為通過Cisco 400-007 認證考試花大量的時間和精力復習相關知識，但是卻是冒險地通過考試。選擇KaoGuTi的產品卻可以讓你花少量的錢，一次性安全通過考試。我相信在如今時間如此寶貴的社會裏，KaoGuTi更適合你的選擇。而且我們的KaoGuTi是眾多類似網站中最能給你保障的一個網站，選擇KaoGuTi就等於選擇了成功。

思科 400-007 考試涵蓋了與網絡設計和架構相關的各個主題。其中包括網絡設計原則和理論、網絡優化和大小、網絡安全和網絡虛擬化等主題。該考試還涵蓋了一系列高級主題，例如 IP 多播、MPLS、QoS 和網絡管理。

Cisco 400-007 考試大綱：

主題	簡介
主題 1	• Business Strategy and Design: This section of the exam measures skills of a Network Architect, focusing on how business strategy drives network design and optimisation. Candidates are expected to understand the impact of project methodologies such as waterfall and agile, and how considerations like business continuity, RPO, ROI, CAPEX • OPEX and risk • reward influence technical decisions in solution design.
主題 2	• Network Design: This section is designed for a Senior Network Designer and assesses the ability to create resilient, scalable, and secure modular networks in both traditional and software-defined environments. It emphasises the translation of technical, operational, and business constraints into robust implementation and migration strategies that accommodate application behaviour and organisational requirements.
主題 3	• Control Data, Management, Operational Design: Targeting the Network Automation Specialist, this domain covers end to end IP traffic flow across rich environments, involving the separation of data, control, and management planes. Candidates must demonstrate knowledge of centralized, decentralized, and hybrid control models, and explain how automation and orchestration, including API integration, model-driven management, and CI • CD evolution, support controller-based and software-defined architectures such as SD WAN and network fabric implementations.
主題 4	• Service Design: This domain, aimed at a Cloud Network Engineer, examines how modular network design supports diverse IP-based applications including voice, video, replication, IoT, and storage. Candidates must consider operational resilience, cloud • hybrid connectivity, data governance needs (sovereignty, compliance), and service placement models like SaaS, PaaS, IaaS, direct connects, and WAN integration under regulatory constraints.

主題 5	Security Design: This part of the exam measures the expertise of a Network Security Architect and covers the integration of security within network design. It includes segmentation, access control, visibility, policy enforcement, and application of the CIA triad within modular architectures. Professionals must also understand how to align security with regulatory requirements relevant to network governance.
------	--

思科400-007考試包括多選和情景題。考試持續時間為120分鐘，候選人必須得分至少80%才能通過。考試提供英語和日語語言版本。CCDE證書有效期為三年，此後候選人必須通過CCDE實踐考試或通過繼續教育活動獲得學分來重新認證。整體而言，思科400-007考試是一項嚴格全面的測試，驗證候選人在網絡設計和架構方面的專業知識。

Cisco 400-007新版題庫上線和KaoGuTi - 資格考試的領導者和400-007題庫資料

KaoGuTi是一個你可以完全相信的網站。KaoGuTi的Cisco技術專家為了讓大家可以學到更加高效率的資料一直致力於各種400-007認證考試的研究，從而開發出了更多的考試資料。只要你使用過一次KaoGuTi的資料，你就肯定還想用第二次。因為KaoGuTi不但給你提供最好的資料，而且為你提供最優質的服務。如果你對我們的產品有任何意見都可以隨時提出，因為我們不僅以讓廣大考生輕鬆通過400-007考試為宗旨，更把為大家提供最好的服務作為我們的目標。

最新的 CCDE v3.0 400-007 免費考試真題 (Q43-Q48):

問題 #43

A networking team needs to prevent spoofing attacks They are describing the different uRPF design use cases so they can identify and deploy the optimal mode in various parts of their network Drag and drop the use cases from the left onto the corresponding uRPF technique on the right Not all options are used

CHINESEDUMPS 通过测试

to check whether a route to a given IP address exists without regard to its incoming interface

