お客様の時間が大切だということが了解します。私たちのC_BCBTP_2502試験問題集の一つの特徴は時間を節約できることです。お客様は支払いに成功した後、自分のメールアドレスで直接にC_BCBTP_2502試験問題集をダウンロードできます。勉強するとき、C_BCBTP_2502試験問題集の問題の答えを覚えると、C_BCBTP_2502試験に参加できます。

SAP C_BCBTP_2502 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.
トピック 2	<ul style="list-style-type: none">• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

一回だけでSAPのC_BCBTP_2502試験に合格したい？ JPTestKingは君の欲求を満たすために存在するのです。JPTestKingは君にとってベストな選択になります。ここでは、私たちは君の需要に応じます。JPTestKingのSAPのC_BCBTP_2502問題集を購入したら、私たちは君のために、一年間無料で更新サービスを提供することができます。もし不合格になったら、私たちは全額返金することを保証します。

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite 認定 C_BCBTP_2502 試験問題 (Q13-Q18):

質問 # 13

How does SAP BTP support predictive analytics in business decision-making?

Note: There are 3 correct answers to this question.

- A. By automating data visualization.
- B. By using SAP Data Intelligence for real-time insights.
- C. By requiring only manual data input.
- D. By restricting analytics to financial data.
- E. By leveraging AI and machine learning models.

正解: A、B、E

解説:

SAP BTP provides a comprehensive ecosystem for predictive analytics, moving business decision-making from a reactive to a proactive state. This is achieved through three primary mechanisms. First, by leveraging AI and machine learning models (Option A), BTP services like SAP AI Core allow developers to train models on historical business data to predict future trends, such as customer churn or equipment failure.

Second, the platform automates data visualization (Option B) through SAP Analytics Cloud. This ensures that complex predictive insights are presented in an intuitive, dashboard-driven format that business leaders can easily interpret and act upon, rather than sifting through raw spreadsheets.

Third, the platform utilizes SAP Data Intelligence for real-time insights (Option D). This component orchestrates data from across diverse sources-both SAP and non-SAP-ensuring that the predictive models are fed with the most current and relevant information. By integrating these three pillars-intelligence (AI /ML), visualization (Analytics), and orchestration (Data Intelligence)-SAP BTP transforms the SAP Business Suite into a forward-looking enterprise system. This allows organizations to anticipate market shifts, optimize their supply chains, and personalize customer interactions with a level of precision that was previously impossible, ultimately driving better business outcomes and long-term sustainability.

質問 # 14

Which market trend is driving the adoption of SAP BTP?

- A. Increased need for data-driven decision-making.
- B. Decreasing focus on API-based integrations.
- C. Declining use of cloud-based solutions.
- D. Reduced emphasis on business automation.

正解: A

解説:

One of the most powerful market trends driving the global adoption of SAP BTP is the increased need for data-driven decision-making. In today's hyper-competitive landscape, "gut feeling" is no longer a viable strategy for business leaders. Organizations are sitting on mountains of data, but the challenge lies in extracting actionable insights from it. SAP BTP addresses this trend by providing a unified environment where data management, analytics, and AI converge. This allows businesses to transform raw data into a strategic asset, enabling more accurate forecasting, optimized operations, and enhanced customer experiences.

This trend is further accelerated by the "Digital Transformation" movement, where companies are moving away from monolithic, isolated systems toward agile, interconnected platforms. Businesses now demand real-time visibility across their entire value chain-from procurement to sales. SAP BTP's ability to integrate disparate systems and provide a "single source of truth" through SAP HANA Cloud and SAP Analytics Cloud directly addresses this market demand. As companies strive to become "Intelligent Enterprises," they rely on BTP to provide the technical infrastructure that supports continuous innovation, rapid automation, and the ability to pivot their business models based on data-driven evidence rather than historical assumptions.

質問 # 15

Which of the following are key features of SAP BTP's Integration Suite? (Choose two).

- A. Manual data processing with no automation.
- B. Restricted integration to SAP-only services.
- C. Built-in API management for secure data exchange.
- D. Prebuilt connectors for SAP and third-party applications.

正解: C、D

解説:

The SAP Integration Suite is designed to handle the complexities of a hybrid and heterogeneous IT landscape.

