## Fortinet NSE6\_FSR-7.3 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> <li>System Configuration: FortiSOAR requires careful setup of applications for FortiSoar System Administrators. It covers system fixtures, and proxy settings to function optimally.</li> </ul>  |
| Topic 2 | <ul style="list-style-type: none"> <li>SOC and SOAR Overview: Security Engineers can gain an understanding of SOC and SOAR deployment requirements, including licensing management for FortiSOAR.</li> </ul>  |
| Topic 3 | <ul style="list-style-type: none"> <li>Security Management: This section covers how Security Engineers implement role-based access control (RBAC) and set up team structures within FortiSOAR to streamline security management.</li> </ul>   |
| Topic 4 | <ul style="list-style-type: none"> <li>System Operation: For System Engineers, this section covers Elasticsearch data management that may need to be externalized or migrated to accommodate system needs. Additionally, this section covers configuring the recommendation engine and utilizing the war room functionality.</li> </ul> |
| Topic 5 | <ul style="list-style-type: none"> <li>System Monitoring and Maintenance: For FortiSOAR Administrators, this domain covers using various tools for system monitoring to ensure consistent performance. This includes how to regularly oversee FortiSOAR processes, along with other critical functions.</li> </ul>                      |

## Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q67-Q72):

### NEW QUESTION # 67

A playbook uses two connectors in sequence. The first connector occasionally fails due to API rate limits, causing the entire playbook to stop.

What is the BEST solution?

- A. Increase the playbook timeout
- B. Run the playbook manually
- C. Add error handling with retry logic or conditional branching
- D. Remove the first connector

**Answer: C**

Explanation:

Proper design includes:

Retry mechanisms

Error handling branches

This ensures resilience against transient failures like API rate limits.

### NEW QUESTION # 68

Refer to the exhibit. Which statement correctly describes the user's login behavior?

The screenshot shows the FortiSOAR User Profile configuration page for user 'John Smith'. The 'Authentication' section is expanded, showing the following settings:

- Username: jsmith
- Access Type: Native
- Authentication Type: Native
- User Type: Application User

The '2-Factor' section is also visible at the bottom of the page.

- A. The user can log in only if there are enough seats available.
- B. The user is sent to a waiting queue if there are named users logged in.
- C. The user will always be able to draw from the concurrent pool and log in.
- D. The user has an active concurrent session that does not time out.

**Answer: A**

Explanation:

In FortiSOAR, when a user is configured with "Concurrent" access type, their ability to log in depends on the availability of concurrent user seats. This means the user can only log in if there are available seats in the concurrent pool. If all seats are occupied, the user must wait until a seat becomes free. This configuration allows multiple users to share a pool of licenses, making it suitable for environments where not all users need constant access.

#### NEW QUESTION # 69

A security analyst has reported unauthorized access to System Configuration. You must review the user's current level of access, and then restrict their access according to your organization's requirements. As part of your auditing process, which two actions should you perform? (Choose two.)

- A. Remove all record ownership that is assigned to the user.
- B. Review the user's learn hierarchy to ensure that the appropriate relationships are configured.
- C. View the user's effective role permissions, and then investigate which role is providing that access.
- D. Remove the create, read, update, and delete (CRUD) permissions or roles that the user does not require.

**Answer: C,D**

Explanation:

Explanation:

Reviewing and restricting CRUD permissions ensures that users only have access to the specific resources they need to perform their tasks, adhering to the principle of least privilege.

By reviewing the user's effective role permissions, you can identify the source of unauthorized access and take appropriate steps to adjust or remove the roles causing the issue.

#### NEW QUESTION # 70

Which two relationship types are configurable on FortiSOAR? (Choose two.)

- A. Grandparents
- B. Parents
- C. Siblings
- D. Relatives

**Answer: B,C**

#### NEW QUESTION # 71

What are two different services that you can configure for monitoring system and cluster health statuses on FortiSOAR? (Choose two.)

- A. Exchange
- B. POP
- C. IMAP
- D. SMTP

**Answer: A,D**

#### NEW QUESTION # 72

.....
