CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q76-Q81):

NEW QUESTION # 76

Which command is used to set the number of sites in a Maestro environment?

- A. set maestro orchestrator-site-amount
- B. set maestro configuration orchestrator-site-amount
- C. set maestro configuration orchestrator-site-number
- D. set maestro configuration orchestrator-site-id

Answer: B

Explanation:

This command is used to set the number of sites in a Maestro environment, which can be either one or two.

The number of sites determines the site-sync configuration and the failover policies for the Security Groups and the Security Group Members. The default value is one, and it can be changed only before the first Security Group is created.

NEW QUESTION # 77

When security policy is installed

- A. All SGMs receive the security policy and simultaneous policy installation occurs.
- B. All SGMs receive the security policy and one by one performs an independent policy verification. Then, all SGMs simultaneously install the policy.
- C. The SMO Master receives the policy and performs a policy verification the policy is installed on the SMO Master, the SMO Master broadcasts the available package, other members retrieve the new policy from the SMO Master, then the non-SMO Master SGMs install the policy.
- D. The policy is installed on the SMO, the SMO Master broadcasts the available package, other members retrieve the new policy from the SMO Master and perform an independent policy verification, then the non-SMO Master SGMs install the policy.

Answer: C

Explanation:

This is the correct answer because it describes the security policy installation flow for a Maestro Security Group. The SMO Master is the Security Group Member that acts as the leader and the single point of contact for the Management Server. The SMO Master verifies the policy and installs it first, then notifies the other SGMs that a new policy is available. The other SGMs fetch the policy from the SMO Master and install it in parallel.
