## PDI Guaranteed Passing - PDI Reliable Exam Review

Now we can say that Platform Developer I (PDI) (PDI) exam questions are real and top-notch Salesforce PDI exam questions that you can expect in the upcoming Platform Developer I (PDI) (PDI) exam. In this way, you can easily pass the Salesforce PDI exam with good scores. The countless Salesforce PDI Exam candidates have passed their dream Salesforce PDI certification exam and they all got help from real, valid, and updated PDI practice questions, You can also trust on TrainingDump and start preparation with confidence.

Salesforce PDI (Platform Developer I) Certification Exam is one of the most sought-after certifications for individuals who want to demonstrate their competence in developing custom applications on the Salesforce platform. Platform Developer I (PDI) certification is designed to test the candidate's knowledge and skills in various areas such as Apex, Visualforce, data modeling, and user interface design. By passing PDI exam, an individual can prove their proficiency in developing and customizing applications on the Salesforce platform.

Salesforce PDI Certification Exam is an essential certification for anyone who wants to build a career in Salesforce development. It is a challenging exam that requires a lot of preparation, but passing it can open up new opportunities and help you stand out to potential employers. Whether you are just starting out in your career or looking to take your skills to the next level, the Salesforce PDI Certification Exam is a great choice.

Salesforce PDI (Platform Developer I) Certification Exam is designed to validate the skills and knowledge of professionals who

want to develop and deploy custom applications on the Salesforce platform. Platform Developer I (PDI) certification demonstrates a thorough understanding of the Salesforce development environment, including Apex, Visualforce, SOQL, and SOSL. PDI exam is intended for developers who have experience building custom applications using Salesforce and want to take their skills to the next level.

## Salesforce Platform Developer I (PDI) Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Universal Containers implemented a private sharing model for the Account object. A custom Account search tool was developed with Apex to help sales representatives find accounts that match multiple criteria they specify. Since its release, users of the tool report they can see Accounts they do not own. What should the developer use to enforce sharing permission for the currently logged-in user while using the custom search tool?

- A. Use the UserInfo Apex class to filter all SOQL queries to returned records owned by the logged-in user.
- B. Use the schema describe calls to determine if the logged-in users has access to the Account object.
- C. Use the without sharing keyword on the class declaration.
- D. Use the with sharing keyword on the class declaration.

**Answer: D**

Explanation:

Use the with sharing keyword on the class declaration. The with sharing keyword ensures that the Apex code respects the object-level, field-level, and record-level sharing settings for the user who is running the Apex code. This means that the code will only return records that the user has access to, according to their Sharing Settings. You can find more information about the with sharing keyword in the official Salesforce documentation ([https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex\\_classes\\_keywords\\_sharing.htm](https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_keywords_sharing.htm)).

### NEW QUESTION # 42

A business has a proprietary Order Management System (OMS) that creates orders from its website and fulfills the orders. When the order is created in the OMS, an integration also creates an order record in Salesforce and relates it to the contact as identified by the email on the order. As the order goes through different stages in the OMS, the integration also updates it in Salesforce. The business notices that each update from the OMS creates a new order record in Salesforce. Which two actions should prevent the duplicate order records from being created in Salesforce? Choose 2 answers

- A. Use the order number from the OMS as an external ID.
- B. O Write a trigger on the Order object to delete the duplicates.
- C. Ensure that the order number in the OMS is unique.
- D. O Use the email on the contact record as an external ID.

**Answer: A,C**

### NEW QUESTION # 43

Which three web technologies can be integrated into a Visualforce page? (Choose three.)

- A. HTML
- B. JavaScript
- C. Java
- D. CSS
- E. PHP

**Answer: A,C,D**

### NEW QUESTION # 44

Universal Container wants Opportunities to no longer be editable when reaching the Cloud stage. How should a developer accomplish this?

- A. Use flow Builder
- B. Mark fields as read-only on the page layout.
- C. Use a validation rule.
- D. Use the Process Automation setting.

**Answer: C**

#### NEW QUESTION # 45

A developer wants to mark each Account in a List<Account> as either Active or Inactive, based on the value in the LastModified each Account being greater than 90 days in the past.

Which Apex technique should the developer use?

- A. A for loop, with an if or if/else statement inside
- B. An if-else statement, with a for loop inside
- C. A for loop, with a switch statement inside
- D. A witch statement, with a for loop inside

**Answer: A**

Explanation:

\* Using aforloop allows iterating through the list, and aniforif-elsecondition inside can evaluate theLastModifiedDatefor each account to determine its status.

:Apex Control Statements

#### NEW QUESTION # 46

.....

For candidates who are preparing for the PDI exam, passing the PDI exam is a long-cherished wish. So if you want to pass the PDI exam, you should choose the product of our company. Since our company is a leading team of the business, we have lots of experienced experts to compile the practice materials of the PDI exam, and the practice materials also provide the detailed answers.
