## Answers SAFe-Practitioner Free | Latest SAFe-Practitioner Exam Pdf

It is universally accepted that in this competitive society in order to get a good job we have no choice but to improve our own capacity and explore our potential constantly, and try our best to get the related SAFe-Practitioner certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many SAFe-Practitioner Preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves.

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) Exam is a globally-recognized certification that validates the knowledge and skills required to lead an enterprise in the SAFe® 5.0 framework. SAFe 5 Practitioner Exam aims to train and certify Scrum masters, product managers, Agile coaches, and other Agile practitioners who want to adopt the SAFe framework to achieve business agility.

## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q92-Q97):

### NEW QUESTION # 92

When is the Acceptance Criteria for Features typically defined?

- A. during Iteration Planning
- B. during PI Planning
- C. during Program Backlog refinement
- D. during Inspect & Adapt

**Answer: C**

### NEW QUESTION # 93

What else does the SAFe principle, "unlock the intrinsic motivation of knowledge workers", require besides purpose and minimum possible constraints?

- A. Incentive-based compensation
- **B. Autonomy**
- C. Innovation
- D. Transparency

#### Answer: B

Explanation:

According to the SAFe principle, "unlock the intrinsic motivation of knowledge workers", knowledge workers need autonomy, mastery, and purpose to be motivated and creative. Autonomy means giving them the freedom to choose how to do their work, without micromanagement or excessive control. Mastery means providing them with opportunities to learn new skills and improve their craft. Purpose means aligning their work with a meaningful and inspiring vision. These three factors foster intrinsic motivation, which is the drive to perform an activity without any obvious external rewards. ### NEW QUESTION # 94

What event helps the team think about new stories prior to Iteration Planning

- A. Daily standup
- B. Iteration Review
- C. Iteration Retrospective
- **D. Backlog Refinement Session**

#### Answer: D

### NEW QUESTION # 95

What is one of the Product Owner's responsibilities?

- A. To foster normalized estimating within the team
- **B. To manage and prioritize the Team Backlog**
- C. To facilitate team meetings and drive Agile behavior
- D. To foster adoption of Agile technical practices

#### Answer: B

Explanation:

The Product Owner (PO) in the team is responsible for managing and prioritizing the Team Backlog, which is the single source of truth for the upcoming features of the system<sup>1</sup>. The PO works with the Product Manager, who owns the Vision and the Roadmap, to define and sequence the features in the Program Backlog<sup>2</sup>. The PO also collaborates with other POs in the Agile Release Train (ART) to manage dependencies and ensure alignment across teams<sup>3</sup>. The PO maintains and prioritizes the Team Backlog, which contains user stories, enablers, and other backlog items that the team needs to implement to deliver value to the customer<sup>4</sup>. The PO also participates in the backlog refinement sessions, where the team defines, discusses, estimates, and establishes acceptance criteria for the backlog items. ### NEW QUESTION # 96

What is one purpose of the System Demo?

- A. To evaluate the full PI
- B. To introduce new architectural designs
- C. To identify PI Objectives

- D. To demonstrate new functionality

**Answer: D**

### Explanation:

The System Demo is a significant event that provides an integrated view of new features for the most recent iteration delivered by all the teams in the Agile Release Train (ART). Each demo gives ART stakeholders an objective measure of progress during a Program Increment (PI) and the opportunity to give feedback on the solution. The System Demo is the one real measure of value, velocity, and progress of the fully integrated work across all the teams. The purpose of the System Demo is to demonstrate new functionality, not to evaluate the full PI, introduce new architectural designs, or identify PI Objectives. Those activities are done in other events, such as the Inspect and Adapt, the Architectural Runway, and the PI Planning. References: System Demo, System Demo - Scaled Agile Framework, Why System Demo Considered A Significant Event In SAFe? - Learnow, System Demo - Scaled Agile Framework.

## NEW QUESTION # 97

What is the measure of competence? Of course, most companies will judge your level according to the number of qualifications you have obtained.
