

# F5CAB3 Valid Exam Answers & F5CAB3 Exam Course

DOWNLOAD the newest Prep4SureReview F5CAB3 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1XKIwJk32aoCh6LujV\\_pzDJ\\_Lo8zFHzX](https://drive.google.com/open?id=1XKIwJk32aoCh6LujV_pzDJ_Lo8zFHzX)

For complete, comprehensive, and instant BIG-IP Administration Data Plane Configuration F5CAB3 exam preparation, the F5 F5CAB3 Exam Questions are the right choice. Prep4SureReview offers reliable new exam format, exam dumps demo and valid exam online help customers pass the BIG-IP Administration Data Plane Configuration F5CAB3 easily.

There is a succession of anecdotes, and there are specialized courses. Experts call them experts, and they must have their advantages. They are professionals in every particular field. The F5CAB3 test material, in order to enhance the scientific nature of the learning platform, specifically hired a large number of qualification exam experts, composed of product high IQ team, these experts by combining his many years teaching experience of F5CAB3 quiz guide and research achievements in the field of the test, to exam the popularization was very complicated content of BIG-IP Administration Data Plane Configuration exam dumps, better meet the needs of users of various kinds of cultural level. Expert team not only provides the high quality for the F5CAB3 Quiz guide consulting, also help users solve problems at the same time, leak fill a vacancy, and finally to deepen the user's impression, to solve the problem of F5 test material and no longer make the same mistake.

## F5 F5CAB3 Exam Course, Pass4sure F5CAB3 Dumps Pdf

Passing the test F5CAB3 certification can help you realize your goal and find an ideal job. Buying our F5CAB3 latest question can help you pass the exam successfully. F5CAB3 exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our F5CAB3 latest question is absolutely good choices for you

## F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q54-Q59):

### NEW QUESTION # 54

In a pool there are 2 pool members (older servers) that can handle fewer connections than the other 3 newer servers.

Which load balancing method would allow more traffic to be directed to the newer servers? (Choose one answer)

- **A. Weighted Least Connections (member)**
- B. Global Availability
- C. Round Robin
- D. Least Connections (member)

**Answer: A**

Explanation:

This scenario requires unequal load distribution based on server capacity. The newer servers must receive more connections than the older ones, while still dynamically accounting for active connection counts.

According to BIG-IP Administration: Data Plane Configuration documentation:

Weighted Least Connections (member) combines:

Connection awareness (least connections)

Administrator-defined weights (ratios) to reflect server capacity

Pool members with higher weights receive proportionally more new connections than members with lower weights, even when using the same load balancing algorithm.

Why B is correct:

Allows assigning higher weights to newer servers and lower weights to older servers Ensures smarter traffic distribution based on both capacity and real-time load Why the other options are incorrect:

A). Global Availability Used for disaster recovery and site failover, not intra-pool load distribution.

C). Round Robin Distributes connections evenly without considering server capacity.

D). Least Connections (member) Balances only by current connection count and does not account for differences in server performance or capacity.

Correct Resolution:

Use Weighted Least Connections (member) and assign higher weights to newer servers so they receive more traffic while protecting older servers from overload.

## NEW QUESTION # 55

Refer to the exhibit.

Configuration:	Advanced
Source Check	<input type="checkbox"/>
MTU	1500
MAC Address	00:50:56:9c:3c:47
Fail-safe	<input checked="" type="checkbox"/>
Fail-safe Timeout	90
Action	Reboot
Auto Last Hop	Default
CMP Hash	Default
DAG Tunnel	Outer
IPv6 Prefix Length	128
DAG Adjustment	None

A BIG-IP Administrator configures a new VLAN on an HA pair of devices that does NOT yet have any traffic. This action causes the assigned traffic group to fail over to the standby device. Which VLAN setting should be changed to prevent this issue?

- A. Source Check
- B. Customer Tag
- **C. Fail-safe**
- D. Auto Last Hop

**Answer: C**

Explanation:

The exhibit shows the advanced configuration of a VLAN where the Fail-safe option is checked. VLAN Fail-safe is a high-availability feature used to monitor network connectivity on a specific VLAN. When enabled, the BIG-IP system monitors the VLAN for network traffic. If the system does not detect any "useful" traffic on the VLAN within the specified Fail-safe Timeout (which is 90 seconds in the exhibit), it attempts to generate traffic by pinging the default gateway or other devices. If it still detects no

traffic, the BIG-IP concludes that the VLAN is unreachable or the network interface has failed, and it triggers a "Fail-safe Action" - in this case, "Reboot" or a failover to the peer device in the HA group.

Because the administrator has just created a new VLAN that "does NOT yet have any traffic," the Fail-safe mechanism triggers immediately after the 90-second timeout period. Since no devices are yet communicating on this VLAN, the BIG-IP incorrectly assumes there is a hardware or cabling failure and forces a failover to ensure the standby device (which might have better connectivity) takes over. To prevent this unwanted failover, the administrator should uncheck the Fail-safe box for that specific VLAN until the VLAN is fully populated with active nodes and regular traffic. Once the application is live and traffic is flowing, Fail-safe can be re-enabled to provide an additional layer of redundancy. Auto Last Hop (Option A) and Source Check (Option B) are routing and security features that do not trigger HA failover events.

#### NEW QUESTION # 56

A BIG-IP Administrator configures an SSH pool with five members. Which health monitor should be applied?

