C-BCBTP-2502퍼펙트덤프최신문제 & C-BCBTP-2502 최신버전자료

SAP C-BCBTP-2502 시험 기출문제를 애타게 찾고 계시나요? DumpTOP의 SAP C-BCBTP-2502덤프는 SAP C-BCBTP-2502최신 시험의 기출문제뿐만아니라 정답도 표기되어 있고 저희 전문가들의 예상문제도 포함되어있어 한방에 응시자분들의 고민을 해결해드립니다. 구매후 시험문제가 변경되면 덤프도 시험문제변경에 따라 업데이트하여 무료로 제공해드립니다.

SAP C-BCBTP-2502 시험요강:

주제	소개
주제 1	• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.
주제 2	• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

C-BCBTP-2502최신버전자료 - C-BCBTP-2502최신버전 시험덤프자료

만일SAP C-BCBTP-2502인증시험을 첫 번째 시도에서 실패를 한다면 SAP C-BCBTP-2502덤프비용 전액을 환불 할 것입니다. 만일 고객이 우리 제품을 구입하고 첫 번째 시도에서 성공을 하지 못 한다면 모든 정보를 확인 한 후에 구매 금액 전체를 환불 할 것 입니다. 이러한 방법으로 저희는 고객에게 어떠한 손해도 주지 않을 것을 보장합니다.

최신 SAP Certified Associate C-BCBTP-2502 무료샘플문제 (Q31-Q36):

질문 # 31
Which SAP BTP service enables businesses to orchestrate and monitor enterprise-wide workflows?

- A. SAP Conversational AI
- B. SAP Business Network
- C. SAP Ariba
- D. SAP Workflow Management

정답：D

설명：
In the context of the Intelligent Enterprise, business processes often span multiple departments and different software systems. SAP Workflow Management (now largely integrated into the SAP Build Process Automation suite) is the specific BTP service designed to bridge these gaps. It allows organizations to digitize, manage, and operate business processes with high levels of transparency. The service provides a centralized platform to define process flows, set approval limits, and ensure that tasks are routed to the correct stakeholders in a timely manner.
The importance of this service lies in its ability to provide "live process visibility." Unlike traditional siloed workflows, SAP Workflow Management on BTP can pull data from various SAP Business Suite components-like Finance, Procurement, or HR-to create an end-to-end view of a business operation. This orchestration is critical for identifying bottlenecks and improving operational efficiency. While SAP Business Network and SAP Ariba facilitate external collaboration and procurement respectively, they do not provide the underlying technical framework for custom workflow orchestration across the entire enterprise landscape.
By utilizing BTP's workflow capabilities, companies can achieve a higher level of automation and governance, ensuring that business rules are consistently applied across all digital touchpoints, whether the underlying systems are cloud-based or on-premise.

질문 # 32
Which SAP BTP product is critical for financial forecasting and analytics?

- A. SAP Fieldglass
- B. SAP Business Network
- C. SAP HANA Cloud
- D. SAP Ariba

정답：C

설명：
For financial forecasting to be effective, it requires the ability to process massive amounts of historical and real-time data with extreme speed. SAP HANA Cloud is the critical foundational product on SAP BTP that enables this. As a cloud-native, in-memory database, it allows for the convergence of transactional (OLTP) and analytical (OLAP) processing. This means that finance teams can run complex forecasting models directly on live transactional data without the need for time-consuming data transfers to separate data warehouses.
In the context of the SAP Business Suite, SAP HANA Cloud acts as the "single source of truth." It provides the high-performance data engine required by tools like SAP Analytics Cloud to perform predictive modeling and "what-if" simulations. Whether a company is predicting cash flow, modeling market volatility, or performing year-end consolidations, HANA Cloud ensures that the underlying data is accessible and processed in sub-seconds. This capability is essential for modern finance departments that must move from descriptive analytics (what happened) to predictive and prescriptive analytics (what will happen and what should we do). While Ariba and Fieldglass provide the source data for procurement and contingent labor, it is SAP HANA Cloud that provides the computational power necessary to turn that data into strategic financial insights.

