- D. Timer
- E. Action

Answer: A,B,E

Explanation:

The key components to build a process in Process Builder are Action, Criteria Node, and Trigger. Actions define the operations to be performed when the criteria are met, such as updating a record or sending an email. Criteria Nodes specify the conditions that must be satisfied for the actions to execute. The Trigger is the event that initiates the process, such as a record creation or update. These components work together to enable administrators to automate business processes based on specific events and conditions within Salesforce.