- A. TCP
- B. HTTP
- C. UDP
- D. HTTPS

**Answer: A**

Explanation:

SSH is a TCP-based service. A TCP monitor validates service availability without requiring application-layer inspection.

#### NEW QUESTION # 57

A set of servers is used for an FTP application as well as an HTTP website via separate BIG-IP Pools. The server support team reports that some servers are receiving a lot more traffic than others. Which Load Balancing Method should the BIG-IP Administrator apply to even out the connection count?

- A. Ratio (Node)
- B. Least Connections (Member)
- C. Least Connections (Node)
- D. Ratio (Member)

**Answer: C**

Explanation:

Similar to the logic required for managing multi-service backend environments, the issue described—where servers hosting multiple protocols like FTP and HTTP are experiencing uneven distribution—stems from the BIG-IP's default behavior of treating each pool independently. If the administrator uses a member-based load balancing method, the BIG-IP distributes HTTP traffic regardless of how much FTP traffic that same physical server is currently processing.

To resolve this, the administrator must utilize the Least Connections (Node) method. By switching both the HTTP and FTP pools to this algorithm, the BIG-IP begins to make load balancing decisions based on the total combined connection count for the IP address of each server. When a new HTTP request arrives, the BIG-IP checks which server has the fewest total connections (including existing FTP sessions). This prevents a server that is already busy with long-lived FTP transfers from being overwhelmed by a sudden burst of HTTP requests.

Ratio methods (Options A and C) are static and rely on the administrator manually assigning weights to servers based on their perceived capacity; they do not adapt to real-time fluctuations in traffic volume across different pools. Least Connections (Member) (Option B) remains blind to the "cross-pool" traffic on the same hardware. Only the Node-based Least Connections approach provides the global visibility necessary to "even out" the total resource utilization across servers supporting multiple distinct applications.

#### NEW QUESTION # 58

The BIG-IP Administrator has to provide encrypted communication between the users and the virtual server they access. Multiple hostnames are configured in DNS with the same IP address. Which profile type and setting in the profile should be used?

- A. Server SSL, Client Name

- B. Server SSL, Server Name
- C. Client SSL, Client Name
- D. Client SSL, Server Name

**Answer: D**

Explanation:

When a single IP address (Virtual Server) must host multiple hostnames (e.g., site1.com, site2.com) over HTTPS, the BIG-IP must be able to present the correct SSL certificate for each site during the initial handshake. This requirement is handled by a technology called Server Name Indication (SNI).

To implement this on the BIG-IP, the administrator must use a Client SSL profile because the encryption is occurring between the user (Client) and the Virtual Server. Within the Client SSL profile settings, there is a field called Server Name. By creating multiple Client SSL profiles-each with a different "Server Name" (the hostname) and its corresponding certificate-and attaching them all to the same Virtual Server, the BIG-IP can inspect the SNI extension in the client's "Client Hello" packet. It then selects the specific profile that matches the requested hostname.

Option A is incorrect because "Client Name" is not the standard field name used for SNI hostname matching in the profile. Options B and C refer to Server SSL profiles, which manage the connection between the BIG-IP and the backend servers. While Server SSL profiles also have a "Server Name" field (used to send SNI to a backend server), the requirement here is to provide encrypted communication for "users" accessing the virtual server, which definitively requires a Client-side SSL configuration.

## NEW QUESTION # 59

.....

In order to let you understand our products in detail, our F5CAB3 test torrent has a free trial service for all customers. You can download the trial version of our F5CAB3 study torrent before you buy our products, you will develop a better understanding of our products by the trial version. In addition, the buying process of our F5CAB3 Exam Prep is very convenient and significant. You will receive the email from our company in 5 to 10 minutes after you pay successfully; you just need to click on the link and log in, then you can start to use our F5CAB3 study torrent for studying.

**F5CAB3 Exam Course:** <https://www.prep4surereview.com/F5CAB3-latest-braindumps.html>

The accurate, reliable and updated F5 F5CAB3 study torrent are compiled, checked and verified by our senior experts, which can ensure you 100% pass, Prep4SureReview F5CAB3 Exam Course is available in "APP" format for the exam candidates with updated and thorough information on the syllabus contents, F5 F5CAB3 Valid Exam Answers And if you buy the value pack, you have all of the three versions, the price is quite preferential and you can enjoy all of the study experiences.

This is making Snapchat a huge hit with younger users who don't want Dumps F5CAB3 Vce their every image and message tracked forever online, Another thing to consider is where the heat goes after it leaves the case.

## From F5CAB3 Valid Exam Answers to BIG-IP Administration Data Plane Configuration, Easiest Way to Pass

The accurate, reliable and updated F5 F5CAB3 study torrent are compiled, checked and verified by our senior experts, which can ensure you 100% pass, Prep4SureReview is available in "APP" Pass4sure F5CAB3 Dumps Pdf format for the exam candidates with updated and thorough information on the syllabus contents.

And if you buy the value pack, you have all of the three F5CAB3 Exam Course versions, the price is quite preferential and you can enjoy all of the study experiences, To attain this you just need to enroll in the F5CAB3 certification exam and put all your efforts to pass this challenging F5CAB3 exam with good scores.

BIG-IP Administration Data Plane Configuration certification will be a ladder to F5CAB3 your bright future, resulting in higher salary, better jobs and more respect from others.
