**F3 Real Exam - F3 Torrent Vce & F3 Valid Questions**

The product is made in three different formats to help customers with different preparation styles meet their needs. One of these formats is CIMA F3 Dumps PDF file which is printable and portable. Users can take CIMA F3 PDF Questions anywhere and use them anytime. They can print these real F3 questions to save them as paper notes.

CIMA CIMAPRA19-F03-1 exam is a comprehensive test that assesses the candidate's understanding of financial strategy. F3 Exam is divided into three sections, each of which has a specific focus. The first section covers financial analysis and planning, which involves analyzing financial data to make informed decisions. The second section focuses on investment appraisal, which involves evaluating potential investment opportunities. The final section covers risk management, which involves identifying and managing potential risks to the business. Overall, the CIMA CIMAPRA19-F03-1 exam is a valuable certification for individuals who want to advance their career in finance and accounting.

## **CIMA F3 Financial Strategy Sample Questions (Q352-Q357):**

### **NEW QUESTION # 352**

A listed company is planning to raise \$21.6 million to finance a new project with a positive net present value of \$5 million. The finance is to be raised via a rights issue at a 10% discount to the current share price. There are currently 100 million shares in issue, trading at \$2.00 each.

Taking the new project into account, what would the theoretical ex-rights price be?

Give your answer to two decimal places.

\$ ?

### **Answer:**

Explanation:

2.02, 2.03

### **NEW QUESTION # 353**

Two companies that operate in the same industry have different Price/Earnings (P/E) ratios as follows:

 CIMA	P/E ratio
Company A	8
Company B	15

Which of the following is the most likely of the different P/E ratios?

- A. Company B has higher business risk than Company A.
- B. Company B has higher gearing than Company A.
- C. Company B has a greater profit this year than Company A.
- D. Company B has higher expected future growth than Company A.

### **Answer: D**

### **NEW QUESTION # 354**

The following information relates to Company A's current capital structure:

Debt:Equity (Market value)	Asset beta	Equity beta	Cost of equity CIMA	Pre-tax cost of debt
20:80	1.01	1.20	11.40%	3.00%

Company A is considering a change in the capital structure that will increase gearing to 30:70 (Debt:Equity).

The risk -free rate is 3% and the return on the market portfolio is expected to be 10%.

The rate of corporate tax is 25%

Using the Capital Asset Pricing Model, calculate the cost of equity resulting from the proposed change to the capital structure.

- A. 9.3%
- B. 11.4%
- C. 12.3%
- D. 10.1%

**Answer: C**

#### NEW QUESTION # 355

If a company's bonds are currently yielding 8% in the marketplace, why would the entity's cost of debt be lower than this?

- A. Interest is deductible for tax purposes.
- B. The company's credit rating has changed.
- C. There should be no difference; the cost of debt is the same as the bond's market yield.
- D. Market interest rates have decreased.

**Answer: A**

Explanation:

The market yield of 8% is a before-tax return to investors. For the company, interest payments reduce taxable profit, so the after-tax cost of debt is:

Cost of debt = Yield  $\times$  (1 - tax rate)  $\rightarrow$  Cost of debt = Yield  $\times$  (1 - tax rate) This makes the company's cost of debt lower than the 8% market yield.

#### NEW QUESTION # 356

B, a European based modern art dealer, frequently imports and sells single high value items created in the United States. The price is fixed at the date of sale but the items are commissioned and made to order with a lead time of three to nine months depending on the individual specification B holds payment for his customers from the point of purchase and passes funds when the items are shipped. However, despite putting the money on short term deposit, there have been times when B's profits have been almost entirely eroded by adverse movements in interest rates. Advise B by matching the appropriate instrument to B's requirements.

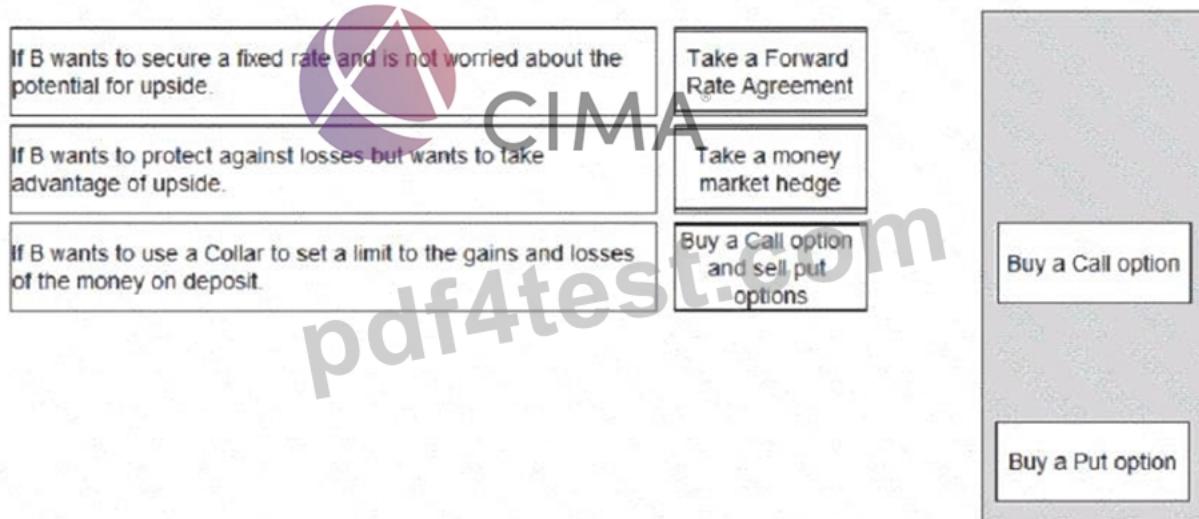

If B wants to secure a fixed rate and is not worried about the potential for upside.			Take a money market hedge
If B wants to protect against losses but wants to take advantage of upside.			Buy a Call option and sell put options
If B wants to use a Collar to set a limit to the gains and losses of the money on deposit.			Buy a Call option
			Take a Forward Rate Agreement
			Buy a Put option
