Detail SAFe-SPC Explanation & Latest SAFe-SPC Exam Experience

SAFe-SPC training materials are famous for instant access to download, and you can receive your download link and password within ten minutes after payment. And if you don't, you don't receive, you can contact with us, we will resolve it for you. Besides, we offer free demo for you, we recommend you to have a try before buying SAFe-SPC Training Materials. You can enjoy free update for 365 days if you choose us, so that you can obtain the latest information timely. And the latest version for SAFe-SPC

exam dumps will be sent to your email automatically. You just need to receive them,

Scaled Agile SAFe-SPC Exam Syllabus Topics:

Topic	Details
Topic 1	• Becoming a Lean Agile Leader: This section of the exam measures skills of the Team Leader and focuses on the mindset required to lead with Lean Agile values. It explains the Lean Agile mindset, reviews SAFe core values, and presents SAFe principles in simple and practical terms. Lesson 2 helps leaders understand how their actions influence team culture and continuous improvement.
Topic 2	• Building Solutions with Agile Product Delivery: This section of the exam measures skills of the Product Owner and focuses on delivering customer centric value. It explains design thinking, backlog prioritization, and program increment planning in a clear manner. It also covers developing on cadence and releasing on demand, followed by an overview of the continuous delivery pipeline with DevOps. Lesson 4 guides learners on building solutions that align with user needs.
Topic 3	• Launching an Agile Release Train: This section of the exam measures skills of the Scrum Master and focuses on the activities required to launch an Agile Release Train. It explains the preparation work, the training of teams, and the launch activities that bring the ART to life. Lesson 10 emphasizes readiness and alignment between teams.
Topic 4	• Designing the Implementation: This section of the exam measures skills of the Release Train Engineer and covers the steps for designing a SAFe implementation. It introduces the identification of value streams and Agile Release Trains and describes how to create an implementation plan. Lesson 9 shows how structure and planning support a smooth transformation process.
Topic 5	• Reaching the SAFe Tipping Point: This section of the exam measures skills of the Transformation Champion and addresses the earliest stages of change. It explains how to establish a clear vision for change and how to build a strong guiding coalition. Lesson 8 highlights the importance of commitment and sponsorship at the start of a transformation journey.
Topic 6	• Exploring Lean Portfolio Management: This section of the exam measures skills of the Portfolio Manager and covers the structure of the SAFe portfolio. It explains how to connect the portfolio to enterprise strategy, maintain the portfolio vision, and manage this vision through epics. It also presents Lean budgets and guardrails and introduces the concept of portfolio flow. Lesson 5 shows how strategic alignment supports value delivery.
Topic 7	• Enhancing the Portfolio: This section of the exam measures skills of the Enterprise Architect and addresses the scaling of value delivery. It discusses launching additional ARTs and value streams, strengthening enterprise solution delivery, and improving portfolio operations. It also reviews Lean governance and the ongoing work of LPM implementation. Lesson 12 focuses on expanding organizational capability.
Topic 8	• Coaching ART Execution: This section of the exam measures skills of the Agile Coach and covers coaching the train and the teams during execution. It explains the value of continuous improvement and presents the Inspect and Adapt process in a simplified manner. Lesson 11 reinforces how coaching improves team performance and overall ART outcomes.
Topic 9	• Establishing Team and Technical Agility: This section of the exam measures skills of the Agile Practitioner and introduces the characteristics of cross functional Agile teams. It explains the importance of built in quality and describes how Agile Release Trains are organized around the flow of value. Lesson 3 emphasizes the ability of teams to deliver reliable outcomes through technical discipline.
Topic 10	• Accelerating to Business Agility: This section of the exam measures skills of the Organizational Development Specialist and presents the key practices that accelerate Business Agility. It explains how to establish organizational agility and create a continuous learning culture. This final section helps learners understand how enterprises sustain improvement and adapt to future challenges.

