Salesforce Financial Services Cloud (FSC) Accredited Professional Sample Questions (Q53-Q58):

NEW QUESTION # 53

Which setting can a system administrator enable in the user interface? (2 answers)

- A. Chatter messenger for specific users
- B. Related list hover links
- C. Printable list views
- D. Customizable recent tags

Answer: B,C

NEW QUESTION # 54

A financial services company would like its users to be able to relate two business accounts. What should the administrator configure to meet the requirement?

- A. Create a new Account Reciprocal Role for the required value.
- B. Create a new Contact Reciprocal Role for the required value.
- C. Update the Role picklist on the Account-Contact Relationship object with new value.
- D. Update the Role picklist on the Account-Account Relationship object with new value.

Answer: D

Explanation:

To configure Financial Services Cloud to allow users to relate two business accounts, the administrator should update the Role picklist on the Account-Account Relationship object with new value. The Role picklist is a field on the Account-Account Relationship object that defines the type of relationship between two accounts, such as Household Member, Business Owner, Trustee, or Friend. The Role picklist is used to filter and display the account-account relationships in the Actionable Relationship Center (ARC). To update the Role picklist, you need to go to Setup > Object Manager > Account-Account Relationship > Fields & Relationships > Role and add or remove values according to your business needs. NEW QUESTION # 55

Which of the following are FSC components that visualize groups and relationships in Lightning pages? (Check the 2 that apply)

- A. Related Accounts
- B. Person Life Events
- C. Goal to Group Member Mapping
- D. Relationship Map and Group Builder

Answer: A,D

NEW QUESTION # 56

Universal Containers has two business groups, products and services. Both groups will be using to track deals, but different fields are required by each group.

How should a system administrator meet this requirement? (2 answers)

- A. Create two permission sets
- B. Create two record types
- C. Create two sales processes.
- D. Create two page layouts

Answer: B,D

NEW QUESTION # 57

A financial services company wants to track different categories of financial accounts in its org. Relationship managers must be able to see all of these financial accounts in one place on the customer's Account record page grouped by categories.

Which three steps should an administrator take to configure the Financial Account object and the Account Lightning record page to

meet the design?

- A. Add the Financial Account List component to the Account Lightning record page.
- B. Create Account lookup fields on the Financial Account object to link the Financial Accounts to an Account.
- C. Create a custom picklist on the Financial Account object to track the Typ
- D. Configure the Financial Account List components for each required category.
- E. Configure Financial Account record types to match the required categories.

Answer: B,C,D

Explanation:

The following considerations should be included when configuring the report with branch management reportable objects:

Bankers with Branches with Opportunities, Accounts, Leads, and Contacts report types are available for creating reports with Branch Unit Related Records. These are standard report types that allow users to create reports that show data from Banker, Branch Unit, Opportunity, Account, Lead, Contact, and Branch Unit Related Record objects.

The reportable objects include Banker, Branch Unit, Branch Unit Related Records, and Branch Unit Customer. These are custom objects that are part of the branch management feature in Financial Services Cloud. Banker is an object that represents a banker or an employee who works at a branch unit. Branch Unit is an object that represents a physical location where bankers provide services to customers. Branch Unit Related Record is an object that represents a record that is related to a branch unit, such as an opportunity, an account, a lead, or a contact. Branch Unit Customer is an object that represents a customer who has a relationship with a branch unit.

When Branch Unit is the primary object, the administrator can select Branch Unit Customers or Branch Unit Related Records as related objects. This means that the administrator can create reports that show data from Branch Unit and its related objects by using lookup fields or junction objects.

NEW QUESTION # 58

.....

Constantly updated multiple mock exams with a great number of questions that will help you in better self-assessment.
