1Z0-1042-25 Exam Preparation - Oracle Oracle Cloud Infrastructure 2025 Application Integration Professional - High-quality 1Z0-1042-25 Valid Study Materials

BONUS!!! Download part of PDFVCE 1Z0-1042-25 dumps for free: https://drive.google.com/open?id=1BhowDPc-eV8AGTiUR3vEwGiyd-Ln8ASb

Research indicates that the success of our highly-praised 1Z0-1042-25 test questions owes to our endless efforts for the easily operated practice system. Most feedback received from our candidates tell the truth that our 1Z0-1042-25 guide torrent implement good practices, systems as well as strengthen our ability to launch newer and more competitive products. Accompanying with our 1Z0-1042-25 exam dumps, we educate our candidates with less complicated Q&A but more essential information, which in a way makes you acquire more knowledge and enhance your self-cultivation. And our 1Z0-1042-25 Exam Dumps also add vivid examples and accurate charts to stimulate those exceptional cases you may be confronted with. You can rely on our 1Z0-1042-25 test questions, and we'll do the utmost to help you succeed.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.
Topic 2	• Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.

Topic 3	• Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.
Topic 4	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 5	• Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.

1Z0-1042-25 Valid Study Materials - 1Z0-1042-25 Latest Exam Discount

PDFVCE is a leading platform that has been helping the Oracle 1Z0-1042-25 exam candidates for many years. Over this long time period, countless Oracle 1Z0-1042-25 exam candidates have passed their dream Oracle Cloud Infrastructure 2025 Application Integration Professional (1Z0-1042-25) certification and they all got help from valid, updated, and real Oracle Cloud Infrastructure 2025 Application Integration Professional (1Z0-1042-25) exam questions. So you can also trust the top standard of Oracle 1Z0-1042-25 exam dumps and start 1Z0-1042-25 practice questions preparation without wasting further time.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q49-Q54):

NEW QUESTION # 49
Which operation is NOT supported by an Oracle Integration Cloud (OIC) connection resource configured with FTP Adapter in the Invoke role?

- A. Read File
- B. Delete File
- C. Download File
- D. Read File in Segments
- E. Write File

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
The OIC FTP Adapter in theInvoke rolefacilitates interactions with an FTP server from an integration flow.
Let's break down each operation with exhaustive detail:
Option A: Write File
Supported:The FTP Adapter allows writing files to an FTP server. For example, you could use a Stage File action to prepare a CSV file and then invoke the FTP Adapter to write it to a remote directory like /inbound.
This is a core capability for outbound file transfers.
Option B: Read File
Supported:Reading an entire file from an FTP server is possible in Invoke mode. You specify a file path (e.g., /outbound/data.csv), and the adapter retrieves itscontents, useful for processing complete files in one go, like a daily report.
Option C: Read File in Segments
Not Supported (Answer):This operation, which processes large files incrementally (e.g., 100 records at a time), is exclusive to theTrigger roleor Stage File actions, not the Invoke role of the FTP Adapter. In Invoke mode, the adapter doesn't support segmented reading because it's designed for direct, one-shot operations rather than iterative processing. For segmented reads, you'd use a File Adapter in Trigger mode or Stage File with a Connectivity Agent.

Option D: Delete File
Supported:Deleting a file on the FTP server (e.g., /archive/oldfile.txt) is a standard Invoke operation, often used for cleanup after processing.
Option E: Download File
Supported:Downloading retrieves a file to OIC for further processing, similar to Read File but typically implies storing it locally in the integration flow (e.g., staging it).
Why C is the answer:The Invoke role focuses on discrete actions (write, read, delete, download), not iterative tasks like segmented reading, which requires a polling mechanism better suited to Trigger roles or Stage File actions.
Edge Case:If you need segmented reading from an FTP server, you'd download the file first using Invoke, then use a Stage File action to process it in segments- a workaround, not a direct capability.
Use Case Example:An integration writing a sales report to FTP (A), downloading a log file (E), and deleting an old backup (D) works fine, but attempting to read a 10GB file in segments (C) fails in Invoke mode.

NEW QUESTION # 50
You have a use case that requires a large data extract, which is more than 10MB, to be processed within an Oracle Integration Cloud (OIC) integration. Which are three valid options?

