### 20. Frage

How is the KP! Contract leakage percentage defined?

- A. Confirmed spend of purchase orders with contract reference
- **B. Spend of purchase orders without contract reference despite existing contract**
- C. Quantity of purchase orders without contract reference despite existing contract

- D. Confirmed quantity of purchase orders with contract reference

**Antwort: B**

Begründung:

The KPI Contract Leakage Percentage measures the extent to which procurement spend occurs outside of existing contracts. Specifically, it tracks purchases made without referencing an existing contract, even though a valid contract is in place.

\* Spend of purchase orders without contract reference despite existing contract (Option A):

Contract leakage occurs when purchase orders are created without referencing an existing contract, leading to missed opportunities for leveraging negotiated terms. The SAP Procurement Analytics Guide confirms this definition.

\* B. Confirmed spend of purchase orders with contract reference: This represents compliant spend and does not contribute to contract leakage.

\* C. Confirmed quantity of purchase orders with contract reference: Quantities with contract references are not relevant to measuring contract leakage, as they indicate compliance.

\* D. Quantity of purchase orders without contract reference despite existing contract: Contract leakage is measured in terms of spend, not quantity.

\* SAP Procurement Analytics Guide: Defines the KPI Contract Leakage Percentage and its calculation.
