

Wir machen Workday-Prism-Analytics leichter zu bestehen!

What is Workday Prism Analytics?

Wenn Sie eine gute Lernwebsite suchen, die Ihnen hilft, die Workday-Prism-Analytics Prüfung zu bestehen, ist Fast2test die beste Wahl. Per Fast2test können Sie die Spitzenfertigkeiten in der IT-Branche meistern und die Workday Workday-Prism-Analytics Zertifizierungsprüfung leicht bestehen. Es ist allen bekannt, dass diese Prüfung schwer zu bestehen ist. Und die Erfolgsquote für die Prüfung ist sehr niedrig. Aber Sie können geeignete Lernhilfe und Fragen und Antworten zur Workday Workday-Prism-Analytics Zertifizierungsprüfung von Fast2test wählen. Diese Schulungsunterlagen sind nicht nur vollständig, sondern umfasst auch viele Wissensgebiete. Ihre Ähnlichkeit mit den echten Prüfungen ist sehr hoch. Das wird von der Praxis bewiesen. Wenn Sie die Workday Workday-Prism-Analytics Zertifizierungsprüfung bestehen wollen, wählen Sie doch Fast2test. Ganz richtig!

Fast2test hat vielen IT-Zertifizierungskandidaten geholfen. Und Fast2test bekommt gute Bewertung von den Kandidaten. Die Erfolgsquote von Fast2test Prüfungsfragen erreicht 100%, was auch die Tatsache von vielen Kandidaten geprüft werden. Wenn Sie sich sehr müde für die Vorbereitung der Workday Workday-Prism-Analytics Zertifizierungsprüfung fühlen, können Sie die Workday-Prism-Analytics Prüfungsunterlagen nicht ignorieren. Das ist ein Werkzeug für die hocheffektive Vorbereitung der Workday Workday-Prism-Analytics Prüfung. Es kann Ihre Effektivität am größten Teil erhöhen.

Workday-Prism-Analytics echter Test & Workday-Prism-Analytics sicherlich-zu-bestehen & Workday-Prism-Analytics Testguide

Es ist keine Neuheit, dass die Schulungsunterlagen zur Workday Workday-Prism-Analytics von Fast2test guten Ruf von den Kandidaten gewinnen. Das heißt auch, dass die Schulungsunterlagen zur Workday Workday-Prism-Analytics Zertifizierungsprüfung zuverlässig sind und den Kandidaten eher zum Bestehen der Prüfung verhelfen. Fast2test ist immer der Best-Seller im Vergleich mit den anderen Websites. Er wird von den anderen anerkannt und hat einen guten Ruf. Wenn Sie sich an der Workday Workday-Prism-Analytics Zertifizierungsprüfung beteiligen wollen, wählen Sie doch Fast2test. Sie werden sicher bekommen, was Sie wollen. Wenn Sie keine Chance verpassen möchten, würden Sie auch nicht bereuen. Wenn Sie ein professioneller IT-Experte werden wollen,

schicken Fast2test in den Warenkorb.

Workday Pro Prism Analytics Exam Workday-Prism-Analytics Prüfungsfragen mit Lösungen (Q28-Q33):

28. Frage

You are adding a Join stage and choose Join type of Left Outer Join, causing Workday to search for a matching row in the imported pipeline. What happens if no matching rows exist?

- A. A duplicate row will be generated.
- B. Included fields from both pipelines will have NULL values.
- C. The row will be omitted.
- **D. Included fields from the imported pipeline will have NULL values.**

Antwort: D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Left Outer Join in a Join stage includes all rows from the primary pipeline (the left pipeline) and attempts to match them with rows from the imported pipeline (the right pipeline) based on the join condition. According to the official Workday Prism Analytics study path documents, if no matching rows exist in the imported pipeline for a given row in the primary pipeline, the row from the primary pipeline is still included in the output, but the fields from the imported pipeline will have NULL values. This behavior ensures that all data from the primary pipeline is retained, while the absence of a match in the imported pipeline is represented by NULLs for the corresponding fields.

The other options are incorrect:

- * A. A duplicate row will be generated: A Left Outer Join does not generate duplicate rows; duplicates would occur only if multiple matches exist in the imported pipeline, which is not the case here.
- * B. The row will be omitted: In a Left Outer Join, rows from the primary pipeline are never omitted, even if no match is found; this behavior is specific to an Inner Join.
- * D. Included fields from both pipelines will have NULL values: Only the fields from the imported pipeline will have NULL values; the fields from the primary pipeline retain their original values.

This behavior of Left Outer Join ensures that all records from the primary pipeline are preserved, with NULLs indicating the absence of matching data from the imported pipeline.

29. Frage

What report can you run to edit and maintain your Prism import and publish schedules?

- A. Prism Management Console
- **B. Scheduled Future Processes**
- C. Prism Usage
- D. Prism Activities Monitor

Antwort: B

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, managing schedules for importing data into tables or publishing datasets as Prism data sources is a key administrative task. According to the official Workday Prism Analytics study path documents, the Scheduled Future Processes report (option A) is the tool used to edit and maintain Prism import and publish schedules. This report provides a centralized view of all scheduled processes in Workday, including Prism-related tasks such as Data Change tasks (for imports) and dataset publish schedules. Users can access this report to view, edit, or cancel scheduled processes, ensuring that data imports and publishes occur at the desired frequency and time.

