SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q25-Q30):

NEW QUESTION # 25

You are creating a script for an advanced data action. Which character designates a virtual variable member?

- A. *
- B. %
- C. /
- D. #

Answer: B

NEW QUESTION # 26

Where can you create a blank planning version?

- A. In the version dimension
- B. In the planning model
- C. In version management
- D. In a data cell

Answer: C

Explanation:

A blank planning version in SAP Analytics Cloud can be created within the Version Management feature. This area of the platform allows users to manage different versions of their data, such as budgets, forecasts, and what-if scenarios. Creating a blank version provides a clean slate for planning activities, without pre-existing data, enabling users to start fresh with their assumptions and inputs.

NEW QUESTION # 27

To which story elements can you apply conditional formatting? Note: There are 2 correct answers to this question.

- A. Composite
- B. Lane
- C. Chart
- D. Table

Answer: C,D

Explanation:

In SAP Analytics Cloud stories, conditional formatting can be applied to Table and Chart elements. This feature allows users to visually highlight data points based on specific conditions, such as thresholds, ranges, or comparisons, making it easier to identify trends, outliers, or areas of interest within the data presented in tables and charts.

NEW QUESTION # 28

You have a live data model with two dimensions: Firstname and Lastname. Users want a single dimension in the data model that displays the dimensions as Lastname, Firstname. What must you do?

- A. Group the Firstname and Lastname in the data model.
- B. Create a calculated dimension in the story.
- **C. Create a calculated dimension in the data model.**
- D. Create the combined data in the source system.

Answer: C

Explanation:

To combine two dimensions, Firstname and Lastname, into a single dimension displaying as Lastname, Firstname in a live data model, you should create a calculated dimension in the data model. This calculated dimension will concatenate the two fields into one, according to the specified format. This approach allows for the creation of a new dimension that can be used across various reports and analyses within the model, maintaining the integrity of the original dimensions.
