

Reliable Peoplecert DevOps-Foundation Braindumps Free & Reliable DevOps-Foundation Source

P.S. Free 2025 Peoplecert DevOps-Foundation dumps are available on Google Drive shared by ITExamSimulator:
<https://drive.google.com/open?id=18xwg5Ck-Who1s9nsHPbXSsGvOEabeilg>

The name of these formats are Peoplecert DevOps-Foundation PDF dumps file, desktop practice test software, and web-based practice test software. All these three Peoplecert Cloud DevOps-Foundation practice test formats are easy to use and perfectly work with all devices, operating systems, and web browsers. The DevOps-Foundation Pdf Dumps file is a simple collection of Real and Updated PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) exam questions in PDF format and it is easy to install and use.

To keep you updated with latest changes in the DevOps-Foundation test questions, we offer one-year free updates in the form of new questions according to the requirement of DevOps-Foundation real exam. Updated DevOps-Foundation vce dumps ensure the accuracy of learning materials and guarantee success of in your first attempt. Why not let our DevOps-Foundation Dumps Torrent help you to pass your exam without spending huge amount of money.

Reliable DevOps-Foundation Source | DevOps-Foundation Latest Test Question

Our evaluation system for DevOps-Foundation test material is smart and very powerful. First of all, our researchers have made great efforts to ensure that the data scoring system of our DevOps-Foundation test questions can stand the test of practicality. Once you have completed your study tasks and submitted your training results, the evaluation system will begin to quickly and accurately perform statistical assessments of your marks on the DevOps-Foundation Exam Torrent so that you can arrange the learning tasks properly and focus on the targeted learning tasks with DevOps-Foundation test questions.

Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Sharing, Shadowing and Evolving: This section of the exam measures the skills of IT operations specialists and covers the collaborative and adaptive elements of DevOps in enterprise settings. It explores leadership, typical barriers and risks, and outlines how organisations can evolve their DevOps practices through continuous learning, peer shadowing, and experience-based transformation.
Topic 2	<ul style="list-style-type: none"> • Culture, Behaviours, Operating Models: This section of the exam measures the skills of DevOps engineers and covers how to assess and evolve organisational culture in relation to DevOps transformation. It includes concepts such as Cultural Debt, Behavioural Models, and Organisational Maturity, helping professionals understand team dynamics and readiness for change.
Topic 3	<ul style="list-style-type: none"> • Key DevOps Practices: This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.
Topic 4	<ul style="list-style-type: none"> • Automation, Architecting DevOps Toolchains: This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI • CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

An organization is architecting a DevOps toolchain that includes products from both open source and proprietary software providers.

Which of the following is necessary for applications within the toolchain to connect efficiently and effectively?

- A. Containers
- B. Microservices
- **C. Application Programming Interfaces**
- D. Open source applications

Answer: C

Explanation:

A DevOps toolchain is an integrated set of tools that supports the entire software delivery lifecycle—planning, coding, building, testing, releasing, deploying, operating, and monitoring. Regardless of whether tools are open source or proprietary, their ability to work together depends on Application Programming Interfaces (APIs).

APIs define how different software components communicate and exchange data. In a DevOps context, APIs enable:

- * Automation by allowing tools to trigger actions in other tools
- * Data flow between systems (e.g., CI pipelines updating ticketing systems)
- * Integration across heterogeneous environments

A (open source applications) is about licensing, not integration. B (containers) package and run applications consistently but do not inherently integrate tools. D (microservices) is an architectural style for applications, not the integration mechanism between delivery tools.

Therefore, C—APIs—are essential for efficient, effective toolchain integration.

PeopleCert DevOps Foundation v3.6 - Toolchain Integration Principles

The DevOps Handbook- APIs as Integration Enablers

NEW QUESTION # 21

Which of the following dictates an organization's culture?

- **A. What people value and how they behave**
- B. The leadership style of its executives
- C. The vision of its founders

- D. Employees' commitment and loyalty to the company

Answer: A

Explanation:

Organizational culture is defined by shared values and behaviors-what people believe is important and how they act in practice.

