UiPath-ADPv1 Valid Exam Guide - UiPath-ADPv1 Latest Exam Practice

Our UiPath-ADPv1 training prep can be applied to different groups of people. Whether you are trying this exam for the first time or have experience, our UiPath-ADPv1 learning materials are a good choice for you. Whether you are a student or an employee, our UiPath-ADPv1 exam questions can meet your needs. This is due to the fact that our UiPath-ADPv1 Learning Materials are very user-friendly and express complex information in easy-to-understand language. We assure you that once you choose our UiPath-ADPv1 practice materials, your learning process is very easy.

UiPath (ADPv1) Automation Developer Professional Sample Questions

(Q173-Q178):

NEW QUESTION # 173

In UiPath Orchestrator, when managing multiple Jobs in a queue, which feature allows operators to dictate the execution sequence by assigning the importance of each Job?

- A. Job Execution Order
- B. Job Queuing Strategy
- C. Job Priority Levels
- D. Job Dependency Settings

Answer: C

Explanation:

In UiPath Orchestrator, the Job Priority Levels feature allows operators to assign priority to jobs in a queue, thereby dictating their execution sequence based on their importance.

NEW QUESTION # 174

"Process A" is scheduled to run at 2:00 PM using a time trigger with the Schedule ending of Job execution feature configured to stop the job after 20 minutes. Assuming that the robots are busy and "Process A" is queued until 2:05 PM, at what time will "Process A" be stopped?

- A. 2:28 PM
- B. 2:25 PM
- C. 2:05 PM
- D. 2:20 PM

Answer: B

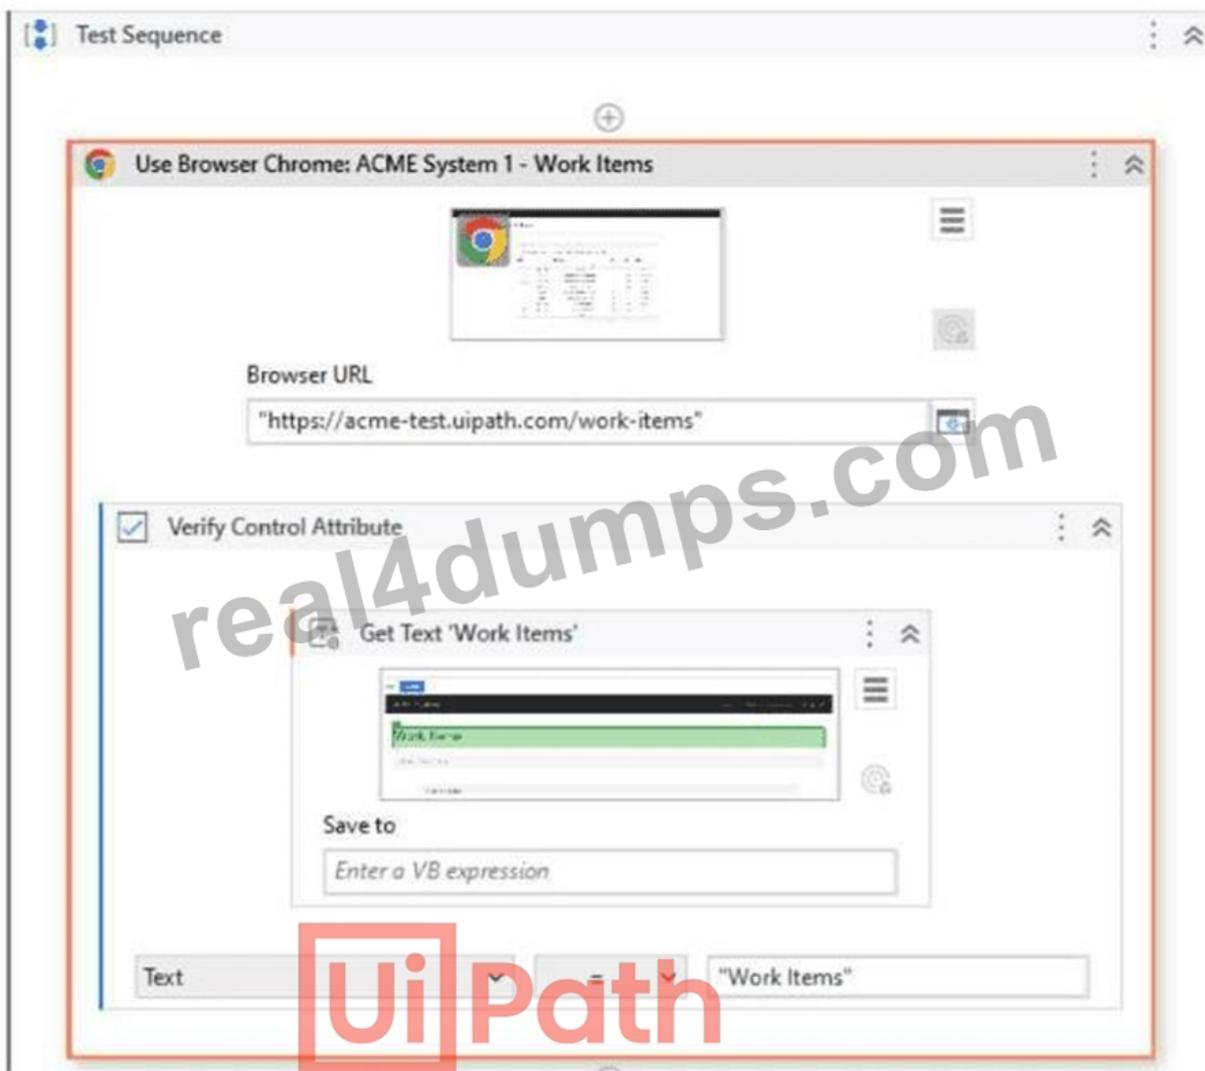

Explanation:

