SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer?

Note: There are 3 correct answers to this question.

- A. Starter system
- B. Sandbox system
- C. Development system
- D. Trial system
- E. Test system

Answer: A,B,E

Explanation:

* Sandbox system: This is an optional system that can be used to explore the SAP S/4HANA Cloud Public Edition capabilities and features before the implementation project starts. It is not connected to the starter system or the test system and does not have any data migration or configuration tools. It can be refreshed on demand by the customer¹.

* Starter system: This is the first system that is provisioned for the customer after the contract is signed.

It is used to perform the fit-to-standard workshops, where the customer validates the standard processes and identifies the gaps and requirements. It also serves as the configuration system, where the customer configures the business processes using the SAP Central Business Configuration tool. The starter system is connected to the test system and can transfer the configuration and master data to it².

* Test system: This is the second system that is provisioned for the customer after the starter system is configured. It is used to perform the integration testing, user acceptance testing, data migration, and cutover activities. It also serves as the production system, where the customer runs the live business processes after the go-live. The test system is connected to the starter system and can receive the configuration and master data from it³.

The systems that are not used to implement SAP S/4HANA Cloud Public Edition for a customer are:

* Trial system: This is a system that can be used to experience the SAP S/4HANA Cloud Public Edition solution for a limited time.

It is not connected to any other system and does not have any data migration or configuration tools. It is not part of the implementation project and does not require a contract⁴.

* Development system: This is a system that can be used to develop custom applications or extensions using the SAP Business Technology Platform. It is not part of the SAP S/4HANA Cloud Public Edition landscape and does not have any data migration or configuration tools. It requires a separate contract and license.

NEW QUESTION # 39

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Assign PFCG profiles to a business role
- B. Maintain restrictions
- C. Assign business catalogs to a business role
- D. Maintain technical catalogs

Answer: B,C

NEW QUESTION # 40

What are some characteristics of public cloud? Note: There are 2 correct answers to this question.

- A. Perpetual license
- B. Software installation on customer site
- C. Multi-tenant server
- D. Lower total cost of ownership

Answer: C,D

NEW QUESTION # 41

Which technologies should you use to integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution? Note: There are 2 correct answers to this question.

- A. Predelivered APIS
- B. SAP Process Orchestration
- C. SAP Integration Suite
- D. SAP Cloud Connector

Answer: A,C

NEW QUESTION # 42

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Partner lead configuration expert
- B. Customer project manager
- C. Partner project manager
- D. Customer system admin

Answer: D

Explanation:

The IT Contact is the person who is responsible for setting up the initial system access, provisioning users, and managing authentication for the SAP S/4HANA Cloud Public Edition project. The IT Contact should be identified and assigned immediately when the implementation begins, as they will receive all the SAP communications and notifications related to the system setup and configuration. The IT Contact should also be available and accessible throughout the project, and collaborate with the project team and the business stakeholders¹.

The IT Contact should be someone who is a hands-on system administrator, not an executive. They should have the skills and experience to perform the system administration tasks, such as creating users, assigning roles, configuring identity providers, and troubleshooting issues. They should also be committed and engaged with the project, and provide feedback and participate in testing and training activities¹.

Therefore, the correct answer is C, as the customer system admin is the most suitable person to be the IT Contact for the SAP S/4HANA Cloud Public Edition project. References = 1 How to Choose the Right IT Contact for Your SAP S/4HANA Cloud Public Edition Project - SAP Community
