Valid AI-901 Exam Topics | Latest AI-901 Practice Questions

Do you have bought the Microsoft pdf version for your preparation? If not, hurry up to choose our AI-901 pdf torrent. Our AI-901 pdf study material is based on the AI-901 real exam scenarios covering all the exam objectives. You will find it is very helpful and precise in the subject matter since all the AI-901 Exam contents is regularly updated and has been checked and verified by our professional experts. AI-901 will help you to strengthen your technical knowledge and allow you pass at your first try.

Microsoft Azure AI Fundamentals Sample Questions (Q22-Q27):

NEW QUESTION # 22

You are developing an application that analyzes voicemail recordings by using Azure Content Understanding in Foundry Tools. You need to extract a transcript and structured information from the recordings.

Which type of analyzer should you use?

- A. video analyzer
- **B. audio analyzer**
- C. image analyzer
- D. document analyzer

Answer: B

NEW QUESTION # 23

You are building a knowledge base by using Azure AI Language service's custom answering feature. Which file format can you use to populate the knowledge base?

- A. PPTX
- B. JPEG
- **C. PDF**
- D. ZIP

Answer: C

Explanation:

Azure AI Language service's custom answering can populate its knowledge base using various file formats, including structured text (.txt, .tsv), Microsoft Office documents (.docx, .xlsx, .pptx), and HTML, PDF, and Markdown files.

NEW QUESTION # 24

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

The screenshot shows a question interface with the following content:

Statements	Yes	No
In Microsoft Foundry Agent Service, setting <code>tool_choice</code> to <code>auto</code> for an agent enables the agent to decide whether to call a tool.	<input type="radio"/>	<input type="radio"/>
In Microsoft Foundry Agent Service, setting <code>tool_choice</code> to <code>none</code> for an agent means that the model decides whether to call a tool.	<input type="radio"/>	<input type="radio"/>
In Microsoft Foundry Agent Service, setting <code>tool_choice</code> to <code>required</code> for an agent ensures that the agent must call one or more tools during each run.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

The screenshot shows the same question interface as above, but with the correct answers selected:

Statements	Yes	No
In Microsoft Foundry Agent Service, setting <code>tool_choice</code> to <code>auto</code> for an agent enables the agent to decide whether to call a tool.	<input checked="" type="radio"/>	<input type="radio"/>
In Microsoft Foundry Agent Service, setting <code>tool_choice</code> to <code>none</code> for an agent means that the model decides whether to call a tool.	<input type="radio"/>	<input checked="" type="radio"/>
In Microsoft Foundry Agent Service, setting <code>tool_choice</code> to <code>required</code> for an agent ensures that the agent must call one or more tools during each run.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 25

You need to create an AI agent in Microsoft Foundry that follows a specific role and behavior when responding to users.

What should you configure?

- **A. system instructions**
- B. tokens per minute (TPM)
- C. max completion tokens
- D. temperature

Answer: A

Explanation:

To create an AI agent that follows a specific role and behavior, you configure system instructions. Microsoft Foundry Agent Service documentation states that agent instructions define goals, constraints, and behavior.

Option A. tokens per minute (TPM) controls throughput quota, not behavior.

Option C. temperature controls response randomness/creativity, not the agent's role.

Option D. max completion tokens controls response length, not the agent's role or behavioral rules.

Therefore, the correct answer is B. system instructions.

NEW QUESTION # 26

You have a Microsoft Foundry project that contains a vision-enabled model deployment.

You are developing an application that sends images to the model.

You need to ensure that the model can analyze the images.

In which two formats can you provide the images? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a UTF-8 encoded text description of the image
- B. a JSON document that describes the image content
- C. a base64 encoded image data string
- D. a publicly accessible URL of the image

Answer: C,D

Explanation:

For vision-enabled Azure OpenAI / Microsoft Foundry model requests, image input can be provided by using an image URL or base64-encoded image data. Microsoft's Azure OpenAI REST API reference states that the image content part URL field can contain either a URL of the image or the base64 encoded image data. It also states that the Responses API input_image.image_url value can be a fully qualified URL or a base64 encoded image in a data URL.

NEW QUESTION # 27

.....

In the past few years, our AI-901 study materials have helped countless candidates pass the AI-901 exam. After having a related certification, some of them encountered better opportunities for development, some went to great companies, and some became professionals in the field. AI-901 Study Materials have stood the test of time and market and received countless praises. Through the good reputation of word of mouth, more and more people choose to use AI-901 study torrent to prepare for the AI-901 exam, which makes us very gratified.
