CTS Exam Torrent - Certified Technology Specialist Prep Torrent & CTS Test Braindumps

Those who want to prepare for the IT certification exam are helpless. But they have to do it. So they have restless state of mind. However, With PDFBraindumps AVIXA CTS Exam Training materials, the kind of mentality will disappear. With PDFBraindumps's AVIXA CTS exam training materials, you can be brimming with confidence, and do not need to worry the exam. Of course, you can also face the exam with ease. This is not only psychological help, but more importantly, it allows you to pass the exam and to help you get a better tomorrow.

AVIXA CTS - General Exam Syllabus Topics:

Topic	Weight
Duty A:Creating AV Solutions	**47%**
Task 1:Gather Customer Information	10%
Task 2:Conduct Initial Site Survey	9%
Task 3: Evaluate Site Environment (acoustics, lighting, seating, finishing, etc.)	9%
Task 4:Develop an AV Project Scope	9%

Task 5: Design AV Solutions	10%
Domain 2:Implementing AV Solutions	**27%**
Task 1:Integrate AV Solutions	10%
Task 2:Operate AV Solutions	9%
Task 3:Manage AV Projects	8%
Domain 3:Servicing AV Solutions	**26%**

AVIXA Certified Technology Specialist Sample Questions (Q142-Q147):

NEW QUESTION # 142

According to the Gantt chart pictured, the Project Manager should wait to start Activity C until which predecessor has been reached?

- A. Week 3
- B. Milestone X
- C. Activity B
- D. Week 4

Answer: B

Explanation:

In the provided Gantt chart, Activity C is scheduled to start after the completion of Milestone X. This is evident as the milestone symbol (diamond) for Milestone X appears right before the beginning of Activity C, indicating that Activity C is dependent on the completion of Milestone X.

NEW QUESTION # 143

An integrator has to upgrade a camera system in an existing board room. What is the MOST IMPORTANT information to gather on the site visit?

- A. distance from the lens to first participant
- B. resolution of camera system
- C. cable length
- D. ambient lighting placement

Answer: A

Explanation:

The most important information to gather on a site visit when upgrading a camera system in an existing boardroom is the distance from the lens to the first participant. This measurement is crucial for determining the appropriate camera lens and its focal length to ensure all participants are clearly visible within the camera's field of view. It also affects the placement and angle of the camera to achieve the best possible coverage. Axis Technology Specialist documentation emphasizes the importance of precise measurements and placement to optimize camera performance and video quality in boardroom settings.

NEW QUESTION # 144

A 2x2 video wall was sold with each display being Full HD resolution. Now the client wants to show live content at the best possible quality over the complete wall. Which resolution must the camera provide?

- A. 4096 x 2160
- B. 1920 x 1080
- C. 3840 x 2160
- D. 7680 x 4320

Answer: D

Explanation:
Each display in a 2x2 video wall setup at Full HD resolution (1920 x 1080) requires a total resolution of 3840 x 2160 for two displays horizontally and 2160 x 2 vertically, which equals 7680 x 4320. This resolution ensures each display shows content at the highest quality without scaling down.
CTS References: AVIXA CTS Exam Guide, Chapter on Video Walls and Resolutions; CTS Handbook, Section on Display Technologies and Scaling.

NEW QUESTION # 145
An AV technician has been called to a lecture hall where the presenter complains of a loud squealing noise that makes their presentation inaudible. What is the BEST strategy to address the complaint?

- A. Position the microphone in front of the loudspeakers
- B. Position the microphone away from the presenter
- C. Mute unused microphone channels on the audio mixer
- D. Increase the gain for the microphone

Answer: C

Explanation:
The loud squealing noise is feedback, often caused by open (but unused) microphones picking up sound from the speakers and reintroducing it into the system. Muting unused channels eliminates that loop and is considered best practice during live sound reinforcement.
"Muting unused microphones prevents feedback loops and is an essential practice in live sound environments."

NEW QUESTION # 146
A client has ordered a large LED video wall to be installed in an existing board room. What should be the integrator's MAIN operational concerns?

- A. brightness and contrast
- B. aspect ratio and resolution
- C. power and temperature
- D. cable management and length

Answer: C

Explanation:
The main operational concerns for an integrator installing a large LED video wall in an existing boardroom are power and temperature. Large LED video walls consume significant power and generate substantial heat.
Proper power supply and efficient cooling mechanisms are crucial to ensure the system runs smoothly without overheating or power failures. Referencing Axis Technology Specialist documentation, these factors are critical for maintaining performance and longevity of the equipment.
