100% Pass Quiz 2026 300-425: Perfect Designing Cisco Enterprise Wireless Networks Training Material

DOWNLOAD the newest FreePdfDump 300-425 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1oJKRMlR15QcpzKkg57B2R_YJ3MAJe7Ws

Our 300-425 prep material target all users and any learners, regardless of their age, gender and education background. We provide 3 versions of our 300-425 learning prep for the clients to choose based on the consideration that all the users can choose the most suitable version to learn. The 3 versions each support different using method and equipment and the client can use the 300-425 Exam study materials on the smart phones, laptops or the tablet computers. The clients can choose the version of our 300-425 exam questions which supports their equipment on their hands to learn.

You get a specific amount of time per day to study, you have a job, need to go to the office daily, and take time to relax from the hectic work schedule. So, planning a long study schedule is not possible. Some people study while traveling to the office, some prefer to check the office breaks and some even take it to late-night study especially when they are left with little time to prepare Designing Cisco Enterprise Wireless Networks 300-425 for certification exam. For this reason, we want to make your journey smooth by providing you with smart tips to make the most out of your Designing Cisco Enterprise Wireless Networks 300-425 study material for the Designing Cisco Enterprise Wireless Networks 300-425 certification programs and clear it in one go.

300-425 Valid Test Dumps, Accurate 300-425 Answers

The smartest way of getting high passing score in 300-425 valid test is choosing latest and accurate certification learning materials. The up-to-date 300-425 exam answers will save you from wasting much time and energy in the exam preparation. The content of our 300-425 Dumps Torrent covers the key points of exam, which will improve your ability to solve the difficulties of 300-425 real questions. Just add our exam dumps to your cart to get certification.

Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q293-Q298):

NEW QUESTION # 293
An engineer must create data-link redundancy for the company's Cisco Wireless LAN Controller. The engineer has decided to configure LAG-based redundancy instead of port-based redundancy. Which three features of LAG-based redundancy influenced this decision? (Choose three.)

- A. Ports are grouped into multiple LAGs.
- B. The same port has multiple untagged dynamics interfaces.
- C. Packets are always sent out on the same port they are received on.
- D. Full bandwidth of all links is available.
- E. All interface traffic passes as long as one port is up.
- F. Interface connection to two separate nonstacked switches is available.

Answer: A,C,E

NEW QUESTION # 294
Multiple WLCs are implemented in a high-availability configuration in a mobility group. APs are deployed with only a primary controller assigned.
By default, which mobility group member controller do the orphaned APs join in the event of a failed controller?

- A. controller with the most available AP free license capacity
- B. controller with the lowest percent of associated APs per license capacity
- C. controller with the least CPU utilization over the last reporting period
- D. controller with the least number of associated APs

Answer: A

Explanation:
https://www.cisco.com/c/en/us/support/docs/wireless-mobility/wireless-mobile/71963-apload- apfall-uwn.html AP Load Balancing You can perform AP load balancing on two (or more) WLCs if you configure mobility groups properly. The LWAPP allows for dynamic redundancy and load balancing. For example, if you specify more than one IP address for option 43, an AP sends LWAPP discovery requests to each of the IP addresses that the AP receives. In the WLC LWAPP discovery response, the WLC embeds this information:
* Information on the current AP load, which is defined as the number of APs that are joined to the WLC at the time
* The AP capacity
* The number of wireless clients that are connected to the WLC
The AP then attempts to join the least loaded WLC, which is the WLC with the greatest available AP capacity.

NEW QUESTION # 295
A customer has two Cisco 550B WLCs that manage all the access points in their network and provide N+1 redundancy and load balancing. The primary Cisco WLC has 60 licenses and the secondary Cisco WLC has 40. The customer wants to convert the N+1 model to an HA model and provide SSO. Configuration must be performed during a maintenance window. After performing all the configurations on both controllers, the config redundancy unit secondary command is issued on the secondary Cisco WLC and it fails. Which parameter needs to be in place to complete the configuration?

- A. The secondary Cisco WLC needs a minimum of 50 base licenses
- B. The primary Cisco WLC is already set as the secondary unit.
- C. SSO needs to be enabled
- D. A cable in the RP port

Answer: A

NEW QUESTION # 296

The wireless team must configure a new voice SSID for optimized roaming across multiple WLCs with Cisco 8821 phones. Which two settings accomplish this goal? (Choose two.)

- A. Configure AP groups between WLCs.
- B. Use AVC to tag traffic voice traffic as best effort.
- C. Configure AVC profile on new SSID.
- D. Configure mobility groups between WLCs.
- E. Use Cisco Centralized Key Management for authentication.

Answer: B,E

NEW QUESTION # 297

Which UDP port numbers are used for exchange mobility packets in an AireOS wireless deployment?

- A. UDP 16666 for control plane, EoIP (IP protocol 97) for data plane
- B. UDP 16667 for control plane, UDP 16666 for data plane
- C. UDP 16668 for control plane, UDP 16667 for data plane
- D. UDP 16666 for control plane, UDP 16667 for data plane

Answer: A

Explanation:
☐
