

# Perfect JN0-232 Exam Brain Dumps give you pass-guaranteed Study Materials - Lead2PassExam

Passing the exam rests squarely on the knowledge of exam questions and exam skills. Our JN0-232 training quiz has bountiful content that can fulfill your aims at the same time. We know high efficient JN0-232 practice materials play crucial roles in your review. Our experts also collect with the newest contents and have been researching where the exam trend is heading and what it really want to examine you. By analyzing the syllabus and new trend, our JN0-232 Practice Engine is totally in line with this exam for your reference. So grapple with this chance, our JN0-232 practice materials will not let you down.

Our JN0-232 practice materials are classified as three versions up to now. All these versions are popular and priced cheap with high quality and accuracy rate. They achieved academic maturity so that their quality far beyond other practice materials in the market with high effectiveness and more than 98 percent of former candidates who chose our JN0-232 practice materials win the exam with their dream certificate. Our JN0-232 practice materials made them enlightened and motivated to pass the exam within one week, which is true that someone did it always. The number is real proving of our JN0-232 practice materials rather than spurious made-up lies.

## Braindumps JN0-232 Pdf - Premium JN0-232 Files

Our JN0-232 test question with other product of different thing is we have the most core expert team to update our JN0-232 study materials, learning platform to changes with the change of the exam outline. If not timely updating JN0-232 training materials will let users reduce the learning efficiency of even lags behind that of other competitors, the consequence is that users and we don't want to see the phenomenon of the worst, so in order to prevent the occurrence of this kind of risk, the JN0-232 Practice Test materials give supervision and update the progress every day, it emphasized the key selling point of the product.

## Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q51-Q56):

### NEW QUESTION # 51

You want to verify the effectiveness of Web filtering on the SRX Series Firewall.  
How would you accomplish this task?

- A. by checking the file extensions of blocked content
- B. by installing a local NGWF server
- C. by attempting to access permitted or blocked URLs
- D. by examining the content filtering policies

**Answer: C**

Explanation:

The simplest and most direct method of verifying Web filtering effectiveness isto attempt to access permitted and blocked URLs.

\* Option A: Installing a local NGWF server is not required; NGWF queries Juniper's cloud.  
\* Option B: File extension checking applies to content filtering, not web filtering.  
\* Option C: Examining policies shows configuration but does not verify enforcement.  
\* Option D: Correct. Attempting to browse URLs that should be blocked or allowed confirms the Web filtering policy is effective.  
Correct Method: Attempt to access permitted or blocked URLs  
Reference: Juniper Networks - Verifying Web Filtering Configuration, Junos OS Security Fundamentals.

#### NEW QUESTION # 52

Which two statements are correct about unified security policies on SRX Series Firewalls? (Choose two.)

- A. Unified security policies use the application identification (AppID) engine.
- B. Unified security policies match applications before processing policy statements.
- C. Unified security policies with multiple matches use the most restrictive match.
- D. Unified security policies can be zone-based or global.

**Answer: A,D**

Explanation:

Unified security policies integrate traditional zone-based policies with application-based policies. Their characteristics include:

\* Zone-based or global (Option B): Unified policies can be applied as either zone-specific or global policies.

\* AppID engine (Option C): They leverage the AppID engine for application identification, enabling fine-grained control at the application layer.

\* Policy matching (Option A): Policies are evaluated sequentially like standard security policies; applications are not matched before policy processing.

\* Multiple matches (Option D): If multiple policies could match, the first match applies (sequential order), not the "most restrictive."

Correct Statements: B and C  
Reference: Juniper Networks - Unified Security Policies and AppSecure Integration, Junos OS Security Fundamentals.

#### NEW QUESTION # 53

You are asked to create a security policy that controls traffic allowed to pass between the Internet and private security zones. You must ensure that this policy is evaluated before all other policy types on your SRX Series device.

In this scenario, which type of security policy should you create?

- A. routing policy
- B. global policy
- C. default policy
- D. zone policy

**Answer: B**

Explanation:

\* Global policies (Option D): Evaluated before zone-based policies. They allow centralized control and can apply across all zones. Perfect for Internet-to-private traffic that must be enforced before other rules.

\* Routing policy (Option A): Controls routing decisions, not traffic forwarding/security.

\* Default policy (Option B): Denies all traffic by default, but cannot be customized for early evaluation.

\* Zone policy (Option C): Zone-based policies apply after global policies and are limited to specific zone pairs.

Correct Policy Type: Global policy

Reference: Juniper Networks - Global Security Policies vs Zone-Based Policies, Junos OS Security Fundamentals.

#### NEW QUESTION # 54

You have a situation where legitimate traffic is incorrectly identified as malicious by your screen options.

In this scenario, what should you do?

- A. Discard the traffic immediately.
- B. Increase the sensitivity of the screen options.
- C. Use the alarm-without-drop configuration parameter.
- D. Enable all screen options.

**Answer: C**

Explanation:

Screen options are used to detect and prevent attacks such as floods, scans, and malformed packets. In some cases, false positives may occur, where legitimate traffic is mistakenly identified as malicious.

\* To address this, administrators can configure the alarm-without-drop option (Option D). This setting generates alarms/logs for suspicious traffic without actually dropping it, allowing verification before taking further action.

\* Enabling all screen options (Option A) may increase false positives further.

\* Discarding traffic immediately (Option B) risks disrupting legitimate communication.

\* Increasing sensitivity (Option C) worsens the problem, since false positives would increase.

Correct Action: Use alarm-without-drop to log the traffic without dropping it.

Reference: Juniper Networks - Junos OS Screen Options and Troubleshooting, Junos OS Security Fundamentals.

### NEW QUESTION # 55

You want to use Avira Antivirus.

Which two actions should you perform to satisfy this requirement? (Choose two.)

- A. Enable the Avira engine in configuration mode.
- B. Restart the management daemon (mgd) to load the components.
- C. Enable the Avira engine in operational mode.
- D. Reboot the SRX Series device to load the components.

**Answer: A,D**

Explanation:

The SRX Series devices support third-party antivirus scanning engines such as Avira. To use the Avira antivirus engine, administrators must explicitly enable the engine and ensure that the required components are properly loaded.

\* Enable in configuration mode:

\* The Avira antivirus engine must be enabled under UTM configuration mode. This step ensures the SRX device uses the Avira scanning engine for antivirus inspection.

\* Example:

\* set security utm feature-profile anti-virus avira-engine enable

\* Reboot the SRX device:

\* A system reboot is required after enabling the Avira engine to load the Avira antivirus components into memory.

\* Without a reboot, the Avira engine will not become active.

\* Why not the others?

\* Restarting the mgd process (Option A) only reloads the management daemon and does not load antivirus engines.

\* Enabling in operational mode (Option B) is not supported; the configuration must be applied in configuration mode.

Therefore, the correct actions to use Avira Antivirus are: Enable the Avira engine in configuration mode (Option D) and reboot the SRX device (Option C).