Topic 11	• Leading the Change: This section of the exam measures skills of the Change Leader and focuses on guiding transformation. It reviews how to lead by example, how to lead organizational change, and how to apply the SAFe implementation roadmap. Lesson 6 provides a simple view of the leadership behaviors needed to support enterprise level change.

Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q165-Q170):

NEW QUESTION # 165
According to John Kotter, why is it important to build a guiding coalition?

- A. It creates a cross-functional team
- B. It can help lead the transformation
- C. It enables better exploration of customer needs
- D. It can build connections between Business and IT

Answer: B

Explanation:
John Kotter's model for organizational change, which is adopted in SAFe, emphasizes the need to build a
"guiding coalition." This group has the influence, authority, and credibility to lead the transformation and sustain change. They guide, coordinate, and communicate the transformation vision, making it possible to overcome resistance and drive enterprise-wide change.

SAFe 6.0, "Reaching the SAFe Tipping Point" (based on Kotter's 8-step process) SPC 6.0 Guide, "Leading the Change" module

NEW QUESTION # 166
When should a Lean portfolio be established?

- A. When there is a minimum of six Agile Release Trains (ARTs) that require coordination
- B. When it is necessary to operate in a completely centralized environment
- C. When the lack of alignment between strategy and execution impacts value delivery
- D. When it is part of training the executives

Answer: C

Explanation:
SAFe 6.0 notes that "a Lean portfolio should be established when the lack of alignment between strategy and execution impedes value delivery." The primary purpose of Lean Portfolio Management is to bridge the gap between strategy and execution, ensuring ongoing alignment and faster, more efficient value flow. There is no strict minimum number of ARTs, nor does it depend on centralization or executive training.

NEW QUESTION # 167
What activity calls for using the ROAM technique?

- A. Refining the Program Backlog.
- B. Managing teams by the Release Train Engineer.
- C. Categorizing program risks during PI Planning.
- D. Managing the ART sync.

Answer: C

Explanation:
The ROAM technique (Resolved, Owned, Accepted, Mitigated) is used during Planning Interval (PI) Planning to manage and categorize ART PI Risks. In the PI Planning session, all identified risks are discussed and then categorized using the ROAM

framework, which helps teams and stakeholders clarify ownership, mitigation strategies, and acceptance of each risk. According to the SAFe 6.0 official guidance:

"During PI Planning, teams identify program risks and then use the ROAM technique to classify each risk as Resolved, Owned, Accepted, or Mitigated. This collaborative activity ensures transparency and allows teams to address significant risks before proceeding." This activity doesnottake place during backlog refinement, ART syncs, or general team management; it is specific to the PI Planning event.

NEW QUESTION # 168

Which of the following is a reason to manage Epic flow with the Portfolio Kanban?

- A. It enables independent decision-making by stakeholders
- B. It brings structure to decision-making
- C. It removes the need to analyze Epics
- D. It creates a container for work to be visible

Answer: B

Explanation:

Managing Epic flow with the Portfolio Kanban brings structure to decision-making by providing a visual and managed process for reviewing, analyzing, and approving Epics. It enables stakeholders to make transparent, data-driven decisions about portfolio-level investments.

NEW QUESTION # 169

(Select 2) What is true about budgets in SAFe?

- A. Budgets are allocated to projects.
- B. Budgets are allocated to portfolios.
- C. Budgets are allocated to value streams.
- D. Budgets are allocated to strategic themes.
- E. Budgets are allocated to teams.

Answer: B,C

Explanation:

SAFe applies Lean-Agile budgeting by allocating funding at the portfolio level (C) and, more granularly, to value streams (E)-not to individual projects or teams. Budgets are not directly allocated to strategic themes, which serve as investment guidance rather than funding vehicles.

"Lean-Agile budgeting allocates funding to value streams within a portfolio, empowering decentralized decision-making and continuous value flow." (Source: SAFe 6.0 Framework: Lean Portfolio Management, Lean Budgets; SPC 6.0 Guide "Exploring Lean Portfolio Management")
