

Pass Guaranteed Quiz Cisco - High Hit-Rate 350-401 - Exam Vce Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Free

What's more, part of that ValidVCE 350-401 dumps now are free: <https://drive.google.com/open?id=1iO4tpMbjy40VVBtasjQA4aTZNNWA0goq>

Our 350-401 study guide provides free trial services, so that you can learn about some of our topics and how to open the software before purchasing. During the trial period of our 350-401 study materials, the PDF versions of the sample questions are available for free download, and both the pc version and the online version can be illustrated clearly. You can contact us at any time if you have any difficulties on our 350-401 Exam Questions in the purchase or trial process. We will provide professional personnel to help you remotely on the 350-401 training guide.

Opportunities for Managing Industrial Networks with Cisco 350-401 Certification Covers All Key Points.

1. You can get access to 350-401 Exam questions and answers in the reliable Demo Version of **Cisco 350-401 exam dumps**. But VCE files are unavailable. Courses are updated regularly to make sure that it covers the latest information.
2. Try the free 350-401 Test Software to see how it works.
3. If you can pass the free 350-401 Demo test, you are ready to go with a live product.

4. If you fail the 350-401 free Demo test, the Cisco 350-401 Exam product is refundable.
5. If you are not ready to take the test after using the free 350-401 Demo test, you can get a full refund of your money.
6. If you are not satisfied with 350-401 Test Software quality, you can still get a 100% money-back guarantee.
7. IT Certification real and actual questions are sometimes different from the ones in the free 350-401 Demo test. Customers are invited to try the free sample questions before they purchase the Managing Industrial Networks with Cisco Networking Technologies (IMINS) Cisco 350-401 Exam product. CCAR-400 Exam Questions is an example of the Managing Industrial Networks with Cisco Networking Technologies (IMINS) 350-401 product.

Concluding Thoughts

Getting the Cisco certification is the requirement of the time. For the Cisco 350-401 exam, all you need is the right mindset, the right motivation, and the right study materials like the official training and study guides. Not consistent content cramming. Not crude study materials. Not long hours of unproductive learning. If you believed your doubters, you would think there's no way to build an exceptional IT career. But Cisco is here to change the story, giving you the best chance to actualize your potential if you get things right. Ready to take action today? Never forget three things: passion, desire, and commitment. Let's go!

100% Pass 350-401 - High-quality Exam Vce Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Free

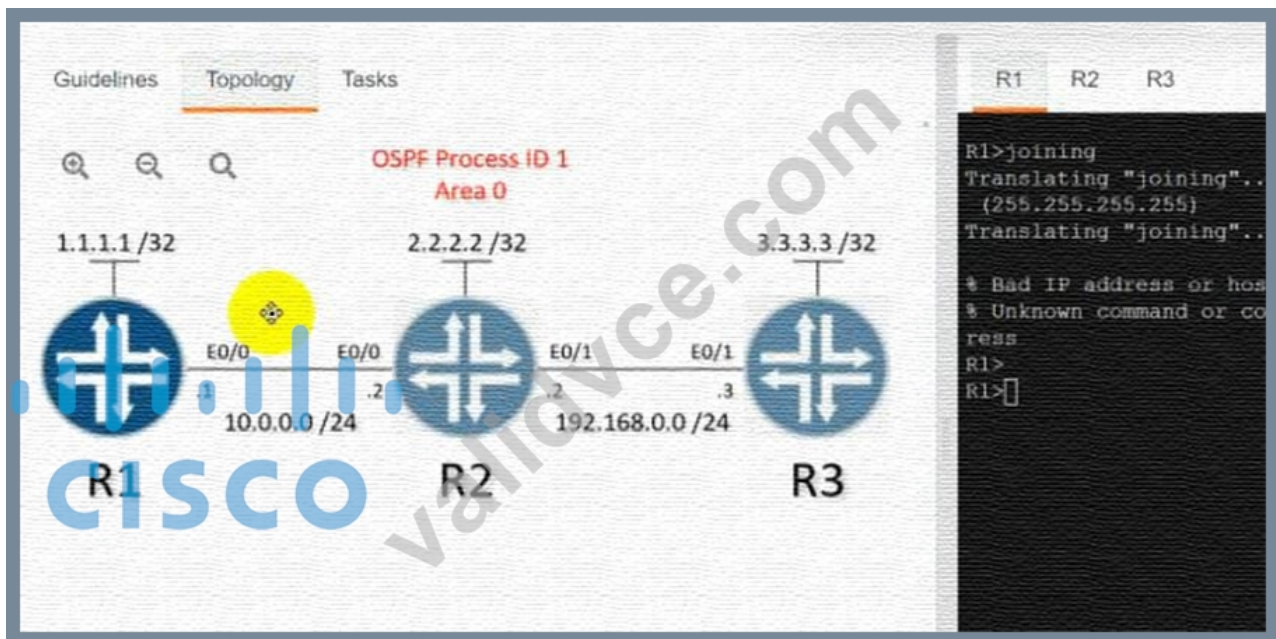

The last format is desktop 350-401 practice test software that can be accessed easily just by installing the software on the Windows Pc or Laptop. The desktop software format can be accessed offline without any internet so the students who don't have internet won't struggle in the preparation for 350-401 Exam. These three forms are specially made for the students to access them according to their comfort zone and 350-401 exam prepare for the best.

