## CompTIA Project+ Certification Exam Sample Questions (Q311-Q316):

### NEW QUESTION # 311

Two team members have a minor disagreement on how a task should be performed. The project manager plans to meet with the team members to discuss the matter. Which of the following techniques should the project manager use to emphasize the areas of agreement and downplay the opposing views?

- A. Compromising
- B. Forcing
- C. Collaborating
- **D. Smoothing**

**Answer: D**

Explanation:

Smoothing is a conflict resolution technique that involves minimizing or ignoring the differences between the parties and focusing on the common interests or goals<sup>1</sup>. It is often used when the conflict is not very important or when there is a need to maintain harmony and relationships<sup>2</sup>. By using smoothing, the project manager can reduce the tension and stress caused by the disagreement and encourage the team members to cooperate and work together. Smoothing is different from compromising, which involves finding a middle ground or a trade-off that partially satisfies both parties; forcing, which involves imposing one's own solution or decision on the other party; and collaborating, which involves finding a win-win solution that fully satisfies both parties<sup>3</sup>. References = CompTIA Project+ PK0-005 Certification Study Guide, Chapter 10: Executing Projects Part 1, page 297; A Quick Guide to Resource Smoothing: Definition, Benefits, and Process, Conflict Resolution Techniques section; Resource Smoothing: How To Use In Project Management | Hive, Smoothing section.

### NEW QUESTION # 312

How does data discovery assist with data classification?'

- A. It automatically classifies data by keywords
- B. It helps to identify the data owner
- C. It provides assurance of data integrity
- **D. It shows where specific data is stored**

**Answer: D**

Explanation:

Data discovery is the process of finding and analyzing data across an organization's data sources, such as databases, files, cloud services, and applications<sup>12</sup>. Data discovery can assist with data classification, which is the process of assigning labels and categories to data based on its sensitivity, value, and risk<sup>34</sup>. By showing where specific data is stored, data discovery can help to: Identify the location and scope of sensitive data, such as personal, financial, or health information, that may require special protection or compliance measures<sup>56</sup>.

Evaluate the data quality, accuracy, and relevance for different purposes and users<sup>78</sup>.

Optimize the data storage, access, and governance policies and practices<sup>910</sup>.

### NEW QUESTION # 313

A PM wants to provide a visual representation of how a project is organized into tasks and how the tasks relate to each other. Which of the following can the PM use?

- A. WBS
- B. PERT chart
- C. Milestone chart
- **D. Gantt chart**

**Answer: D**

Explanation:

A gantt chart is a visual representation of a project timeline that shows the tasks, durations, dependencies, and resources of a project in a horizontal bar chart format. A gantt chart can help a project manager to plan, monitor, and control the project progress, scope, and quality. A gantt chart is different from a milestone chart, which only shows the key events or deliverables of a project without the details of the tasks. A gantt chart is also different from a PERT chart, which is a network diagram that shows the logical relationships and sequence of tasks in a project. A gantt chart is also different from a WBS, which is a hierarchical breakdown of the project scope into smaller and manageable components. References = CompTIA Project+ Study Guide:

Exam PK0-005, 3rd Edition, Chapter 6: Schedule Management<sup>1</sup>; CompTIA Project+ Certification Study Guide, 3rd Edition, Chapter 6: Schedule Management<sup>2</sup>; What Is a Gantt Chart? 7 Examples for Project Management<sup>3</sup>; 3 types of visual project management: Timelines, calendars, and boards (with examples)<sup>4</sup>

#### **NEW QUESTION # 314**

A project manager provided details regarding the completion of the following tasks:

Equipment procurement took less time than estimated.

Equipment installation went according to schedule.

Which of the following should the project manager update?

- A. Change log
- B. Requirements traceability matrix
- **C. Project Gantt**
- D. Issue log

**Answer: C**

Explanation:

The Project Gantt chart is a scheduling tool used to track task progress and timelines. When tasks are completed ahead of schedule, updating the Gantt chart ensures accurate tracking. This aligns with CompTIA Project+ recommendations on project scheduling and monitoring.

#### **NEW QUESTION # 315**

- A. Non-disclosure agreement
- B. Request for information
- C. Memorandum of understanding
- **D. Statement of work**

**Answer: D**

Explanation:

The statement of work (SOW) would be the next document that a project manager should update once the need to procure goods and/or services is identified. A SOW is a document that defines the scope, deliverables, schedule, and terms and conditions of a project or contract. A SOW typically includes information such as purpose, scope of work, location of work, period of performance, deliverables schedule, applicable standards, acceptance criteria, special requirements, and payment schedule. A SOW can help to establish a common understanding and agreement between the client and the service provider on what needs to be done and how it will be done.

#### **NEW QUESTION # 316**

.....

When you are struggling with those troublesome reference books; when you feel helpless to be productive during the process of preparing different exams; when you have difficulty in making full use of your sporadic time and avoiding procrastination. No other
