

Juniper JN0-481 PDF Questions - Accessible On Any Device

BONUS!!! Download part of Test4Sure JN0-481 dumps for free: https://drive.google.com/open?id=1-KrUMGPlvJUMbfTcVvtqf_6KGC1o3qp

It is well known that the best way to improve your competitive advantages in this modern world is to have the JN0-481 certification, such as graduation from a first-tier university, fruitful experience in a well-known international company, or even possession of some globally recognized JN0-481 certifications, which can totally help you highlight your resume and get a promotion in your workplace to a large extend. As a result, our JN0-481 Study Materials raise in response to the proper time and conditions while an increasing number of people are desperate to achieve success and become the elite.

To prepare for JN0-481 exam, you do not need read a pile of reference books or take more time to join in related training courses, what you need to do is to make use of our Test4Sure exam software, and you can pass the exam with ease. Our exam dumps can not only help you reduce your pressure from JN0-481 Exam Preparation, but also eliminate your worry about money waste. We guarantee to give you a full refund of the cost you purchased our dump if you fail JN0-481 exam for the first time after you purchased and used our exam dumps. So please be rest assured the purchase of our dumps.

Exam JN0-481 Price & JN0-481 Simulated Test

Are you still feeling uncomfortable about giving up a lot of time to entertain, work or accompany your family and friends in preparation for the exam? Using JN0-481 quiz torrent, you can spend less time and effort reviewing and preparing, which will help you save a lot of time and energy. Whether you are a worker or student, you will save much time to do something whatever you want. It only needs 5-10 minutes after you pay for our JN0-481 learn torrent that you can learn it to prepare for your exam. Actually, if you can guarantee that your effective learning time with JN0-481 test preps are up to 20-30 hours, you can pass the exam.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q72-Q77):

NEW QUESTION # 72

In Juniper Apstra, what are three valid deploy modes when assigning systems to your blueprint?
(Choose three.)

- A. Drain
- B. Ready
- C. OOS-Ready
- D. Standby
- E. Deploy

Answer: A,B,E

NEW QUESTION # 73

What are two system-defined user roles that are available in Juniper Apstra? (Choose two.)

- A. root
- B. user
- C. authorized
- D. viewer

Answer: B,D

Explanation:

Juniper Apstra provides four system-defined user roles that are available in the Apstra GUI environment. They are: administrator, device_ztp, viewer, and user. Based on the web search results, we can infer the following statements:

viewer: This role includes permissions to only view various elements in the Apstra system, such as blueprints, devices, design, resources, external systems, platform, and others. Users with this role cannot create, edit, or delete any element.

user: This role includes permissions to view and edit various elements in the Apstra system, such as blueprints, devices, design, resources, external systems, platform, and others. Users with this role cannot create or delete any element.

authorized: This is not a system-defined user role in Juniper Apstra. It is a term used to describe users who have been authenticated by an external system, such as LDAP, Active Directory, TACACS+, or RADIUS.

root: This is not a system-defined user role in Juniper Apstra. It is a term used to describe the superuser account on a Linux system, which has full access to all commands and files. Creating a user in the Apstra GUI does not provide that user access to the Apstra platform via SSH. To access the Apstra platform via SSH, you must create a local Linux system user.

NEW QUESTION # 74

In the Juniper Apstra UI, which three resources are assigned under the Resources menu?
(Choose three.)

- A. VTEP pools
- B. logical device pools
- C. VNI pools
- D. IP address pools
- E. ASN pools

Answer: C,D,E

Explanation:

In the Juniper Apstra UI, the Resources menu allows you to create and manage global and local resources that are used for various elements of the network design and configuration. The Resources menu includes the following three types of resources that can be assigned to the network devices and virtual networks:

ASN pools: These are pools of autonomous system numbers (ASNs) that are used for the underlay routing protocol (EBGP) between the leaf and spine devices. You can create ASN pools with either 2-byte or 4-byte ASNs, and assign them to the logical devices in the blueprint.

VNI pools: These are pools of virtual network identifiers (VNIs) that are used for the overlay network (VXLAN) between the end hosts. You can create VNI pools with a range of VNIs, and assign them to the virtual networks in the blueprint.

IP address pools: These are pools of IPv4 or IPv6 addresses that are used for various purposes in the network, such as the loopback addresses for the devices, the IP prefixes for the virtual networks, the host IP addresses for the end hosts, and the gateway IP addresses for the IRB interfaces. You can create IP address pools with a range of IP addresses, and assign them to the logical devices and virtual networks in the blueprint.

