salesforce인증Public-Sector-Solutions시험은 현재 치열한 IT경쟁 속에서 열기는 더욱더 뜨겁습니다. 응시자들도 더욱더 많습니다. 하지만 난이도난 전혀 낮아지지 않고 이지도 어려운 시험입니다. 어쨌든 개인적인 지식 장악도 나 정보기술 등을 테스트하는 시험입니다. 보통은Salesforce인증Public-Sector-Solutions시험을 넘기 위해서는 많은 시간과 신경이 필요합니다.

## 최신 Accredited Professional Public-Sector-Solutions 무료샘플문제 (Q29-Q34):

### 질문 # 29

The Department of Disaster Assistance is implementing Grants Management using Public Sector Solutions.

One of the pain points in the current process is that every grant application reviewer follows a different business process to review the applications received. A solution has been engaged to standardize this process using the Public Sector Solution toolkit. What should be the best solution to achieve this task?

- A. Use Action Plans on Accounts to define due diligence steps, related tasks, and documents to collect.
- B. Create a guided omniscrypt guided process to define due diligence steps, related tasks, and documents to collect.
- C. Use a screen flow on Accounts to define due diligence steps, related tasks, and documents to collect.
- D. Develop a standard set of processes/guides to coach the reviewers and ask them to follow them without fail.

정답: A

### 설명:

Using Action Plans on Accounts to define due diligence steps, related tasks, and documents to collect is the best solution to standardize the business process for reviewing grant applications. Action Plans are a feature of Public Sector Solutions that can help public sector agencies to create and manage tasks and subtasks for different types of records, such as accounts or cases. Action Plans can be used to define due diligence steps, such as verifying eligibility or checking references, related tasks, such as sending emails or making calls, and documents to collect, such as financial statements or tax returns. Action Plans can also be applied to grant applications using the Account object, which is a standard object that can store information about grant applicants or recipients. ### 질문 # 30

A Technical Consultant has been asked to give insight to the reviewers explaining how a particular grant seeker was prioritized now that the Prioritization Expression Sets and Matrix have been developed.

Which three tasks must the Technical Consultant do to accommodate this request?

- A. Create a Screen flow and incorporate the Decision Explainer component to display the outcome.
- B. Assign the Decision Explainer Permission Set License to the appropriate user(s).
- C. Integrate the BRE with Decision Explainer.
- D. Add the Decision Explainer Log History component to the Lightning record page(s).

- E. Create an Apex Trigger to document the decision steps performed.

**정답: A,B,D**

**설명:**

Explanation

A Screen flow, a Decision Explainer Log History component, and a Decision Explainer Permission Set License are three tasks that must be done to accommodate the request of explaining how a particular grant seeker was prioritized. A Screen flow is a type of flow that can create an interactive user interface to display information or collect data from users. A Screen flow can incorporate the Decision Explainer component, which is a custom Lightning component that can display the outcome and explanation of a decision made by a Decision Matrix or a Business Rules Engine (BRE). A Decision Explainer Log History component is a standard Lightning component that can display a list of Decision Explanations that have been generated for a record by a Decision Matrix or a BRE. A Decision Explainer Permission Set License is a type of license that can grant users access to the Decision Explainer features, such as viewing and creating Decision Explanations.

**질문 # 31**

Bobabaven has previously implemented Salesforce Service Cloud to handle constituent queries and complaints, including a constituent self-service digital experience. This was implemented previously using the Help Center template. Bobabaven is now ready to implement the Public Sector Solutions Licenses, Permits, and Inspections modules, and wants to provide constituents with access to digital application forms.

What is the right solution for this requirement that minimizes customization and site maintenance?

- A. Create a new Applications digital experience using the Licenses and Permits Experience Site template, and deploy components such as OmniScripts and FlexCards to the new experience site.
- B. Create OmniOut components and deploy them to the existing Help Center experience site.
- C. Create new pages and deploy components such as OmniScripts and FlexCards within the existing Help Center experience site.

**정답: A**

**질문 # 32**

After a grantseeker has submitted an application for review. Foodvania needs to review the Funding Request and allocate the funds appropriately. For audit purposes, all expenditures must be tracked according to how the money was disbursed (Mortgage arrearage. Utility assistance, etc.).

Which two would the consultant build to handle this request utilizing Public Sector Solutions(PSS)?

- A. Recommend using PSS with the Grants Management product.
- B. Recommend using PSS with the Outbound Funds Module.
- C. Recommend using PSS with the Nonprofit Success Pack.
- D. Recommend using PSS with FinancialForce Accounting.

**정답: A,B**

**설명:**

The Outbound Funds Module and the Grants Management product are two solutions that can be used with Public Sector Solutions (PSS) to handle the request of deploying a digital experience that enables constituents to sign up for volunteer projects. The Outbound Funds Module is an open source app that can help public sector agencies to track their funding programs, funding requests, disbursements, and expenditures. The Grants Management product is a prebuilt app that comes with PSS and it can help public sector agencies to manage the entire grant lifecycle, from application to award to reporting.

**질문 # 33**

A Consultant supports the City of Snadboro in setting up a new Licensing & Permitting system. The City is already using Public Sector Solutions for Emergency Response Management capabilities and is planning to use the Licensing & Permitting capabilities available in the same Salesforce instance. Which of the following configurations directly impacts the City's Salesforce licensing cost?

- A. Configuring more than ten different OmniScript Application forms and making them available on an Experience Site for

external users to apply

- B. Configuring an Application Object Usage Record to track the number of applications processed for License & Permit Management and Emergency Response Management.
- C. Configuring Business Regulatory Authorization Type Dependencies for external users to view on the Experience site when searching for a specific Permit to apply for.
- D. Configuring multiple record types for the Individual Application and the Business License Application for both License & Permit Management and Emergency Response Management.

정답: B

설명:

Configuring an Application Object Usage Record to track the number of applications processed for License & Permit Management and.. This is the lowest-customization answer that still satisfies the business, security, and lifecycle requirements.

The Core Concept Explained: OmniStudio separates guided interaction, data mapping, orchestration, and UI presentation. That separation is critical for high-volume public-sector intake because each asset can be tested and reused independently.

Step-by-Step Technical Analysis: Design the user journey first, then decide which OmniStudio asset owns each responsibility.

OmniScript captures guided input, DataRaptors map Salesforce data, Integration Procedures orchestrate server-side work, and FlexCards expose summarized context. After assembly, validate data payloads, error handling, security, and performance with realistic application records. Configure an Application Object Usage Record to track the number of applications processed for License and Permit Management and Emergency Response Management.

Why the Incorrect Options Are Wrong: A does not meet the implementation-quality bar for security, scale, auditability, or maintainability in this scenario. C does not meet the implementation-quality bar for security, scale, auditability, or maintainability in this scenario. D does not meet the implementation-quality bar for security, scale, auditability, or maintainability in this scenario.
