Microsoft Power Platform Solution Architect (PL-600) practice test software is compatible with windows and the web-based software will work on many operating systems.

Microsoft Power Platform Solution Architect Sample Questions (Q189-Q194):

NEW QUESTION # 189
All salespeople at a company manually send meeting summaries to the meeting attendees after a customer meeting. Meeting summaries are sent in a variety of ways. The company requires standardized processes. You need to learn the existing processes to determine whether opportunities for automation exist.

- A. Job shadow salespeople from each department.
- B. Interview the director of each department.

- C. Review the request for proposal.

Answer: A

NEW QUESTION # 190

You need to recommend a solution for handling data entry requirements for the mobile audit teams.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 App for Outlook
- B. Dynamics 365 Field Service
- C. Canvas app within a browser
- D. Canvas app within Power Apps Player

Answer: C,D

Explanation:
Scenario:
Audit teams must have the ability to view worker information on their mobile devices.
Audit teams must be able to record data during visits to locations where workers are placed.
When you create an app, or someone shares an app with you, you can run that app on the Power Apps mobile app or in a web browser.
Reference:
https://docs.microsoft.com/en-us/powerapps/user/run-app-browser

NEW QUESTION # 191

You are designing a new Microsoft Power Platform solution for a wedding organizer company.

The company uses a third-party application and plans to migrate the data into Microsoft Dataverse for the new solution. The third-party application has an API that can be connected to programmatically for data migration purposes.

You need to migrate the unique IDs belonging to the records from the third-party application.

Which two Microsoft Dataverse column types should you use to store this information?

Each correct answer presents a complete solution.

- A. Plain Text
- B. Float
- C. Text Area
- D. Rich Text
- E. Unique Identifier

Answer: C,E

NEW QUESTION # 192

A company plans to implement a model-driven app. The company has the following requirements:

* Short Message Service (SMS) data must be visible on the model-driven app timeline.

* Store location data must be referenced from a SQL server database.

* Customer data must be audited and only edited by specific users.

You need to recommend the table type for each requirement.

Which table types should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions		Requirement	Solution
Virtual – organization owned		SMS data	
Custom – user or team owned		Store location data	
Custom – organization owned		Customer data	
Activity – user or team owned			

Answer:

Explanation:

Explanation:

NEW QUESTION # 193

You need to recommend a solution to meet user interface requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Create and embed a Power Bi radial gauge

A radial gauge chart has a circular arc and shows a single value that measures progress toward a goal or a Key Performance Indicator (KPI). The line (or needle) represents the goal or target value. The shading represents the progress toward that goal. The value inside the arc represents the progress value. Power BI spreads all possible values evenly along the arc, from the minimum (left-most value) to the maximum (right-most value).

In this example, you're a car retailer tracking the sales team's average sales per month. The needle represents a 140 cars sales goal. The minimum possible average sales is 0 and the maximum is 200. The blue shading shows that the team is averaging approximately 120 sales this month.

Box 2: Add an inspection order to the work order form

You can add inspections to work orders in Dynamics 365 Field Service.

Field Service inspections are digital forms that technicians use to quickly and easily answer a list of questions as part of a work

order. The list of questions can include safety protocols, pass-and-fail tests for a customer asset, an interview with a customer, or other audits and assessments performed before, during, or after a work order.

Example:

□