PeopleCert notes that while founders' vision, leadership style, and employee commitment can influence culture, the actual culture is visible in the consistent behaviors and priorities of the organization's members.

Therefore, B-what people value and how they behave-is the most accurate description of what dictates culture.

References:

PeopleCert DevOps Foundation v3.6 - Culture Definition

Edgar Schein -Organizational Culture and Leadership

NEW QUESTION # 22

The Deming Cycle (Plan-Do-Check-Act) plays a key role in which Lean practice?

- A. Value Stream Mapping
- B. Andon cord
- C. Improvement Kata
- D. DOWNTIME

Answer: C

Explanation:

The Deming Cycle (Plan-Do-Check-Act) is foundational to continuous improvement in Lean, and is specifically applied in the Improvement Kata practice:

* Improvement Kata: A structured routine for continuous, incremental improvement based on scientific thinking (PDCA).

* Value Stream Mapping and Andon cord are Lean practices, but they don't directly reference PDCA as the core mechanism.

Extract-style reference:

"The Improvement Kata incorporates the Deming cycle (Plan-Do-Check-Act) to drive small, rapid cycles of change, helping teams to experiment, learn, and adjust."

-Toyota Kata, Mike Rother

PeopleCert DevOps Foundation v3.6: Cites PDCA as integral to continuous improvement and Lean

/DevOps adoption.

NEW QUESTION # 23

What is NOT a feature of Safety Culture?

- A. Valuing incidents
- B. Giving thanks for learning opportunities
- C. Blameless post-mortems
- D. Creating Single Points of Failures (SPOFs)

Answer: D

Explanation:

Creating Single Points of Failure (SPOFs) is not a feature of Safety Culture-in fact, it's the opposite.

* Safety Culture in DevOps promotes blameless post-mortems, valuing incidents as learning opportunities, and thanking contributors for uncovering weaknesses.

* SPOFs increase risk and discourage experimentation.

Extract-style reference:

"Safety Culture is built on blamelessness, psychological safety, and learning from failure, not punishment.

SPOFs are an anti-pattern that increases fragility."

-The DevOps Handbook

PeopleCert DevOps Foundation v3.6: Stresses the importance of a safe, collaborative environment for innovation.

NEW QUESTION # 24

A major retail organization is experiencing declining sales and wants to boost its online business. Teams within Dev and Ops have

been independently experimenting with DevOps practices to speed up changes to the company's website but have yet to see tangible benefits.

What can the IT management team do in this situation to achieve bottom-line benefits with DevOps?

- A. Encourage intelligent risk taking
- **B. Create a shared vision, goals and incentives**
- C. Promote a customer (outside-in) focus
- D. Build a high-trust culture

Answer: B

Explanation:

When independent Dev and Ops teams adopt DevOps practices without coordination, results are limited.

* The most important action IT management can take is to create a shared vision, goals, and incentives.

* Shared goals align everyone to business outcomes, reduce conflicting priorities, and foster real collaboration.

Why not the others?

* Intelligent risk taking (A) and high-trust culture (C) are important, but without a shared vision, teams won't move in the same direction.

* Customer focus (D) is essential, but won't create cross-team alignment by itself.

Reference/Extract:

"Creating a shared vision and goals across Dev and Ops is critical to breaking down silos and delivering end-to-end value to the business."

-The Phoenix Project, Accelerate, and PeopleCert DevOps Foundation v3.6 Section 3.3

NEW QUESTION # 25

.....

Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the DevOps-Foundation prep guide in 5-10 minutes, so you can get our DevOps-Foundation exam questions at first time. And then you can start your study after downloading the DevOps-Foundation exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our DevOps-Foundation real study dumps we guarantee that you won't be regret of your decision. Helping our candidates to pass the DevOps-Foundation exam and achieve their dream has always been our common ideal. We believe that your satisfactory is the drive force for our company.