질문 # 33
What is the primary function of SAP Business Process Intelligence?

- A. To analyze and optimize business processes using AI-driven insights.
- B. To store customer transactional data.
- C. To replace existing workflow automation tools.
- D. To manage API security and integrations.

정답： A

설명：
Before an organization can automate or improve its operations, it must first understand how its processes are actually running. The primary function of SAP Business Process Intelligence (largely centered around the SAP Signavio suite) is to analyze and optimize business processes using AI-driven insights. It provides
"Process Mining" capabilities that scan the data logs of the SAP Business Suite to reveal the "real" path a business process takes, often uncovering hidden bottlenecks, manual workarounds, and deviations from the standard procedure.
By positioning Business Process Intelligence as a starting point for digital transformation, SAP BTP allows organizations to make data-backed decisions about where to automate. For example, the tool might discover that a specific regional office takes twice as long to process purchase orders compared to the global average.
Using AI, it can identify the root cause-such as a lack of automation or incorrect master data-and recommend specific BTP services (like SAP Build) to fix the issue. This creates a cycle of continuous improvement, where processes are constantly monitored, analyzed, and optimized, ensuring that the SAP Business Suite operates at peak efficiency and remains aligned with the company's strategic goals.

질문 # 34
Which SAP BTP service helps businesses automate workflows and approval processes?

- A. SAP Business Network
- B. SAP SuccessFactors
- C. SAP Ariba
- D. SAP Workflow Management

정답： D

설명：
Automation is a key pillar of the Intelligent Enterprise, and SAP Workflow Management (now part of the broader SAP Build Process Automation suite) is the engine that drives this. This service enables businesses to digitize and automate business processes that require human intervention, such as multi-level approvals for purchase requisitions, travel requests, or HR onboarding. By moving these processes onto BTP, organizations can eliminate the "paper trail" and ensure that tasks are routed to the right people at the right time, with full auditability.
Positioning Workflow Management as a service on BTP allows for "cross-application" orchestration. For instance, a workflow could start in SAP S/4HANA with a new sales order, trigger an approval in a custom mobile app, and finally update a record in an external CRM system. This level of flexibility is difficult to achieve within a single application silo. Furthermore, the service provides visual "Low-Code" tools that allow business process owners to modify workflows as business rules change, without needing deep technical coding skills. This agility ensures that the SAP Business Suite remains responsive to organizational shifts, making SAP Workflow Management a critical tool for improving operational efficiency and reducing process cycle times across the entire enterprise.

질문 # 35
How does SAP BTP transform the healthcare industry?

- A. By providing AI-driven diagnostics and patient management.
- B. By eliminating automation in pharmaceutical research.
  *D. By preventing AI adoption in hospitals.
- C. By restricting cloud-based medical records management.

정답： A

설명：

In the healthcare sector, SAP BTP acts as a catalyst for digital transformation by bridging the gap between clinical data and administrative efficiency. One of the most significant ways it transforms the industry is through AI-driven diagnostics and patient management. By utilizing SAP HANA Cloud's ability to process massive datasets-including structured electronic health records and unstructured medical imaging- health providers can use machine learning models on BTP to identify patterns that might indicate early-stage diseases.

Furthermore, BTP facilitates the "Patient 360" concept, where data from various touchpoints (hospitals, insurance providers, and wearable devices) is integrated using the SAP Integration Suite. This gives clinicians a holistic view of a patient's history, leading to more personalized treatment plans and better outcomes. In addition to clinical benefits, BTP's automation tools (SAP Build) help hospitals streamline administrative tasks like appointment scheduling and billing, which reduces the burnout of medical staff. By positioning SAP BTP as the technological foundation, healthcare organizations can transition from reactive care to proactive, data-driven wellness management, ensuring that the SAP Business Suite delivers value far beyond traditional back-office operations.