"Process A":

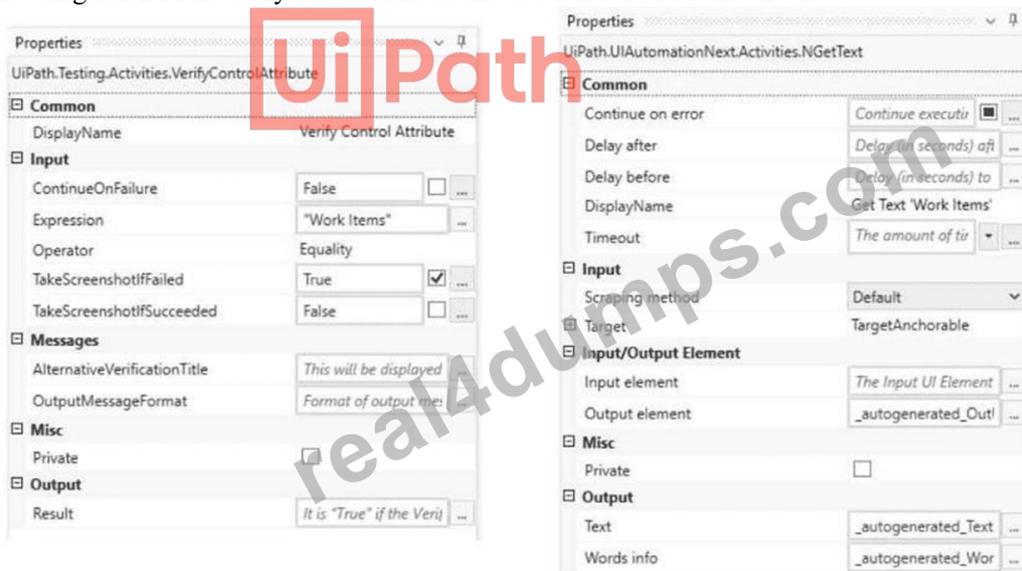

- * The process is scheduled to run at 2:00 PM, but due to busy robots, it starts at 2:05 PM.
- * The Schedule ending of Job execution feature is configured to stop the job after 20 minutes.
- * Therefore, "Process A" will be stopped 20 minutes after it started, which is at 2:25 PM.

NEW QUESTION # 175

Suppose you have the following workflow that verifies if the text value of an element is equal to "Work Items":

The configuration for the Verify Control Attribute and Get Text activities is shown below:

The element and its selector are highlighted in the image below:

Explanation:

A mock file is a copy of a workflow file that is used for testing purposes, where some activities are replaced by mock activities that simulate the expected behavior¹. A mock file can be created by selecting Mock workflow under test in the Create Test Case window². The mock file is stored in the Project > Mocks folder, and it has the same name as the original workflow file, with the suffix "_mock" added². For example, if the original workflow file is named "MySequence.xaml", the mock file will be named "MySequence_mock.xaml".

When a mock file is created, the changes made in the original workflow file are automatically applied to the mock file when the project is saved². This means that any new activities or modifications in the original workflow file are reflected in the mock file, except for the activities that are surrounded by mock activities².

The mock activities are not affected by the changes in the original workflow file, and they can only be edited within the mock file². Therefore, if you update "MySequence" and add a Log Message activity and a Verify Expression activity, and then save the project, the changes will be applied to the mock file, assuming that the file is closed. This means that the mock file will also have the Log Message activity and the Verify Expression activity added, unless they are inside a mock activity

NEW QUESTION # 177

What is the correct method to check how many resources are utilized in a personal workspace in UiPath Orchestrator?

- A. Navigate to Tenant > Folders, click the All Workspaces tab. and then click Check Resources for the desired workspace.
- B. Navigate to Tenant > Users, click the Personal Workspaces tab. and then click Resources for the desired workspace.
- C. Navigate to Tenant > Folders, click the Personal Workspaces tab. and then click See Usage for the desired workspace.
- **D. Navigate to Tenant > Folders, click the Personal Workspaces tab. and then click Manage Resources for the desired workspace.**

Answer: D

Explanation:

This is the correct method to check how many resources are utilized in a personal workspace in UiPath Orchestrator. You can see the number of runtimes, licenses, and storage used by the workspace, as well as the available quota for each resource type. You can also adjust the quota allocation for the workspace if needed.

For more information, please refer to Managing Personal Workspaces in the UiPath Documentation Portal.