The other options are incorrect:

- * B. Prism Management Console: The Prism Management Console provides an overview of Prism activities and resources but does not allow for editing or maintaining schedules.
- * C. Prism Activities Monitor: This report monitors the status of Prism activities (e.g., running or completed tasks) but does not

manage schedules.

* D. Prism Usage: The Prism Usage report tracks usage metrics for Prism Analytics but does not handle scheduling tasks.

The Scheduled Future Processes report is the correct tool for managing Prism import and publish schedules, ensuring efficient data updates.

30. Frage

What security domain enables the ability to create a dataset?

- A. Prism Datasets: Publish
- **B. Prism Datasets: Create**
- C. Prism: Tables Create
- D. Prism: Manage Data Source

Antwort: B

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, the ability to create a dataset is governed by specific security domains within the Prism Analytics functional area. According to the official Workday Prism Analytics study path documents, the security domain that explicitly enables users to create datasets is the "Prism Datasets: Create" domain.

This domain grants users the necessary permissions to initiate the creation of both base and derived datasets within the Prism Analytics Data Catalog.

The process of creating a dataset involves defining the metadata and processing logic to manipulate data, which can include Workday or external (non-Workday) data sources. The "Prism Datasets: Create" domain ensures that only authorized users, such as Prism data analysts or administrators, can perform this task, aligning with Workday's configurable security framework. Other domains, such as "Prism Datasets: Publish," are responsible for publishing datasets to make them available as Prism Data Sources for reporting, while

"Prism: Manage Data Source" pertains to managing the data sources themselves, not creating datasets.

Similarly, "Prism: Tables Create" is related to creating tables, which is a distinct entity from datasets in Prism Analytics.

This distinction is critical, as datasets and tables serve different purposes in the data management workflow.

Datasets include metadata and a subset of example rows, while tables contain metadata and all data rows. The

"Prism Datasets: Create" domain is specifically designed to control access to dataset creation, ensuring secure and governed data preparation.

31. Frage

What task or report should you access to view a Prism data source?

- A. Edit Data Source Security task
- B. View Dataset Details report
- C. Edit Dataset Transformations task
- **D. View Prism Data Source report**

Antwort: D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Prism data source represents the published dataset that is available for reporting and analytics within the Workday ecosystem. According to the official Workday Prism Analytics study path documents, the "View Prism Data Source" report is the specific task or report designed to allow users to view the details of a Prism data source. This report provides comprehensive information about the data source, including its metadata, structure, and associated attributes, enabling users to understand the data available for reporting purposes.

The other options do not serve this purpose. The "Edit Dataset Transformations task" is used to modify the transformation logic applied to a dataset, not to view a data source. The "Edit Data Source Security task" focuses on managing security settings for a data source, such as access permissions, rather than viewing its contents. Similarly, the "View Dataset Details report" provides information about a dataset (including its metadata and sample rows) but does not specifically address the published Prism data source, which is a distinct entity created after a dataset is published.

The "View Prism Data Source" report is the correct choice as it directly aligns with the need to inspect the properties and structure of a Prism data source, ensuring users can verify its suitability for reporting or integration with Workday reports.

32. Frage

A report that uses a Prism data source that you created has a brand new requirement that Expense Partner by Location should only see expense reports for workers for the locations they support. Given that you have the Location Hierarchy (instance) field in your dataset used for publishing, how can you adjust to meet the requirement?

- A. Run the Edit Data Source Security task to update row-level security.
- B. Run the Edit Data Source Security task to update the Securing Entities.
- C. Run the Edit Data Source Security task to update the Securing Entities and then republish the PDS.
- **D. Run the Edit Data Source Security task to update row-level security and then republish the PDS.**

Antwort: D

Begründung:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, restricting access to specific rows in a Prism data source (PDS) based on a field like Location Hierarchy for users such as Expense Partners requires implementing row-level security.

According to the official Workday Prism Analytics study path documents, to meet the requirement that Expense Partners only see expense reports for the locations they support, you should run the Edit Data Source Security task to update row-level security and then republish the PDS (option B).

The Location Hierarchy (instance) field in the dataset can be used to define row-level security rules, ensuring that each Expense Partner only sees data for their assigned locations. The Edit Data Source Security task allows you to configure row-level security by mapping the Location Hierarchy field to the user's security profile (e.g., their assigned locations). After updating the security settings, republishing the Prism data source is necessary to apply the changes, ensuring the updated security rules take effect in the reports that use the data source.

The other options are incorrect:

* A. Run the Edit Data Source Security task to update the Securing Entities and then republish the PDS:

Securing Entities are used to control overall access to the data source (e.g., via security domains), not to restrict data at the row level based on a field like Location Hierarchy.

* C. Run the Edit Data Source Security task to update row-level security: While updating row-level security is correct, the changes will not take effect in reports until the data source is republished, making this option incomplete.

* D. Run the Edit Data Source Security task to update the Securing Entities: As with option A, updating Securing Entities does not address row-level security for location-based restrictions.

Updating row-level security and republishing the PDS ensures that Expense Partners only see the relevant expense reports, meeting the requirement while maintaining security governance.