One of its most significant features is the availability of thousands of prebuilt connectors and integration flows for both SAP and third-party applications (such as Salesforce, ServiceNow, and various government portals). These "accelerators" significantly reduce the time and cost associated with integration projects, as developers do not have to build connections from scratch. This allows businesses to achieve a faster "time-to-value" when expanding their digital ecosystem.

Another critical feature is built-in API management. As enterprises move toward microservices and cloud-native applications, the number of APIs (Application Programming Interfaces) increases exponentially. SAP Integration Suite provides a centralized layer to govern, secure, and monitor these APIs. This ensures that data exchange between systems is not only efficient but also highly secure, protecting the enterprise from unauthorized access or data breaches. By combining prebuilt content with robust API governance, SAP BTP enables organizations to create a "composable enterprise" where different systems can be easily connected and reconfigured to meet changing business needs, moving away from the rigid, manual processes of the past.

質問 # 16

What is a key advantage of SAP BTP for the automotive industry?

- A. Restricts automation in supply chain management.
- B. Prevents data-driven innovations in vehicle manufacturing.
- C. Eliminates AI applications in predictive maintenance.
- **D. Supports connected vehicle ecosystems with IoT and AI.**

正解: D

解説:

The automotive industry is undergoing a massive shift from traditional manufacturing to "Mobility-as-a-Service." SAP BTP is central to this shift because it supports connected vehicle ecosystems with IoT and AI

. By integrating telematics data from vehicles directly into the SAP Business Suite via SAP BTP, manufacturers can monitor vehicle performance in real-time. This enables "Predictive Maintenance," where the system identifies a potential part failure before it happens, automatically alerts the driver, and schedules a service appointment at the nearest dealership.

Beyond the vehicle itself, SAP BTP enhances the entire automotive value chain. It uses the Integration Suite to connect manufacturers with a vast network of tier-one and tier-two suppliers, ensuring that the "Just-in-Time" (JIT) production model remains resilient against global disruptions. Additionally, SAP Analytics Cloud on BTP allows automotive companies to analyze consumer trends and driving patterns to inform the design of future electric and autonomous vehicles. This transformation positions SAP BTP not just as an IT platform, but as a core business driver that enables automotive companies to innovate at the speed of software while maintaining the high safety and quality standards required in vehicle manufacturing.

質問 # 17

How does SAP LeanIX enhance business IT governance when integrated with SAP BTP?

- **A. By providing IT landscape analysis and risk management.**
- B. By restricting governance frameworks to manual tracking.
- C. By eliminating enterprise architecture visualization.
- D. By preventing cloud-based integrations.

正解: A

解説:

IT governance is often a challenge during rapid digital expansion. As more services are deployed on SAP BTP, maintaining a clear overview of the "who, what, and where" becomes critical. SAP LeanIX enhances business IT governance by providing a structured framework for IT landscape analysis and risk management. It acts as a "single source of truth" for the enterprise architecture, documenting all applications, their dependencies, and the business capabilities they support.

When integrated with SAP BTP, LeanIX helps organizations avoid "SaaS sprawl" (the unmanaged growth of cloud applications). It provides visibility into which BTP services are being used and identifies potential security risks, such as applications running on outdated versions or services that lack proper data privacy controls. This level of transparency is essential for compliance and cost management. By analyzing the

"Technical Fit" and "Business Fit" of the IT landscape, LeanIX allows executives to make informed decisions about decommissioning legacy systems and investing in new BTP-driven innovations. This strategic positioning ensures that the evolution of the SAP Business Suite is governed by data rather than guesswork, reducing operational risk and ensuring that the IT infrastructure is robust, secure, and fully aligned with the organization's long-term goals.

質問 # 18

.....

近年、IT技術の急速な発展に伴って、IT技術を勉強し始める人がますます多くなっています。そこで、IT業界で働く人も多くなっています。このように、IT業界の競争が一層激しくなります。同様にIT業界で働いていて、IT夢を持っているあなたは、きっと他の人にキャッチアップされ、追い抜かれることを望まないでしょう。それでは、ずっと自分自身のスキルをアップグレードすることが必要になり、他の人に自分の強さを証明する必要があります。では、どうやって自分の能力を証明するのですか。多くの人々はIT認定試験を受験して認証資格を取ることを通して彼らの強さを証明します。あなたもIT認証資格を取りたいですか。まずSAPのC_BCBTP_2502認定試験に合格しましょう。これはSAPの最も重要な試験の一つで、業界全体に認証された資格です。