strict mode

to filter Bogon IP addresses

feasible mode

to ensure the incoming interface is the best reverse path to a given IP address

loose mode

CHINESEDUMPS 通过测试

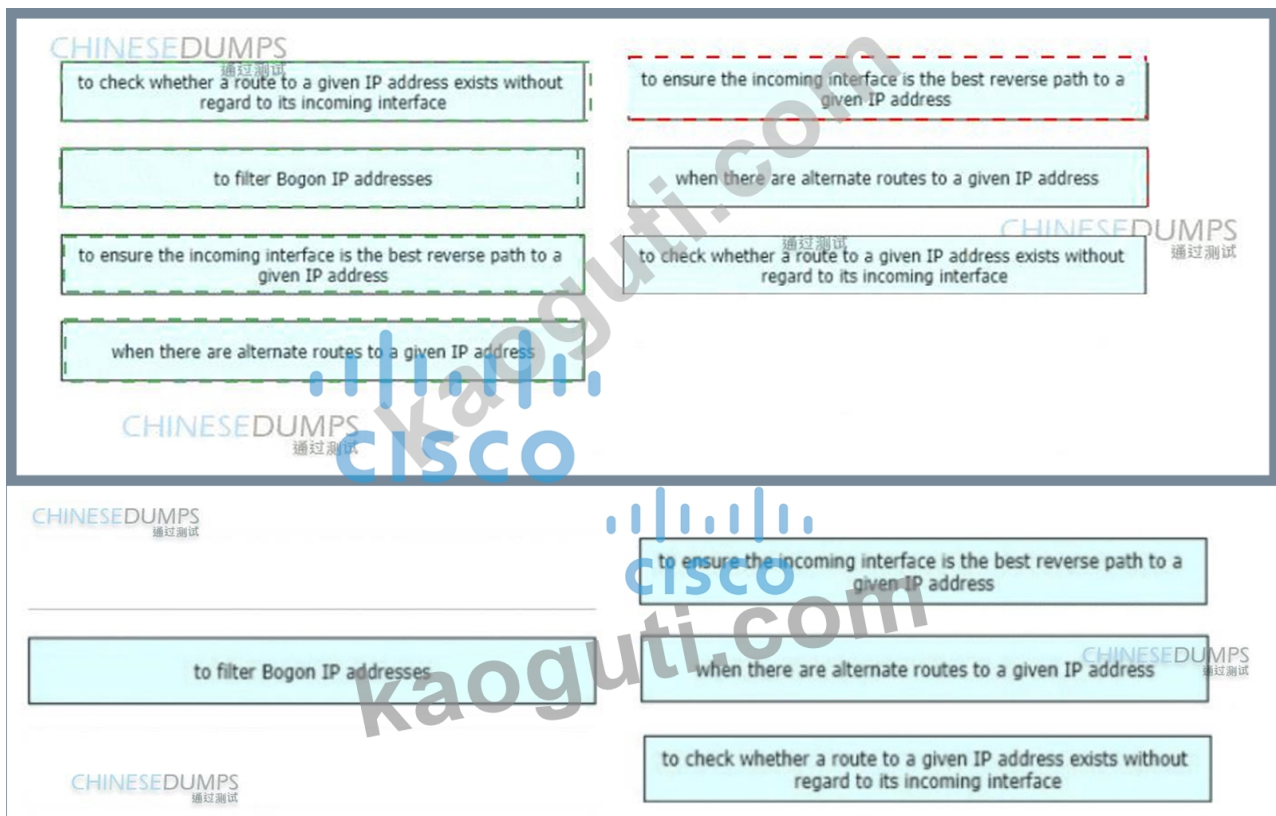

when there are alternate routes to a given IP address

CHINESEDUMPS 通过测试

CISCO

答案：

解題說明：

問題 #44

The Agile Manifesto is a document that defines the key values and principles behind the Agile philosophy and helps development teams work more efficiently and sustainably. Each of the four key values is split into two sections: a left-hand side and a right-hand side. In other words, though there is value in the items on the right, we value the items on the left more. What is one of the key values of the Agile Manifesto?

- A. comprehensive documentation over working software
- B. contract negotiation over customer collaboration
- C. following a plan over responding to change
- **D. individuals and interactions over processes and tools**

