At the same time, we believe that our B2C-Commerce-Architect training quiz will be very useful for you to have high quality learning time during your learning process. Your success is 100% guaranteed with our B2C-Commerce-Architect learning guide!

### Salesforce Certified B2C Commerce Architect Sample Questions (Q66-Q71):

#### NEW QUESTION # 66

A Retailer has a single storefront site and a Product Management System (PIM). The PIM is Generating the master catalog and storefront categorization catalog every day and it uploading them to SFTP how should the Architect configure the import job flows following the best practices?

- A. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the storefront catalog 3rd flow Is global to Import the master catalog.
- B. 1st flow is global to download the files from SFTP. 2nd flow is global to import the master catalog. 3rd flow Is global to Import the storefront catalog.
- C. 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog 3rd flow K global to Import the master catalog.
- D. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the master catalog. 3rd flow K global to Import the storefront catalog.

**Answer: C**

Explanation:

For optimal job flow concerning data import from a PIM system, the sequence should begin with downloading files globally from an SFTP site, followed by importing data into the B2C Commerce platform:

First flow: Download files, ensuring all required files are available and ready for import.

Second flow: Import the storefront catalog which likely has dependencies on the master catalog but is generally smaller and can be updated more rapidly.

Third flow: Import the master catalog, as it typically contains the foundational data needed for various site functionalities.

This sequence respects data dependency and integrity, ensuring that the storefront reflects the most current and accurate information after all relevant data is imported.

#### NEW QUESTION # 67

A customer service team raised a new business requirement that requires a multi-cloud solution design between B2C Commerce, Service Cloud, and Marketing Cloud. A Solution Architect has been hired to lead the design of the multi-cloud solution.

Which two actions should the Solution Architect take to accurately capture requirements and deliver the solution overview?

Choose 2 answers

- A. Conduct discovery workshops and upon completion present the solution back to the design authority or executive stakeholders to validate the solution.
- B. Conduct discovery workshops to create a user acceptance testing document and invite business owners, each cloud technical architect, and implementation development team.
- C. Include functional subject matter experts and technical resources across multiple discovery workshops, grouped by business function to ensure all requirements are captured.
- D. Include the customer service team so that they can provide detailed user stories prior to the discovery workshops.

**Answer: B,C**

#### NEW QUESTION # 68

A third party survey provider offers both an API endpoint for individual survey data and an SFTP server endpoint that can accept

batch survey data. The initial implementation of the integration includes

1. Marking the order as requiring a survey before order placement
2. On the order confirmation page, the survey form is displayed for the customer to fill
3. The data is sent to the survey provider API, and the order is marked as not requiring a survey. Later it was identified that this solution is not fit for purpose as the following issues and additional requirements were identified:
  1. If the API call fails, the corresponding survey data is lost. The Business requires to avoid data loss.
  2. Some customers skipped the form. The Business requires sending a survey email to such customers.
  3. The Order Management System (OMS) uses a non-standard XML parser it did not manage to parse orders with the survey, until the survey attribute was manually removed from the xml.

How should the Architect address the issues and requirements described above?

- A. Create a custom object to store the survey data. Send to the API endpoint using a job. On success, remove the custom object. On failure, send the survey data with API from the next execution of the same job. Use the custom object to send emails for the cases when the survey was skipped.
- **B. Create a custom object when the survey is required. Send to the API endpoint in real-time. On success, remove the object. On failure, capture the survey data in the custom object and later reprocess with a job. Use the custom object to send emails for the cases when survey was skipped.**
- C. Create a custom session attribute when the survey is required. Send to the API endpoint in real-time. On failure, capture the survey data in the session and reprocess, use the session attribute to send emails for the cases when survey was skipped.
- D. Send the survey data to the API endpoint in real-time until the survey data is successfully captured. Instruct the OMS development team to update their XML parser, use the Order survey attribute to send emails for the cases when the survey was skipped.

**Answer: B**

#### NEW QUESTION # 69

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.

What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort?

- A. The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.
- B. The Architect should update all the deprecated API calls in the already integrated LINK cartridge and test thoroughly.
- **C. The Architect should check to see if the LINK cartridge has been updated already, integrate it, apply the customisations, and test thoroughly.**
- D. The Architect does not need to do anything at this time, the API will continue to work with no issues for the foreseeable future.

**Answer: C**

#### NEW QUESTION # 70

An existing B2C Commerce site has the following aliases configuration:

Which statement related to this configuration is incorrect?

- **A. Hostname www.example.com will redirect to www.example.com/us**
- B. Hostname www.example.de will redirect to www.example.com/de.
- C. Hostname www.example.co.uk will redirect to www.example.com/uk.
- D. Site supports multiple hostnames and locales.

**Answer: A**
