Pass-Sure Updated JN0-253 CBT | Amazing Pass Rate For JN0-253: Mist AI, Associate (JNCIA-MistAI) | Useful JN0-253 Pdf Format

In order to make you have a deeper understanding of what you are going to buy, we offer you free demo for JN0-253 training materials. We recommend you have a try before buying. If you are quite content with the JN0-253 training materials, just add them into your cart and pay for them. You will get the downloading link and password and you can start your learning right now. In addition, we have online and offline chat service stuff who possess the professional knowledge of the JN0-253 Exam Dumps, if you have any questions, just contact us.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which two settings would you configure in a Mist radio frequency (RF) template? (Choose two.)

- A. channel width per Wi-Fi band
- B. band steering setting
- C. data rates
- D. transmit power

Answer: A,D

NEW QUESTION # 43

What are two user roles that you are allowed to assign to a new account? (Choose two.)

- A. root
- B. guest
- C. installer
- D. network admin

Answer: C,D

Explanation:

Installer: The installer role is designed for users who need access to configure and deploy Mist devices. This role typically has the necessary permissions to set up and manage devices but with limited access to other administrative functions.

Network Admin: The network admin role provides comprehensive access to manage network settings, monitor performance, and configure policies. This role is essential for users responsible for the overall network administration and maintenance.

NEW QUESTION # 44

What is used in Wireless Assurance to evaluate information about possible network faults?

- A. machine learning
- B. tcpdump
- C. syslog analysis
- D. SNMP

Answer: A

Explanation:

Machine Learning in Wireless Assurance: Mist's Wireless Assurance uses machine learning to analyze telemetry data and identify potential network issues. This approach allows for proactive identification and resolution of faults, improving overall network reliability and performance.

NEW QUESTION # 45

What does the "Exceeded" status mean for a subscription?

- A. The allowed usage within the subscription has been surpassed.
- B. The subscription exceeds the number of maximum allowable APs.
- C. The subscription has been cancelled.
- D. The subscription is nearing its expiration date.

Answer: A

Explanation:

The "Exceeded" status for a subscription means that the allowed usage defined within the subscription has been surpassed. This typically refers to exceeding limits such as the number of devices, data usage, or other metrics specified in the subscription plan. Exceeding these limits may require action such as upgrading the subscription plan to accommodate the additional usage.

NEW QUESTION # 46

Which two statements are correct about Juniper Mist subscriptions? (Choose two.)

- A. Subscriptions are not associated with a specific device serial number.
- B. If a device fails and is removed from the network, you must manually transfer the subscription to the new device before installing.
- C. Subscriptions are associated with a specific device serial number.
- D. If a device fails and is removed from the network, the subscription will automatically apply to the new device when added.

Answer: A,D

Explanation:

In the Juniper Mist Cloud licensing model, subscriptions represent service entitlements that enable specific features such as Wireless Assurance, Wired Assurance, WAN Assurance, Marvis Virtual Network Assistant, and Premium Analytics. These subscriptions are managed at the organization level and are not permanently tied to individual hardware units.

According to the Juniper Mist Licensing and Subscription Management Guide, subscriptions are:

"Cloud-based entitlements associated with an organization, not bound to specific device serial numbers.

Devices draw from the subscription pool dynamically."

This design allows flexibility and simplifies device replacement or scaling:

* When a new device (for example, an access point or switch) is added to the organization, the subscription is automatically assigned to it from the available pool.

* If a device is removed or fails, the subscription is automatically released and reassigned to a replacement unit—no manual transfer is required.

Therefore:

* A is correct because subscriptions are not linked to a single device's serial number.

* B is correct because subscriptions automatically reapply when replacement devices are onboarded.

C and D are incorrect because Juniper Mist subscriptions are organization-based, not hardware-bound, and require no manual reassignment after device failure or replacement.
