Qlik Sense System Administrator Certification Exam - 2022 Sample Questions (Q137-Q142):

NEW QUESTION # 137

Which of the following actions can an administrator take to troubleshoot performance issues in Qlik Sense?
(Select two)

- A. Restart the Qlik Sense Repository Service
- B. Analyze resource usage in the Operations Monitor
- C. Review the task execution logs in the QMC
- D. Disable data compression for Qlik Sense apps

Answer: B,C

NEW QUESTION # 138

A Qlik Sense administrator needs to grant access to an app for a specific group of users. Which feature in the QMC should be used to manage access control?

- A. Load Balancing Rules
- B. Security Rules
- C. Stream Management
- D. App Object Permissions

Answer: B

NEW QUESTION # 139

A system administrator installs Qlik Sense Enterprise and is testing the product with a small team of 10 users.

The users report that the page is NOT trusted on their machines and they receive a certificate warning message. When the system administrator tries to validate this feedback on the server, the administrator does NOT see the same issue.

The system administrator completes the following steps in the proxy configuration:

- Opens all necessary ports
- Checks in MMC that there is a personal certificate on the server
- Creates a DNS entry for an easier URL
- Tries to connect with various Internet browsers on different machines including mobile devices
- Adds the page to trusted sites in the Internet configurations
- Installs OpenSSL in the environment

Which steps should the system administrator take to resolve this issue?

- A. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) 2. Add the certificate to the personal local computer certificate store 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC
- B. 1. Generate a valid certificate for organizational needs using OpenSSL 2. Add the certificate to the personal certificate store of the Qlik Sense Service User 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC
- C. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) 2. Add the certificate to the personal certificate store of the Qlik Sense Service User 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC
- D. 1. Acquire a third-party certificate from a trusted root certificate authority (CA) including private key 2. Add the certificate to the personal local computer certificate store 3. Add the thumbprint of the third-party certificate to the proxy configuration in the QMC

Answer: C

NEW QUESTION # 140

When configuring Qlik Sense streams, what permission must be granted to a user to allow them to publish applications to the stream?

- A. Update
- B. Publish
- C. Read
- D. Export

Answer: B