Cisco 350-401 (Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR)) Certification Exam is an essential qualification for networking professionals who want to enhance their skills and knowledge in enterprise network technologies. Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) certification exam covers a wide range of topics, including network architecture, security, automation, virtualization, and wireless technologies. Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) certification exam is designed to help the IT professionals to develop their knowledge and skills to design, deploy, and manage complex enterprise networks.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q242-Q247):

NEW QUESTION # 242

Simulation 05

Guidelines Topology Tasks

Configure OSPF on all three routers according to the topology to achieve these goals:

1. Configure OSPF without using the "network" statement under the "router ospf" configuration section.
2. Ensure that all networks are advertised between the routers.
3. Configure a single command under each Ethernet interface to prevent OSPF neighbors from participating in a DR/BDR election and ensure that no extra host routes are generated.

Submit feedback about this item.

Answer:

Explanation:

See the solution below.

Explanation:

R1

enable

Config t

Int loop0

Ip ospf 1 area 0

Int et0/0

Ip ospf 1 area 0

Ip ospf network point-to-point

copy run start

R2

Enable

Config t

Int loop0

Ip ospf 1 area 0

Int et0/0

```

Ip ospf 1 area 0
Ip ospf network point-to-point
Int et0/1
Ip ospf 1 area 0
Ip ospf network point-to-point
copy run start
R3
Enable
Config t
Int loop0
Ip ospf 1 area 0
Int et0/1
Ip ospf 1 area 0
Ip ospf network point-to-point
copy run start

NEW QUESTION # 243

Which three elements determine Air Time efficiency? (Choose three)

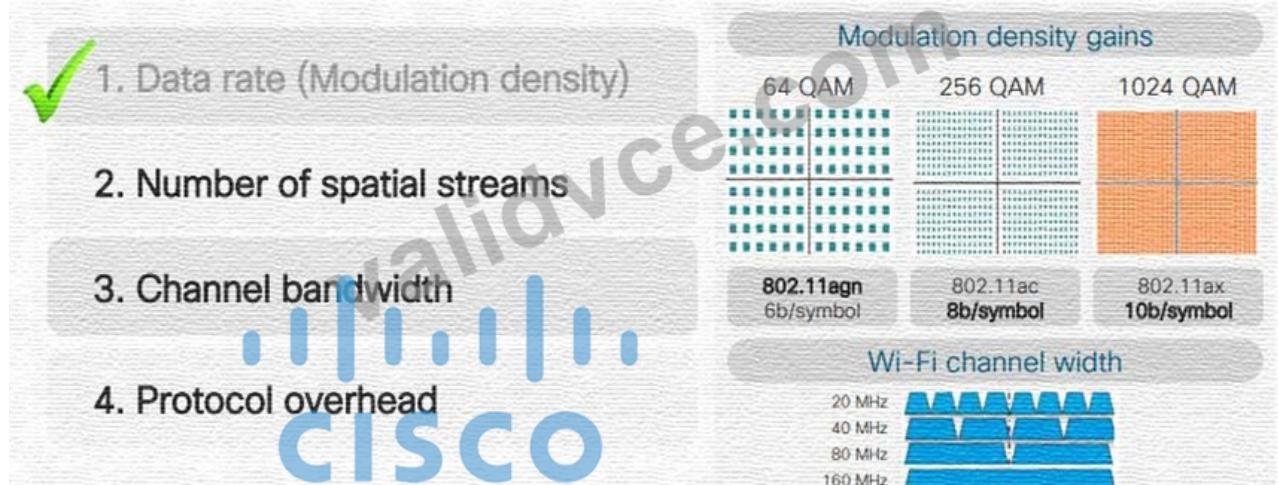

- A. event-driven RRM
- B. channel bandwidth
- C. dynamic channel assignment
- D. number of spatial streams and spatial reuse
- E. RF group leader
- F. data rate (modulation density) or QAM

Answer: B,D,F

Explanation:

<https://www.ciscolive.com/c/dam/r/ciscolive/emea/docs/2020/pdf/BRKEWN-3010.pdf> Graphical user interface Description automatically generated with low confidence

Four things determine “Air Time Efficiency” Wi-Fi’s 1-5 have delivered on 3 of these....

NEW QUESTION # 244

The login method is configured on the VTY lines of a router with these parameters.

The first method for authentication is TACACS

If TACACS is unavailable, login is allowed without any provided credentials

Which configuration accomplishes this task?

- A. R1#sh run | include aaa
aaa new-model
aaa authentication login default group tacacs+
aaa session-id common
R1#sh run | section vty
line vty 0 4
transport input none
R1#
- B. R1#sh run | include aaa
aaa new-model
aaa authentication login telnet group tacacs+ none
aaa session-id common
R1#sh run | section vty
line vty 0 4
R1#sh run | include username
R1#
- C. R1#sh run | include aaa
aaa new-model
aaa authentication login VTY group tacacs+ none
aaa session-id common
R1#sh run | section vty
line vty 0 4
password 7 0202039485748
R1#sh run | include username
R1#
- D. R1#sh run | include aaa
aaa new-model
aaa authentication login default group tacacs+ none
aaa session-id common
R1#sh run | section vty
line vty 0 4
password 7 0202039485748

Answer: D

Explanation:

According to the requirements (first use TACACS+, then allow login with no authentication), we have to use "aaa authentication login ... group tacacs+ none" for AAA command.

The next thing to check is if the "aaa authentication login default" or "aaa authentication login list-name" is used. The 'default' keyword means we want to apply for all login connections (such as tty, vty, console and aux). If we use this keyword, we don't need to configure anything else under tty, vty and aux lines. If we don't use this keyword then we have to specify which line(s) we want to apply the authentication feature.

From above information, we can find out answer 'R1#sh run | include aaa

aaa new-model

aaa authentication login default group tacacs+ none

aaa session-id common

R1#sh run | section vty

line vty 0 4

password 7 0202039485748

If you want to learn more about AAA configuration, please read our AAA TACACS+ and RADIUS Tutorial - Part 2.

For your information, answer 'R1#sh run | include aaa

aaa new-model

aaa authentication login telnet group tacacs+ none

aaa session-id common

R1#sh run | section vty

line vty 0 4

R1#sh run | include username

R1# would be correct if we add the following command under vty line ("line vty 0 4"): "login authentication telnet" ("telnet" is the name of the AAA list above)

NEW QUESTION # 245

Drag and drop the snippets onto the blanks within the code to construct a script that shows all logging that occurred on the appliance from Sunday until 9:00 p.m Thursday. Not all options are used.