答案: D

問題 #45

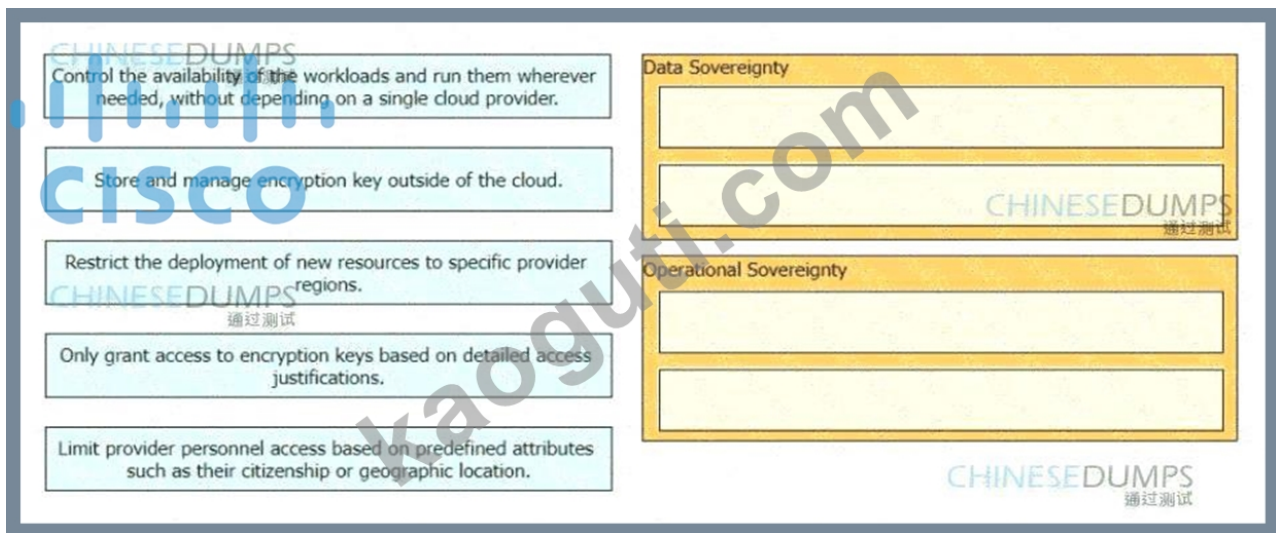

When planning their cloud migration journey, what is crucial for virtually all organizations to perform?

- A. RPO and RTO calculations duration planning
- B. optimizing the WAN environment
- **C. assessment of current infrastructure**
- D. SASE framework deployment

答案: C

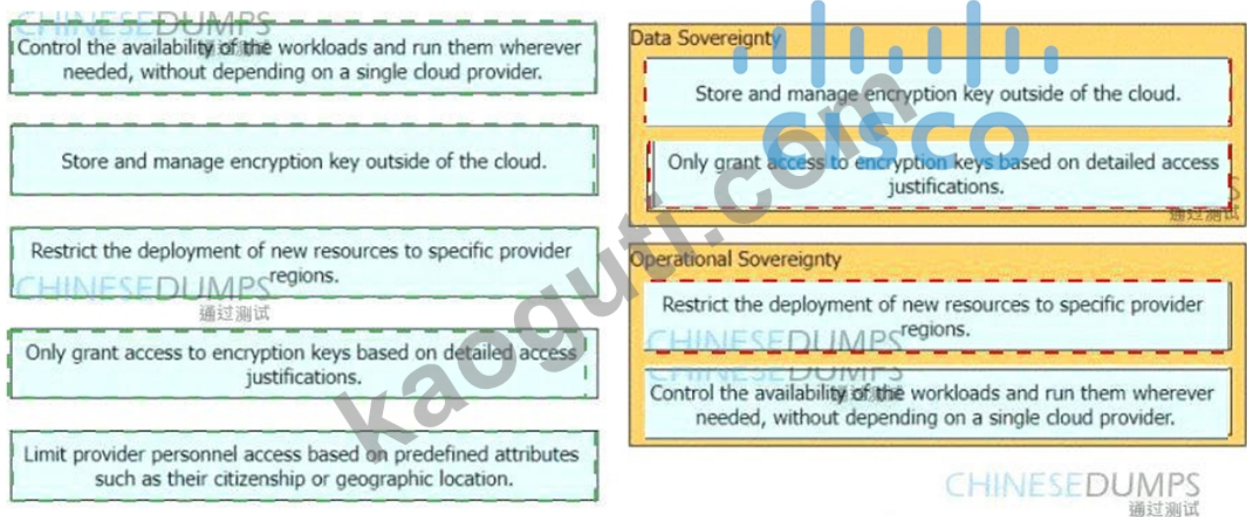

問題 #46

Data residency and sovereignty requirements are based on regional and industry-specific regulations, and different organizations have different data sovereignty requirements. Implementation of a mechanism that provides control over all access to data by cloud providers and the ability to inspect changes to cloud infrastructure and services is required. Drag and drop the descriptions from the left onto the corresponding categories on the right in no particular order. Not all options are used.

答案:

解題說明:

* Data Sovereignty: Store and manage encryption keys outside of the cloud, Only grant access to encryption keys based on detailed access justification.

* Operational Sovereignty: Restrict the deployment of new resources to specific provider regions, Control the availability of the workloads and run them wherever needed, without depending on a single cloud provider.

問題 #47

A network attacker exploits application flaws to compromise critical systems in the organization with these objectives:

- * Obtain sensitive data and export the data out of the network.
- * Compromise developer and administrator credentials to potentially

What is the next step after application discovery is completed in Zero Trust networkings

- A. Establish visibility and behavior modeling
- B. Ensure trustworthiness of systems.
- C. Assess real-time security health.
- D. Enforce policies and microsegmentation.

答案: A
