

Valid NSE8_813 Test Cram - NSE8_813 PDF Questions

In the PDF version, the Fortinet NSE 8 - Recertification Exam (NSE8_813) exam questions are printable and portable. You can take these Fortinet NSE8_813 pdf dumps anywhere and even take a printout of Fortinet NSE 8 - Recertification Exam (NSE8_813) exam questions. The PDF version is mainly composed of real Fortinet NSE8_813 Exam Dumps. ExamsLabs updates regularly to improve its Fortinet NSE 8 - Recertification Exam (NSE8_813) pdf questions and also makes changes when required.

Fortinet NSE 8 - Recertification Exam Sample Questions (Q164-Q169):

NEW QUESTION # 164

You must analyze an event that happened at 20:37 UTC.

```
date=2022-07-11 time=10:37:08 eventtime=1657571829014946018 tz="-1000" logid="0000000022"
type="traffic" subtype="forward" level="notice" vd="root" srcip=10.100.91.12 srcport=51542
srcintf="port3" srcintfrole="lan" dstip=8.8.8.8 dstport=53 dstintf="port1" fstintfrole="wan"
srcuuid="2b4ee3fc-0124-51ed-7898-eaeb990b1ec" dstuuid="2b4ee3fc-0124-51ed-7898-eaeb990b1ec"
srccountry="Reserved" dstcountry="United States" sessionid=402530 proto=17 action="accept"
policyid=13 policytype="policy" poluuid="766bb040-0124-51ed-ca3a-eacce4ed289f" policyname="LAN to
Internet" service="DNS" trandisp="snat" transip=10.100.64.101 transport=51542 appid16195 app="DNS"
appcat="Network.Service" apprisk="elevated" applist="default" duration=180 setbyte=45 rcvdbyte=120
sentpkt=1 rcvdpkt=1 srchwvendor="Fortinet" devtype="Router" srcfamily="FortyGate" osname="FortyOS"
mastersrcmac="00:09:0f:00:03:01" srcmac="00:09:0f:00:03:01" srcserver=0
```

One log relevant to the event is extracted from FortiGate logs:

The devices and the administrator are all located in different time zones Daylight savings time (DST) is disabled.

- The FortiGate is at GMT-10:00
- The FortiAnalyzer is at GMT-08:00
- Your browser local time zone is at GMT-03:00

You want to review this log on FortiAnalyzer GUI, what time should you use as a filter?

- A. 20:37:08
- B. 10:37:08
- C. 12:37:08
- D. 17:37:08

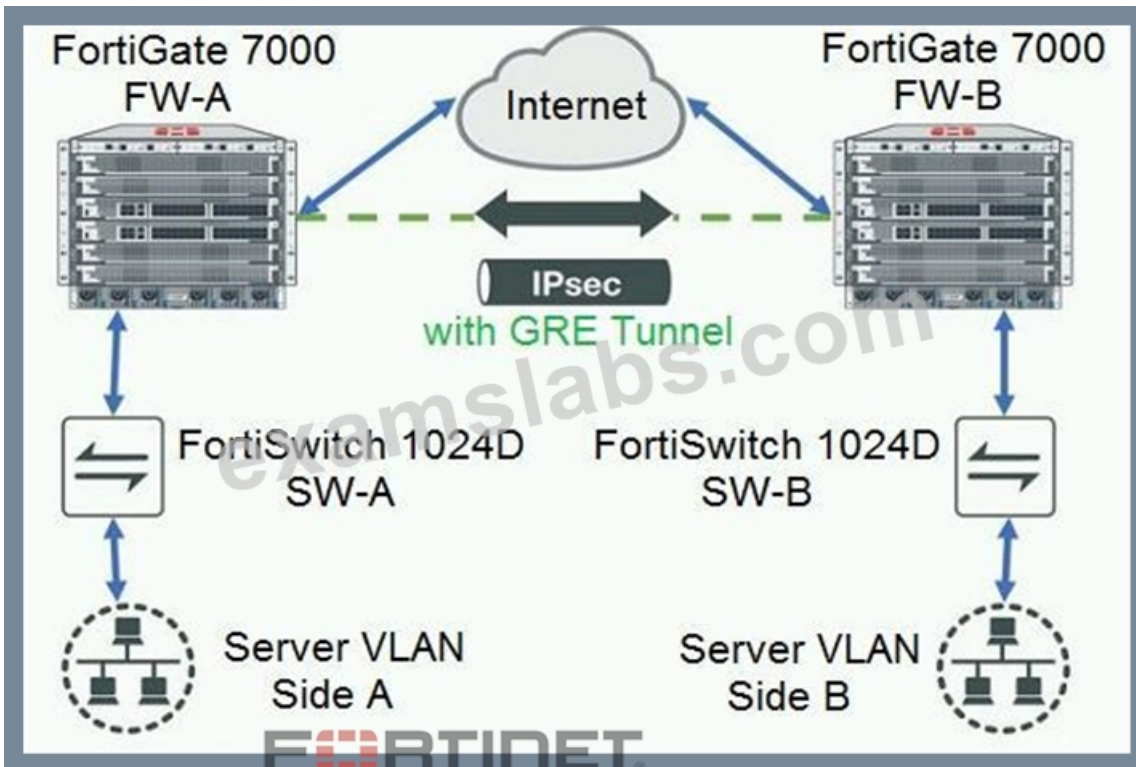

Answer: C

Explanation:

NEW QUESTION # 165

Refer to the exhibit.