The following two types of resources are not assigned under the Resources menu:

VTEP pools: These are not resources that can be created or assigned by the user. VTEPs are VXLAN tunnel endpoints that are automatically generated by the Apstra server based on the loopback IP addresses of the devices. VTEPs are used as the source and destination IP addresses for the VXLAN tunnels in the overlay network.

Logical device pools: These are not resources that can be created or assigned by the user.

Logical device pools are groups of logical devices that share the same role, interface map, and resource assignments in the blueprint. Logical device pools are used to simplify the network design and configuration by applying the same settings to multiple devices.

NEW QUESTION # 75

In the Juniper Apstra UI, which two resource types would be created in the Resources menu?
(Choose two.)

- A. DHCP pools
- B. bridge domain identifier (BDI)
- C. IP pools
- D. ASN pools

Answer: C,D

Explanation:

The Resources menu in the Juniper Apstra UI allows you to create and manage various types of resources that are assigned to different elements of the network.

Resources include the following types:

- IPv4 (including Host IPv4)
- IPv6 (including Host IPv6)
- ASN (autonomous system number)
- VNI (virtual network identifier)
- VLAN (virtual local area network)

Integer (used for pool type VLAN in local pools in Freeform blueprints) Therefore, the correct answer is C and D. ASN pools and IP pools are two types of resources that can be created in the Resources menu. Bridge domain identifier (BDI) and DHCP pools are not applicable in this scenario, because they are not part of the resources types supported by Juniper Apstra.

NEW QUESTION # 76

You want to keep virtual networks isolated from each other within the Juniper Apstra system. In this scenario, what are three ways to accomplish this task? (Choose three.)

- A. Disable Route Target exports when creating the Routing Zones.
- B. **Enable Security Policy for virtual networks in the same Routing Zone.**
- C. **Use Connectivity Templates to block access within the same Routing Zone.**
- D. Disable IPv4 connectivity when creating the virtual network within the same Routing Zone.
- E. **Put each network in different Routing Zones.**

Answer: B,C,E

Explanation:

To keep virtual networks isolated from each other within the Juniper Apstra system, you can use one or more of the following methods:

Enable Security Policy for virtual networks in the same Routing Zone. This allows you to define rules that control the traffic flow between different virtual networks within the same routing zone.

You can specify the source and destination virtual networks, the protocol, the port, and the action (allow or deny) for each rule. The security policy is applied on the ingress interface of the leaf devices.

Use Connectivity Templates to block access within the same Routing Zone. This allows you to customize the connectivity between different racks within the same routing zone. You can create templates that define the link type, the routing protocol, and the access control list (ACL) for each rack pair. The ACL can be used to filter the traffic based on the source and destination IP addresses, the protocol, and the port.

Put each network in different Routing Zones. This allows you to create logical boundaries between different virtual networks based on the route target (RT) values. A routing zone is a collection of virtual networks that share the same RT for importing and exporting routes. Virtual networks in different routing zones do not exchange routes with each other, unless you configure remote EVPN gateways to connect them.

NEW QUESTION # 77

.....

Competition appear everywhere in modern society. There are many way to improve ourselves and learning methods of JN0-481 exams come in different forms. Economy rejuvenation and social development carry out the blossom of technology; some JN0-481 Learning Materials are announced which have a good quality. Certification qualification exam materials are a big industry and many companies are set up for furnish a variety of services for it.

Exam JN0-481 Price: <https://www.test4sure.com/JN0-481-pass4sure-vce.html>

Our Juniper experts deem it impossible to drop the JN0-481 exam, if you believe that you have learnt the contents of our JN0-481 study guide and have revised your learning through the JN0-481 practice tests, The most remarkable feature of Test4Sure Exam JN0-481 Price is the availability of Exam JN0-481 Price braindumps, We have undertaken the quality and accuracy of the JN0-481 training guide materials over ten years.

Do you want to achieve the goal of passing Juniper certification JN0-481 exam as soon as possible, Where does it not apply, Our Juniper experts deem it impossible to drop the JN0-481 Exam, if you believe that you have learnt the contents of our JN0-481 study guide and have revised your learning through the JN0-481 practice tests.

JN0-481 Certification Questions - 100% Latest Questions Pool

The most remarkable feature of Test4Sure is the availability of JNCIS-DC braindumps, We have undertaken the quality and accuracy of the JN0-481 training guide materials over ten years.

Feel free to ask your queries to them, Our JN0-481 Dumps study guide can release your stress of preparation for the test.