```
event manager applet Logging
event timer cron name Logging cron-entry " 0 21 * * 1-5 "
action 3.0 cli command "enable"
action cli command "show logging | "

1.0
0 21 * * 0-4
3.0
0 21 * * 1-5
redirect ftp://cisco:cisco@192.168.1.1
ftp://cisco:cisco@192.168.1.1
```

Answer:

Explanation:

```
event manager applet Logging
event timer cron name Logging cron-entry " 0 21 * * 1-5 "
action 3.0 cli command "enable"
action cli command "show logging | ftp://cisco:cisco@192.168.1.1 "

1.0
0 21 * * 0-4
3.0
0 21 * * 1-5
redirect ftp://cisco:cisco@192.168.1.1
ftp://cisco:cisco@192.168.1.1
```

NEW QUESTION # 246

```

FastEthernet1/0/47 - Group 1 (version 2)
State is Standby
  7 state changes, last state change 00:00:02
Virtual IP address is 10.1.1.1
Active virtual MAC address is 0000.0c9f.f001
  Local virtual MAC address is 0000.0c9f.f001 (v2 default)
Hello time 3 sec, hold time 10 sec
  Next hello sent in 0.375 secs
Authentication MD5, key-string "cisco"
Preemption enabled, delay min 5 secs
Active router is 10.1.1.2, priority 255 (expires in 9.396 sec)
Standby router is local
Priority 100 (default 100)
IP redundancy name is "hsrp-Fal/0/47-1" (default)

```

Refer to the exhibit. An engineer configures HSRP and enters the `show standby` command. Which two facts about the network environment are derived from the output? (Choose two.)

- A. The virtual IP address of the HSRP group is 10.1.1.1.
- B. The hello and hold timers are set to custom values.
- C. If the local device fails to receive a hello from the active router for more than 5 seconds, it becomes the active router.
- D. The local device has a higher priority than the active router
- E. If a router with a higher IP address and same HSRP priority as the active router becomes available, that router becomes the new active router 5 seconds later.

Answer: A,B

Explanation:

The output indicates that the HSRP group's virtual IP address is 10.1.1.1 (Option B), as seen from the line "Virtual IP address is 10.1.1.1." Additionally, the hello and hold timers are set to custom values of 3 seconds and 10 seconds, respectively (Option D), which differ from the default values, indicating they have been manually configured.