- A. Retrieve the file by invoking a SOAP API, which sends the document as an MTOM attachment, and make it available for processing using a Stage File action.
- B. Upload the file to the OIC file server, and then use an FTP adapter Download File operation, which makes it available for processing using a Stage File action.
- C. Retrieve the file by invoking a SOAP API, which sends Base64 encoded data within the SOAP body, and then decode the data and make it available for processing using a Stage File action.
- D. Send the file as a multipart attachment to an OIC integration using a REST trigger, and make it available for processing using a Stage File action.
- E. Retrieve the file from an external endpoint using APIs that support application/blob as content type, and make it available for processing using a Stage File action.

Answer: A,D,E

Explanation:
Comprehensive and Detailed Explanation:
Handling large files (>10MB) in OIC requires efficient mechanisms to avoid memory issues. Let's analyze each option:
Option A:True-REST trigger with multipart attachments is ideal for inbound large files, processed via Stage File.
Option B:False-Base64 in SOAP body bloats data (33% overhead), risking memory limits for >10MB files.
Option C:True-MTOM optimizes SOAP attachments, suitable for large files, processed with Stage File.
Option D:True-APIs returning application/blob handle binary data efficiently, staged for processing.

NEW QUESTION # 51
In Oracle Integration Cloud (OIC) Process, you create web forms to interact with end users. As part of creating a web form, you add its controls, configure its data, and define form behavior.
Which statement is true about creating web forms?

- A. You can assign one or more stylesheets and only one presentation to a web form.
- B. You can assign only one style sheet and one or more presentations to a web form.
- C. You can assign one or more stylesheets and one or more presentations to a web form.
- D. You can assign only one style sheet and only one presentation to a web form.

Answer: C

Explanation:
You can assign multiple stylesheets and presentations to a web form in OIC, allowing for more dynamic customization of both the appearance (stylesheets) and content structure (presentations).

NEW QUESTION # 52
Which statement about the Oracle Integration (OIC) connectivity agent is NOT valid?

- A. The connectivity agent can use Basic Authentication or OAuth 2.0 token-based authentication when invoking OIC endpoints.
- B. You can create up to five agent groups for each OIC instance.
- C. You must create an agent group before you can run the connectivity agent installer.
- D. Creating the agent group automatically creates an OAuth client application.

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
Agent Facts:
B:False-no auto-OAuth creation.

NEW QUESTION # 53
You are assigned to review the specifications of the SOA composite applications that have been deployed to your SOA Cloud Service instance. Part of this analysis requires you to catalog the Service Component Architecture (SCA) components that are implemented within each composite application.
Which is a valid SCA component in an Oracle SOA composite application?

- A. MFT Adapter
- B. Mediator
- C. BAM Adapter
- D. B2B Agreement

Answer: B

Explanation:
A Mediator is a valid SCA component in an Oracle SOA composite application. Mediators are used for routing messages, transforming data, and implementing business logic within the integration flow. They provide flexibility in manipulating messages before they reach their destination service.
Incorrect Answers:
BAM Adapter: While OIC offers Business Activity Monitoring (BAM), it's not an SCA component itself. BAM functionality is typically accessed through integration with external tools.
B2B Agreement: B2B Agreements define message exchange protocols and security settings for Business-to-Business communication. They are not SCA components but are managed within OIC for integrations.
MFT Adapter: MFT (Managed File Transfer) functionality might be used within OIC, but the adapter itself wouldn't be a core SCA component. It would likely be referenced within a composite for file transfer operations.
Split-Join: This functionality is not directly represented as a separate SCA component. It's achieved through features within other SCA components like BPEL processes or Mediators for message branching and joining.

NEW QUESTION # 54
.....

Our 1Z0-1042-25 learning materials will help you circumvent those practice engine with low quality and help you redress the wrongs you may have and will have in the 1Z0-1042-25 study quiz before heads. That is the reason why we make it without many sales tactics to promote our 1Z0-1042-25 Exam Braindumps. And our 1Z0-1042-25 training prep is regarded as the most pppular exam tool in the market and you can free download the demos to check the charming.