You have two data centers with a FortiGate 7000-series chassis connected by VPN. All traffic flows over an established generic routing encapsulation (GRE) tunnel between them. You are troubleshooting traffic that is traversing between Server VLAN A and Server VLAN B. The performance is lower than expected and you notice all traffic is only going through the FPM in slot 3 while nothing through the FPM in slot 4.

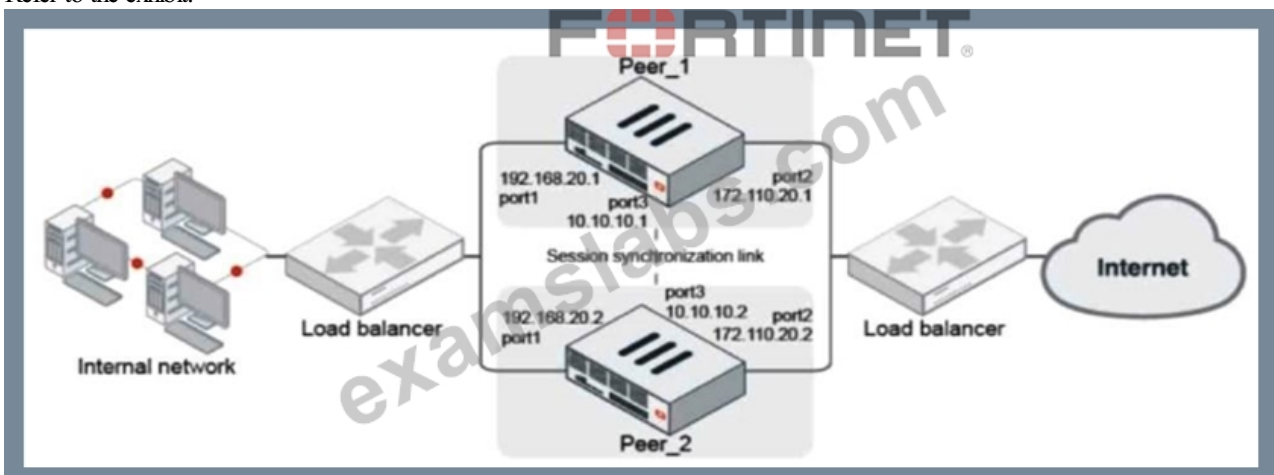

Referring to the exhibit, which statement is true?

- A. There is no way to load-balance the traffic in this scenario.
- **B. Configuring a load-balance flow-rule in the CLI will load-balance this traffic.**
- C. Removing traffic shaping from the firewall policy allowing this traffic will allow for load-balancing to the other module.
- D. Changing the algorithm to take source IP, destination IP and port into account will load balance this traffic to the other module.

Answer: B

NEW QUESTION # 166

Refer to the exhibit.

Given the exhibit, which two statements about FortiGate FGSP HA cluster behavior are correct?

(Choose two.)

- **A. You can run FortiGate Virtual Router Redundancy Protocol (VRRP) high availability in addition to FGSP simultaneously.**
- **B. Session synchronization occurs over Layer 3 by default, and if unavailable it will then try Layer 2.**

- C. You can selectively synchronize only specific sessions between FGSP cluster members.
- D. Cluster members will upgrade one at a time and failover during firmware upgrades.

Answer: A,B

NEW QUESTION # 167

Refer to the exhibit.

```
FGT # get router info bgp network 10.10.10.0
Paths: (2 available, no best path)
Local
10.20.1.4 (inaccessible) from 10.21.16.15 (10.21.116.20)
Local
10.20.1.4 (inaccessible) from 10.21.16.16 (10.21.116.20)

FGT # get router info routing-table details 10.20.1.4
Routing entry for 10.20.1.0/28
Known via "bgp", distance 200, metric 0, best
Last update 07w2d19h ago
* 10.21.116.28 (recursive via 10.21.161.21)
```

A customer reports that they are not able to reach subnet 10.10.10.0/24 from their FortiGate device. Based on the exhibit, what should you do to correct the situation?

- A. Enable additional-path feature
- B. Enable recursive resolution for BGP routes
- C. Enable iBGP multipath
- D. Enable next-hop-self feature

Answer: B

Explanation:

The exhibit indicates that subnet 10.10.10.0 is not in the routing table and marked as "inaccessible" in the BGP table. This happens because the next-hop for the BGP route (10.20.1.4) is itself not resolvable (recursive resolution is not happening). Enabling recursive resolution ensures that the FortiGate can resolve the next-hop of the BGP route via an intermediate route, allowing the subnet 10.10.10.0 to become reachable.

NEW QUESTION # 168

Refer to the exhibit. You need to create a base SD-WAN configuration that includes SD-WAN rules and Performance SLAs for spoke sites with various connectivity types. It needs to be done in a way that can be easily applied to new sites with a minimum amount of change.

Interface Members

ID	Interface Member	Status	Gateway	Cost
<input type="checkbox"/>	virtual-wan-link			

How should you create the SD-WAN zones?

- A. With members and assign overlay interfaces
- B. With members and assign interfaces but do not specify a gateway
- C. With members without interface assignments
- D. With no members configured

Answer: A

NEW QUESTION # 169

.....

ExamsLabs's Fortinet NSE8_813 web-based and desktop practice tests provide you with an Fortinet actual test scenario, allowing you to experience the NSE8_813 final test conditions. Customizable Fortinet NSE8_813 Practice Tests (desktop and web-based) allow you to change the time and quantity of Fortinet NSE8_813 practice questions.
