COF-C02 exam preparation material and begin your SnowPro Core Certification Exam (COF-C02) exam preparation.

Earning the SnowPro Core Certification is a valuable achievement for professionals seeking to advance their careers in the field of data management. SnowPro Core Certification Exam certification is recognized by Snowflake and is a testament to the candidate's knowledge, skills, and ability to work with Snowflake's data warehousing platform. SnowPro Core Certification Exam certification can help professionals stand out in a competitive job market and can lead to new career opportunities and higher salaries. Additionally, the certification must be renewed every two years, ensuring that the candidate's skills and knowledge remain up-to-date with Snowflake's technology advancements.

Snowflake SnowPro Core Certification Exam Sample Questions (Q644-Q649):

NEW QUESTION # 644
What is a feature of column-level security in Snowflake?

- A. External tokenization
- B. Role access policies
- C. Internal tokenization
- D. Network policies

Answer: B

Explanation:
Column-level security in Snowflake is implemented through Role Access Policies. These policies allow administrators to control access to specific columns of a table or view based on the role of the user accessing the data. By applying a role access policy to a column, administrators can ensure that sensitive information remains secure, and only users with the appropriate roles can view or query the data in that column. This feature enhances the security model by providing fine-grained access control at the column level.

Snowflake Documentation: Implementing Column-level Security

NEW QUESTION # 645
What are characteristics of transient tables in Snowflake? (Select TWO).

- A. Transient tables can be cloned to permanent tables.
- B. Transient tables persist until they are explicitly dropped.
- C. Transient tables have a Fail-safe period of 7 days.
- D. Transient tables can be altered to make them permanent tables.
- E. Transient tables have Time Travel retention periods of 0 or 1 day.

Answer: B,E

NEW QUESTION # 646
Which type of workload traditionally benefits from the use of the query acceleration service?

- A. Queries that do not have filters or aggregation
- B. Workloads that include on-demand data analyses
- C. Workloads with a predictable data volume for each query
- D. Queries with small scans and non-selective filters

Answer: B

Explanation:
The query acceleration service in Snowflake is beneficial for workloads that include on-demand data analyses. This service optimizes query performance by dynamically allocating additional resources to execute queries faster, particularly useful for ad-hoc analysis where data volume and complexity can vary.

Snowflake Documentation: Query Acceleration Service

NEW QUESTION # 647
How can a user improve the performance of a single large complex query in Snowflake?

- A. Scale up the virtual warehouse.
- B. Enable economy warehouse scaling.
- C. Scale out the virtual warehouse.
- D. Enable standard warehouse scaling.

Answer: A

NEW QUESTION # 648
Which of the following are best practice recommendations that should be considered when loading data into Snowflake? (Select TWO).

- A. Load files that are approximately 25 MB or smaller.
- B. Load files that are approximately 100-250 MB (or larger)
- C. Remove semi-structured data types
- D. Avoid using embedded characters such as commas for numeric data types
- E. Remove all dates and timestamps.

Answer: B,D
