A good job requires a certain amount of competence, and the most intuitive way to measure competence is whether you get a series of the test Analytics-Con-201 certification and obtain enough qualifications.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q57-Q62):

NEW QUESTION # 57
Which recommended technique should a CRM Analytics consultant
use to access CRM Analytics data from a remote app or website?

- A. Use HTTPS to call the /wave/query API, supplying an encoded SAQL query as a parameter.
- B. Use an iFrame to embed the Salesforce page in a remote site.
- C. Export the data to a CSV file and load it on the remote site.

Answer: A

NEW QUESTION # 58
The CRM Analytics consultant at Universal Containers (UC) has set up data sync for the Salesforce Opportunity object with the Amount currency field added. This is being used in multiple datasets and dashboards, as UC is a multi-currency organization.
The currency used in Salesforce records is set up in GBP but the data on the dashboard is converting to USD.
Conversion logic is not set up on any of the recipes.
Why is the currency converting?

- A. The ANS local currency is set up as USD.
- B. The org corporate currency is set up as USD.
- C. The Integration User currency is set up as USD.

Answer: B

Explanation:
In Salesforce CRM Analytics, when dealing with multi-currency environments, the system relies on the organization's corporate currency setting for reporting, unless explicitly overridden. In this case, even though the Opportunity data is stored in GBP in Salesforce, the dashboards are showing USD because the corporate currency for the org is set to USD. This behavior is expected unless currency conversion logic is implemented in the datasets or recipes.
The corporate currency serves as the default for currency fields in datasets and dashboards unless configured otherwise. This can be confirmed under the "Manage Currencies" settings in Salesforce.

NEW QUESTION # 59
A CRM Analytics consultant has enabled data sync manually in an org that uses dataflows/recipes. The client says that the dataflow/recipe fails each time it starts running.
What is causing the dataflow/recipe to fail?

- A. Dataflows/recipes with sfdcDigest nodes fail until sync has run for the first time.
- B. Dataflowsysrecipes with computeExpression nodes fail until syne has run for the first time.
- C. Dataflows/recipes with Augment nodes fail until sync has run for the first time.

Answer: A

NEW QUESTION # 60
Cloud Kicks (CK) has a dashboard that is still showing 10 former account managers. CK has since expanded, and some have moved from their former roles. CK wants the dashboard to reflect current account managers and stay up to date as new team members join.
How should the CRM Analytics developer accomplish this?

- A. Create @ Watchlist and when the number of account manager updates, update the dashboard to reflect the same.
- B. Build a report and get notified when a new account manager joins, and then edit the dashboard to add the account manager.
- C. Use a Repeater Widget that updates automatically as the data flows through the system.

Answer: C

Explanation:
TheRepeater Widgetin CRM Analytics allows dynamic updates to be reflected on the dashboard automatically as data flows are updated. This means that as new account managers join or existing account managers change roles, the data in the widget will automatically reflect the latest information without manual updates. This is the most efficient way to keep the dashboard up-to-date with the current list of account managers.

NEW QUESTION # 61
A CRM Analytics consultant is asked to make changes to the current sales dashboard at Cloud Kicks. The dashboard is crucial to track the daily sales performance of the company and needs to be available for other users while the consultant works on the changes.
How should the consultant proceed to update the dashboard?

- A. Wait for a period of least usability or the dashboard to edit it.
- B. Clone the dashboard to a new one, apply the changes, share the new dashboard with the users, and delete the old one.
- C. Self assign as a dashboard publisher and make the changes to the dashboard in draft mode while maintaining a previous version live.

Answer: C

NEW QUESTION # 62

......

Now, you should do need to get the exam question sets from year to year and reference materials that is related to Salesforce Analytics-Con-201 certification exam.
